## 1. REPORT FROM THE DIRECTOR'S DESK

The Aizawl Zoological Park the first Zoological Park of the state was established on 24th November, 2006 located along the roadside of Aizawl to Airport Lengpui in an isolated site free from the human settlements with natural surroundings which made it a congenial habitat for the inmates to live in harmony with nature. It has become destination for all those who like to experience beauty of nature and the wild. Far more than just a tourist attraction our management thrust has been ex situ conservation of the threatened species, education to spread awareness about the animal world and their conservation needs. In spite of limited funding support from State we have worked diligently to make significant improvement in the infrastructure development, animal collection, health care and enclosure enrichment.

The Zoo is home to 17 species of mammalian endangered species, 2 species of reptilian endangered, 4 species of other mammalian, 3 species each of bird and reptiles with a total population of 198 animals. Conservation breeding programme has been taken up in the zoo, some endangered species like Leopard cat, Stump tailed macaque and Serow has successfully bred during the reported period.

The zoo also hosts some rescued exotic birds like Cassowary, Vulturine parrot, Large fig parrot, Alexandrian parakeet, Sulphur crested cockatoo, Crimson bellied parakeet, Dusky lorry, Crown pigeon etc. which became attraction of visitors. There are good number of free ranging mammals, Birds and reptiles within the zoo premises.

Under animal exchange programme one Golden Cat was given to Assam State Zoo, Guwahati on Conservation loan basis. Acquisition of Royal Bengal Tiger from neighboring state is proposed which is under active consideration. In spite of being a small zoo status a good number of surplus animals are available in the Aizawl Zoological Park which may be transferred to other zoos in the country.

My sincere thanks to Dr. CH.M.Rao, IFS, PCCF (HOD) and Pu Liandawla, IFS, PCCF (Wildlife) & Chief Wildlife Warden Mizoram for their able guidance and encouragement for upkeep of the zoo and posting of sufficient number of Field Staff in the midst of shortage of field staff in the Department.

I am much grateful to the Curator, Range Officer and other field staff of Aizawl Zoological Park for their sincere co-operation and courageous labours for successful management of the zoo.

## 2. HISTORY OF AIZAWL ZOOLOGICAL PARK :-

Aizawl Zoological Park is located 14Kms away from the State Capital Aizawl and at a walking distance by the side of Aizawl–Sairang road NH 54 and was inaugurated officially on 24<sup>th</sup> November 2006. The Zoo is spread over an area of **65 ha** on a natural hilly landscape with soothing green vegetation and other natural features. In fact the natural surroundings in the Zoo provide a congenial habitat for the inmates to live in harmony with nature. The entire area of the Zoo is connected with a network of well-developed pathways having suitable numbers of public conveniences at appropriate locations. Most of the animals are kept in open air moated enclosures. The main attraction of the Zoo is Hoolock gibbon along with rare and endangered Clouded leopard, Himalayan Black Bear, Wild dog, Serow, Oriental Pied Hornbill and several other species of animals which are rarely found elsewhere in the country.

- 3. VISION :**
- 1) *To provide necessary health care, hygienic food in sufficient quantity and a high quality of housing and display.*
  - 2) *To develop self-sustainable and genetically viable population of endangered species of animals, to be utilized as gene process full for long term wildlife conservation.*
  - 3) *Promoting wildlife education and awareness through proper display of animals in their near natural habitat, through properly designed exhibits signage and interpretation Centre, field tours, film and slide shows etc.*
  - 4) *To facilitate research on wildlife conservation.*

- 4. MISSION :** The Mission of Aizawl Zoological Park is to create environment of Ex-situ conservation awareness to encourage people to develop a caring attitude towards flora and fauna; to serve as a dynamic nature conservation Centre by promoting breeding programmes for rare and endangered species of Mizoram and to offer public service, recreation, education and research.

## 5. OBJECTIVE :

- 1) Conservation breeding of endangered wild animal species available within geographical range of distribution, necessary exchange with other Zoological Parks.
- 2) Scientific research on animal behavior, diseases and their control, feed and nutrition and reproductive biology. The data so recorded will be made use in management of animals in the wild.
- 3) Promote conservation education, awareness and interpretation for /to the public in general and younger generation in particular.
- 4) Creation as hill bird collection center to accommodate good stock of various species of aviary population in the hill region of northeast.
- 5) Rehabilitation of orphaned or rescued endangered species in the wild.
- 6) Providing recreation for Zoo Visitors.
