## 1 Report of the Officer-in-charge

Bengaluru Bannerghatta Biological Park is of a unique ecological importance as it is situated on the northern terminal point of Mysuru Elephant Reserve connecting forest reserves of Karnataka, Tamil Nadu and Kerala. The Park plays a major role in conservation of rich floral and faunal diversity.

The Park is committed to realize the objectives of the National Zoo Policy, 1998 by supporting the national efforts in conservation of rich biodiversity and United Nations Sustainable Development Goals (SDG-15) **Life on Land!**

Animals in captivity acts as ambassadors for the wild population to create awareness among visitors about conservation, propagation of wildlife and need to maintain ecological balance. As everyone is aware, our pristine wildlife and its habitat, are under severe pressure and the main objective of the zoo is ex-situ conservation, rescue and rehabilitation and to augment the depleting population of the endangered species.

The park has aimed to become a sustainable organization by harvesting locally grown green grass to feed most of the herbivores housed in zoo and safari area. Open space inside Rescue center was utilized to grow locally available fruits to feed animals in the zoo. We also aim to use the water from the naturally available lake for the animals and park maintenance, for which de-silting of lakes was carried out to enhance the water capacity of the lakes.

Animals being one of the important stakeholders of the zoo, various enrichment activities were carried out throughout the year to enhance the lives of captive animals through species-specific enrichments. This included environmental enrichments such as physical structures and landscaping of enclosures, feeding enrichments using puzzle feeders to enhance the foraging time and seasonal & sensory enrichments to stimulate the animal's senses.

In order to create awareness and inspire young enthusiasts about wildlife and their importance, educational activities were conducted continuously throughout the year. As part of Chinnara Mrugalya Darshana guided tour for over 600 government school students, under privileged children and specially-abled were conducted. Guided tour of Reptile park & Butterfly park was also initiated to create awareness about the lesser known species.

Bannerghatta also participated in Azadi Ka Amrit Mahotsav organized by CZA to create awareness about Malabar Banded Swallowtail Butterfly using various online & offline educational activities. Along with this educational activities such as thematic drawing, painting, elocution, green initiative from academic institutions, planting, cleanup drives and silent march was executed throughout the year and on special days.

Predecessor Smt. Vanashree Vipin Singh, IFS, Chief Conservator of Forests managed the pandemic situation very well by making Bannerghatta Biological Park a self sustainable organization. She initiated animal and staff welfare activities such as in-house harvesting, dedicated place for staff children's education and many other green initiatives. I wish to carry forward the same for the betterment of the park.

**Dr. Sunil Panwar, IFS**

Conservator of Forests  
and Executive Director,  
Bengaluru Bannerghatta Biological Park

## 2 History of the Zoo

Bannerghatta Biological Park (BBP) is located about 22 km from Bengaluru city. It is one among the few places in the world where wilderness is preserved so close to a big city. BBP has its own unique mission and vision for wildlife protection and preservation for the present and future generations to come. The park offers an excellent opportunity and window for the citizens of the mega city, Bengaluru, to come closer to nature.

BBP was started as a small zoo (picnic corner) in 1974 within Bannerghatta National Park (BNP) mainly for recreation purposes, with changing times the priority has shifted to the welfare of wild animals. Whilst panning the pages of history, one comes across the contributions of Sri Y.M.L Sharma, IFS, the then Chief Conservator of Forests and Head of the Forest Department, who was responsible for identifying the need for a place where Bengalureans can enjoy the solitude of wilderness. He was instrumental in visualizing and creating the Bannerghatta National Park (BNP). It was his conviction that ensured the notification of land and the creation of a National Park in 1974.

In 2002, Bannerghatta Biological Park (BBP), emerged out as an independent establishment from BNP and was brought under the administrative control of the Zoo Authority of Karnataka (ZAK). The Bannerghatta zoo, various safari units, butterfly park and rescue centre was created within the area of Bannerghatta Biological Park which measures around 731.88 Ha. The management jurisdictions of Bannerghatta Biological Park were brought under ZAK with effect from 01.04.2002.

For the convenience of the general public, the Governing Council of Zoo Authority of Karnataka had decided to rename Bannerghatta Biological Park as "Bengaluru Bannerghatta Biological Park(BBBP)" in the 140 GC Meeting, held on 16-01-2019.

### List of officers who headed Bengaluru Bannerghatta Biological Park after the bifurcation of Bannerghatta National Park and Bannerghatta Biological Park

- 🐾 Sri. B.M.T. Rajeev, IFS (In-charge) : 01/04/2002 to 27/06/2003
- 🐾 Sri N.L. Raghava : 27/06/2003 to 01/07/2003
- 🐾 Sri. K.B.Markandaiah, IFS : 01/07/2003 to 25/06/2006
- 🐾 Smt. Geethanjali, IFS : 25/06/2006 to 08/03/2007
- 🐾 Sri. K.B. Markandaiah, IFS : 08/03/2007 to 05/05/2008
- 🐾 Sri. Millo Tago, IFS : 05/05/2008 to 09/03/2011
- 🐾 Sri Chandrashekar (In-charge) : 09/03/2011 to 29/04/2011
- 🐾 Dr. R Raju, IFS : 29/04/2011 to 06/03/2013
- 🐾 Sri N Devaraju, IFS : 06/03/2013 to 16/09/2013
- 🐾 Sri Range Gowda IFS : 16/09/2013 to 14/09/2015
- 🐾 Sri Santosh Kumar, IFS: 14/09/2015 to 01/11/2017
- 🐾 Sri R Gokul, IFS : 01/11/2017 to 05/09/2018
- 🐾 Dr. Sanjay S Bijjur, IFS : 05/09/2018 to 22/07/2019
- 🐾 Smt Vanashree Vipin Singh, IFS: 22/07/2019 14/02/2022
- 🐾 Dr. Sunil Panwar, IFS : 14/02/2022 till date

### 3 Vision

To protect and conserve Wildlife and Environment through Sustainable and Scientific management of zoo.

### 4 Mission

To Inspire, Inform, Enhance Scientific literacy of citizens to support national effort of Conservation of rich Biodiversity on Earth.

### 5 Objectives

- 🐾 To compliment and strengthen the national efforts in **ex-situ Conservation** and strength the Conservation of the rich Bio- Diversity of the country, particularly the fauna.
- 🐾 Supporting the conservation of endangered species by giving species, which have no chance of survival in the wild, a last chance of survival through **coordinated breeding under ex- situ condition** and raise stocks for rehabilitating them in wild as and when it is appropriate and desirable.
- 🐾 To inspire amongst zoo visitors empathy for wild animals, an understanding and **awareness** about the need for conservation of natural resources and for maintaining the ecological balance.
- 🐾 Providing opportunities for **scientific studies, research and documentation on conservation and creation of database** for sharing between authorities involved in In-Situ and Ex-Situ conservation.
- 🐾 Providing **dedicated facilities for the rescued and orphaned wild animals** through appropriate housing, clinical and management facilities in off display area.
- 🐾 To serve as **gene pool and germplasm reserve** for future biological research on wild animals and to **extend facilities for studies on behavior and breeding of different animals.**
- 🐾 To sustain the **founder population** and also to **augment the Depleting populations of Endangered species in the wild.**

### Basic Information about the Zoo

1. Name of the Zoo : Bengaluru Bannerghatta Biological Park
2. Year of Establishment : 1974  
Initially, it was started as a small zoo (picnic corner) in 1974 within Bannerghatta National Park(BNP). In 2002, Bannerghatta Biological Park(BBP), emerged out as an independent establishment from BNP and was brought under the administrative control of the Zoo Authority of Karnataka(ZAK) with effect from 01.04.2002.
3. Address of the Zoo : Bengaluru Bannerghatta Biological Park, Bannerghatta, Bengaluru 560083
4. State : Karnataka
5. Telephone Number : 080-29776466, 29776467  
E-mail address : bannerghattazoo@gmail.com  
Website : www.bannerghattabiologicalpark.org
6. Recognition Valid Upto : 19<sup>th</sup> August, 2023
7. Category of zoo : Large
8. Area(in hectares) : 731.88 hectares
9. Number of visitors for the year 2021-22 : 9,41,613
10. Visitor's facilities available in Zoo : R O Drinking water, Toll free washrooms, Cloak room, Shelters, Electric Vehicle Service, Wheelchair, First aid Box, Baby Care Unit, Children's play area in butterfly park
11. Weekly Closure Day of the Zoo : Tuesday

### Management Personnel of the zoo

- Executive Director & : Dr. Sunil Panwar, IFS  
Conservator of Forests  
(Officer in-charge)
- Deputy Director : Sri. K. Harish
- Executive Engineer : Sri. H L Nagendrappa
- Assistant Director : Dr. Umashankar K S  
(Veterinary Service)
- Range Forest Officers : Sri Dinesha K  
Sri Mohammed Tahir
- Pathologist : Dr. Manjunath V  
(WADDL., Supported by IAH & VB)
- Biologist : Smt. Aishwarya Sridhar
- Education Officer : Kum. Amala M Anil
- Public Relation Officer : Sri Santosh V
- Lab technician : Smt. Madhuri  
(WADDL., Supported by IAH & VB)

### Owner/Operator of the zoo

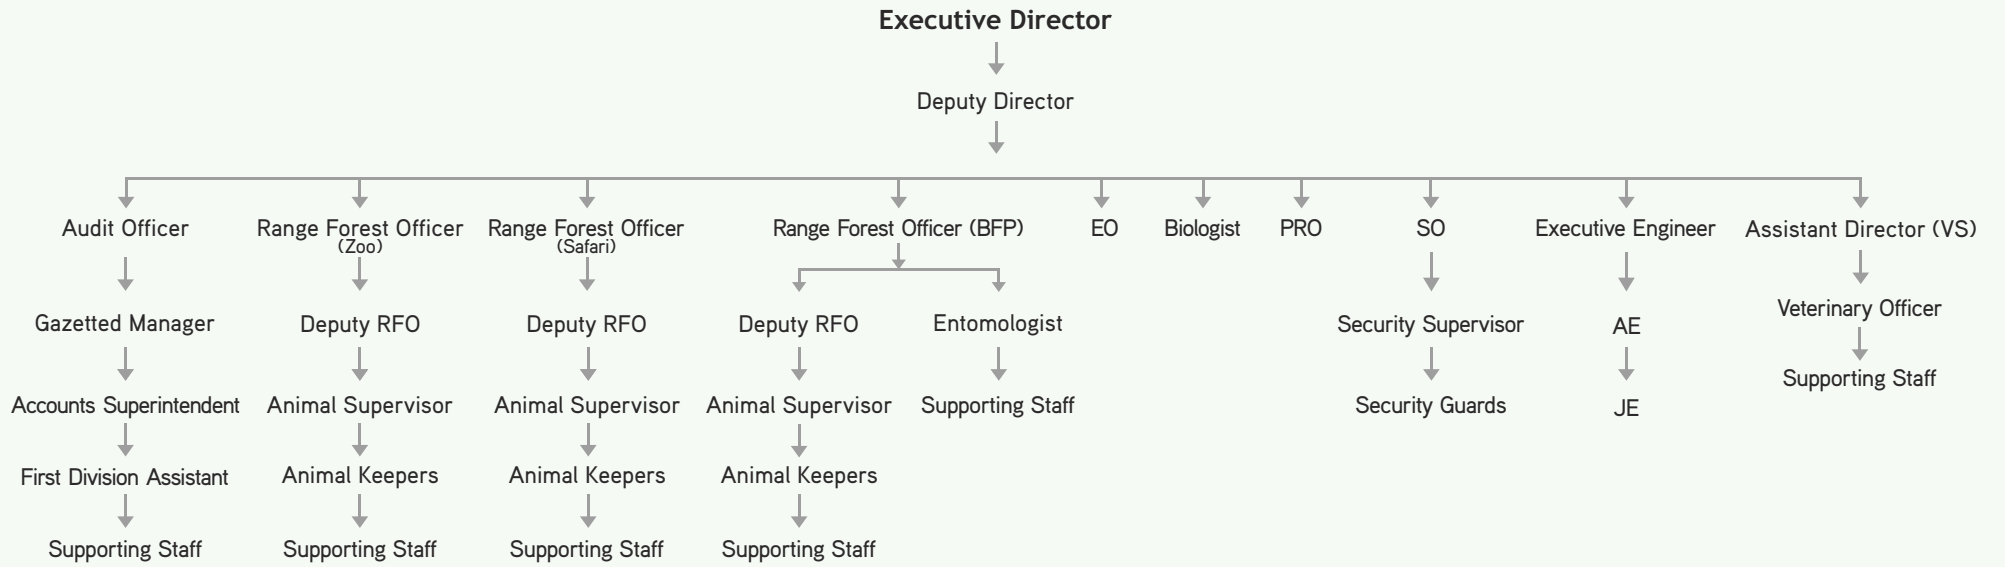

**Sri B.P Ravi, IFS**  
(Additional Principle Chief Conservator of Forests & Member Secretary)  
Zoo Authority of Karnataka, Mysuru - 10

Contact details/Phone number of Operator : 0821-2432881,  
e-mail : ccfmszak@gmail.com

**Distance from nearest :** Airport: 59 km from Kempegowda International Airport  
Railway Station: 24 km from Majestic Railway Station  
Bus Stand: 24 km from Majestic bus station

## 7 Organizational Chart

## 8 Human Resource

Sl. No.	Designation	Number of Sanctioned Posts	Working Strength	Vacancy	Names of the incumbent
1	Executive Director & Chief Conservator of Forests	1	1	0	Dr. Sunil Panwar, IFS
2	Deputy Director & Deputy Conservator Of Forests	1	1	0	Sri. K. Harish
3	Executive Engineer	1	1	0	Sri. H.L.Nagendrappa
4	Assistant Director(VS)	1	1	0	Dr.Umashankar K S
5	Veterinary Officer (VO)	1	1	0	Dr. Vijay Kumar
6	Gazetted Manager	1	1	0	Sri. A.B. Nalawade
7	Range Forest Officer (RFO)	3	2	1	Sri Dinesha K, Sri Mohammed Tahir
8	Accounts Superintendent	1	1	0	Sri Rajanna H
9	First Division Assistant	1	1	0	Sri. Subba Shastri
10	Deputy Range Forest Officer (DRFO)	4	4	0	Sri Hemanth. K.S , Sri. Ashoka H T, Sri Abhishek B G, Smt. Sushma N

7	Entomologist	01
<b>Outsource staff</b>		
8	Ex Army (Security Person)	24
9	Security staff from agency	30
10	D-Group outsourced staff from agency	86

## 9 Capacity Building of zoo personnel

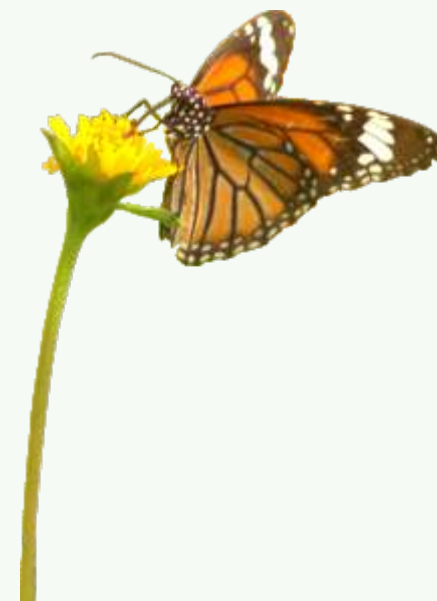

The zoo personnel have been trained to ensure success within the Zoo whilst dealing with animals and the visitors. Some of the employees have attended various programmes outside the ambit of the zoo which is ensuring further success to the zoo and its functioning.

Sl. No.	Name and designation of the zoo personnel	Subject matter of Training	Period of Training	Name of the Institution where the training attended
1.	Kumari Aishwarya KS Sri Suresh Devadiga	CZA online training on Zoo Management Information System (Zoo-MIS) web portal application	23/04/2021	Online
2.	Sri. H L Nagendrappa, Executive Engineer, Sri Dinesha K, Range Forest Officer, Sri Mohammed Tahir, Range Forest Officer, Kum. Aishwarya K S, Biologist Kum. Amala M Anil, Education Officer	Management of Zoo Atal Bihari Vajpayee Zoological Park, Kamalapura	26/08/2021 to 28/08/2021	Atal Bihari Vajpayee Zoological Park, Kamalapura
3.	Kum. Aishwarya K S, Biologist Kum. Amala M Anil, Education Officer	All India Tiger Estimation Assessment Workshop	17/09/2021 to 18/09/2021	Bengaluru Bannerghatta Biological Park in collaboration with Bannerghatta National Park
4.	Sri K Harish, Deputy Director Dr. Umashankar K S , Assistant Director (Veterinary Services) Kum. Aishwarya K S, Biologist	Management of Leopard Safari	04/10/2021	Balasaheb Thackeray Gorewada International Zoological Park
5.	Smt. Vanashree Vipin Singh, IFS, Chief Conservator of Forests & Executive Director	National Conference for Zoo Director's and Veterinarian's - 2021	10/10/2021 to 11/10/2021	Sardar Patel Zoological Park, Kevadia
6.	Kumari Aishwarya KS Sri Suresh Devadiga	Online seminar on Zoological Information System	20/10/2021 21/10/2021	Online
7.	Sri K Harish, Deputy Director, Sri Mohammed Tahir, Range Forest Officer, Kum. Aishwarya K S, Biologist Kum. Amala M Anil, Education Officer	ZAK Zoos Workshop	28/10/2021	Sri Chamarajendra Zoological Gardens, Mysuru

## 10 Governing Council of Zoo Authority of Karnataka, Mysuru

Members	Designation
1. Sri L R Mahadevaswamy	Chairperson
2. Principal Chief Conservator of Forests (Wildlife) and Chief Wildlife Warden	Vice-Chairman
3. Additional Principal Chief Conservator of Forests, Zoo Authority of Karnataka, Mysore	Member Secretary
4. Principal Secretary to Government (Forests), Forest, Environment & Ecology Department, Bengaluru	Member
5. Hon'ble Mayor, Mysore city Corporation, Mysuru	Member
6. Director, Dept. Of Animal Husbandry & Veterinary Services, Vishveshwaraiah Gopura, Bengaluru	Member
7. Director, Institute of Animal Health & Veterinary Biologicals, Hebbal, Bengaluru	Member
8. Special Officer (Banking)/ Deputy Secretary, Finance Dept, Bengaluru	Member
9. Sri Gokul Govardhan. K, Mysore	Member
10. Smt. E. Jyothi Rechanna, Chamarajanagara	Member

## 11 Animal Health Advisory Committee

### A. Date of constitution :

Government Order No: FEE 2003 FWL 2002, Bengaluru.

Dated: 12/02/2004

### B. Members

Members	Designation
1 Executive Director, Bengaluru Bannerghatta Biological Park	Convener
2 Joint Director, Animal Husbandry & Veterinary Sciences, Bengaluru.	Member
3 Head of the Department of Clinical Medicine, Veterinary College, Hebbal	Member
4 Director, Institute of Animal Health & Veterinary Biologicals, Hebbal.	Member
5 Assistant Director (VS), BBBP	Member

### C. Dates on which Meetings held during the year

#### Date: 05-08-2021

1. Long term feeding of beef versus chicken to large carnivores and its consequences
2. FMD outbreak in the domestic cattle of villages surrounding BBBP
3. Display of healthy wild animals at BBBP
4. Need based research work opportunity for the post graduate students from KVAFSU and other universities

#### Date: 29-12-2021

1. Proposal for conducting clinical trials of an inactivated SARS-CoV-2 Vaccine developed at ICAR-NRCE, Hisar (Haryana) in lions/tigers/leopards housed in Indian Zoos (BBBP)
2. Feeding of buffalo meat to the carnivores
3. Creating diagnostic facilities in hospital

## 12 Statement of income and expenditure of the Zoo

Details of Budget Head		Total Budget & APO approved 2021-22 (Rs. in Lakhs)	Actual Expenditure from 01.04.2021 - 31.03.2022 (Rs. in Lakhs)
1	Establishment Charges	1,151.00	1,209.02
2	Staff Advances	1.00	-
3	Office Expenses	26.00	13.41
4	Advertisement and Publicity	20.00	15.45
5	Stores, Tools and Plants	80.00	39.49
6	General Charges	43.00	23.50
7	Zoo Education	15.00	3.07
8	Staff Welfare	113.00	70.47
9	Others (If any)	25.00	6.48
	<b>Total</b>	<b>1,474.00</b>	<b>1,380.89</b>
10	Feed and Fodder	1,100.00	685.92
11	Hospital /Animal Treatment charges [ Vet Care ]	50.00	27.19
12	Animal Collection - Handling and transportation charges	10.00	-
	<b>Total</b>	<b>60.00</b>	<b>27.19</b>
13	Fixed Assets	-	-
14	Garden Development	-	-
15	Civil Work Development (Zoo, Safari, Butterfly Park & Rescue Center)	-	-
	<b>Total</b>	<b>-</b>	<b>-</b>
16	Maintenance Charges	160.00	166.69
17	Garden Maintenance	25.00	1.20
18	Research and Documentation	2.00	-
19	Enrichment of Captive Habitat	5.00	0.53
20	Civil Work Maintenance (Zoo, Safari, Butterfly Park & Rescue center)	436.36	46.78
21	Payment to KSTDC	300.00	474.53
	<b>Total</b>	<b>928.36</b>	<b>689.73</b>
	<b>Sub-Total</b>	<b>3,562.36</b>	<b>2,783.73</b>
22	Spill over Works of 2020-21	160.00	86.70
	<b>Grand Total</b>	<b>3,722.36</b>	<b>2,870.43</b>

Particulars	Approved anticipated Revenue (Rs. in Lakhs)	Actual income 2021-22 Upto 31.03.2022 (Rs. in Lakhs)
1 Gate Collection	1,300.00	2,452.29
2 License Fees	40.00	65.43
3 Sale Proceeds	1.00	0.67
4 Bank Interest	50.00	42.17
5 Other Receipts	40.00	192.73
<b>Total</b>	<b>1,431.00</b>	<b>2,753.29</b>

## 13 Daily feed scheduled of animals

The Animal Health Monitoring committee regulates the food requirement of the animals, whenever required. The food requirement varies from animal to animal and quantity also varies between age groups and sex. Herbivores are fed twice a day whereas omnivores are fed in the morning hours according to their feed requirements. Carnivores are fed in the evening time, except on Tuesdays, which is a starve day to mimic natural feeding behaviour. Quality and Quantity are monitored by the Assistant Director of Veterinary Services and Range forest Officer respectively.

The daily food supplied by the contractor is first weighed in the weigh bridge in the presence of AD(VS) / RFO / Security Officer or their representatives inside the zoo, where CCTV is installed for monitoring the same. Then it is deposited in the kitchen, where it is distributed to all the animals and birds as per the feeding schedule. The same is also monitored through CCTV which is installed in the kitchen room.

	Species	Feed item	Frequency
1	Mammals	Herbivores	Vegetables, concentrates, grains, grass
		Carnivores	Beef & chicken
		Omnivores (Macaques, Toddy cat and Bears)	Fruits, vegetables, grains, chicken and fish
2	Birds	Seasonal fruits, vegetables, concentrates, grains & fish	Daily
3	Reptiles	Crocodiles	Fish
		Snakes	Live feed (Mice, rat snake & rabbit)
		Turtle	Fish
		Tortoise & Iguana	Fruits, greens & vegetables

## 14 Vaccination schedule of animals

Sl. No.	Species	Disease vaccinated for	Name of the Vaccine and dosage/ quantity used	Periodicity
1.	Tiger, Lion, Leopard, Jungle cat	Feline pan leukopenia, feline calci virus, feline infectious rhinotracheitis	Feligen combined vaccine (Feligen) 1 ml	Annual
2.	Tiger, lion, leopard, jungle cat, wolf, dhole, jackal, hyena, Himalayan Black Bear	Rabies	Rabigen 1 ml	Annual
3.	Wolf, Dhole, Jackal, Hyena, Himalayan Black Bear	Canine parvo virus, canine distemper, ICH, Canine Parainfluenza, Leptospirosis	Canine combined vaccine (Canigen) 1 ml	Annual
4.	Deer and antelopes, Elephant, Giraffe, Gaur	Foot and mouth disease; Haemorrhagic septicaemia	FMD and HS bivalent vaccine	Once in 6 months
5.	Tiger, Lion, Leopard	Trypanosomiasis	Surral 1 mg / kg b.wt	Once in 3 months

## 15 De-worming schedule of animals

Sl.No.	Species	Drug	Used Month
1	All Animals	Oxyclozanide	May
2	All Animals	Albendazole	August
3	All Animals	Fenbendazole	November
4	All Animals	Closantel	February

## 16 Disinfection schedule

Sl. No.	Species	Type of enclosure	Disinfectant used and method	Frequency of disinfection
1	All Animals	All holding house, passages	Kohrsalin Th Mopping	Daily
2	All Animals	All holding house, passages	Biokleen Mopping	Daily
3	All Animals	All holding house, passages, visitor entrance	Potassium permanganate foot dip	Daily
4	All Animals	All holding house, passages, exhibit areas	Viracid spray and foot dip	Once a week as prophylactic method.

## 17 Health check-up of employees for zoonotic diseases

- COVID 19 vaccine for all staff and their families.
- Deworming and Vitamin A drops provided to staff children.
- Maternity checkup and vaccination for staff infants
- Pulse polio Immunization for zoo visitors and staff children

## 18 Development works and facilities created

### **Construction of Leopard Safari:**

Leopard safari at BBP is one of the first in Karnataka and has an area of 20ha having natural rocky and hilly terrain with scrub jungle type. Two holding units each with 6 rooms are constructed for the animals as night shelter.

Along with this a small day kraal has also been constructed. A total of 6 leopards belonging to two groups are housed in the safari and are released to kraal area alternatively to allow them to get adapted to the safari area.

**CAMPA works in Rescue Center:** Bannerghatta Biological Park receives a great number of animals rescued from wild due to human-animal conflict, injury, abandoned cubs for lifetime care. To house these ailing and rescued animals, enclosures in rescue center built in 2000 for circus animals was restructured and modified as per current day requirement under CAMPA fund.

**Indira Gandhi Tiger Safari:**

Chain link mesh around tiger safari was constructed 3 decades ago, which has degraded with time due to climatic change. To avoid damage by free ranging wildlife in the safari area damaged chain link mesh was reconstructed and solar fence was replaced

## 19 Education and Awareness programmes

Conservation Education activities are conducted on a regular basis at BBBP to develop empathy on wildlife in the minds of youth and people from all walks of life, who visit the park. Tailor made educational activities and awareness programmes conducted at the park are:

### Chinnara Mrugalaya Darshana

A completely sponsored day programme for government school, specially abled and under privileged children which includes a guided tour of the zoo and butterfly park as well as working lunch at Hill View Restaurant. This programme aims to reduce human animal conflict by educating young minds to work towards nature and wildlife conservation. In 2021-22, a total of 585 students and 69 staff from 10 schools / organizations had visited as part of Chinnara Mrugalaya Darshana.

### Augmented Reality Postcards and Boards

Interactive Boards about Africana Section, postcard about zoo, sloth bear, leopard, tiger, southern bird wing along with videos in English and kannada, information about animal adoption and 3D animals.

### Library for staff children

A dedicated library with an educator was opened during the COVID pandemic to ensure our staff children, especially mahout children do not miss out on their education when schools were closed during the pandemic. Post the pandemic as well, the staff library provides books for children to prepare for competitive exams, activity hub for extracurricular activities such as yoga, sports and cultural activities.

Planting of native species was done in all sections of Bannerghatta Biological Park by the staff. Additionally, Online awareness was conducted along the theme of Generation Restoration through posters sharing the role of wildlife in natural restoration of forest, native species which public could plant to support local wildlife and pledge which public could take to support biodiversity.

21st of June is celebrated as World Giraffe Day to celebrate the tallest animal on the longest day or night. On this occasion, Giraffes in Bannerghatta Biological Park Gowri and Yadunandhan were introduced to a new bamboo puzzle feeder along with this facts were displayed on social media to create awareness.

## Aazadi Ka Amrith Mahotsav

Central Zoo Authority of India identified Bannerghatta Biological Park to host the 16th week of the Aazadi Ka Amrith Mahotsav (28<sup>th</sup> June to 4<sup>th</sup> July 2022), to conduct awareness on a Schedule 1 protected species, the Malabar Banded Swallowtail Butterfly, which is endemic to the Western Ghats. Various online and offline activities were conducted as part of the mahotsav.

Poster created by Bannerghatta Biological Park detailing the schedule of events for the week

Table 1: Report of Events

**Date: 28.06.2021**

**Activity:**

- Virtual inauguration of 'Aazadi ka Amrith Mohotsav' at Bannerghatta Biological Park

**Description**

The zoo inaugurated the Mahotsav online with an introductory video by Smt. Vanashree Vipin Singh, IFS, Chief Conservator and Executive Director, Bannerghatta Biological Park (BBP).

This was followed by the launch of an educational video about the Butterfly Park in BBP and facts and biology about the Species in Focus, the Malabar Banded Swallowtail Butterfly.

The launch video can be viewed on <https://www.youtube.com/watch?v=J62ffN uTOJO> and the educational video can be viewed on

[https://www.youtube.com/watch?v=veGL3 GeN\\_F0](https://www.youtube.com/watch?v=veGL3 GeN_F0) has an online outreach of 343 views so far.

**Date: 29.06.2021**

**Activity:**

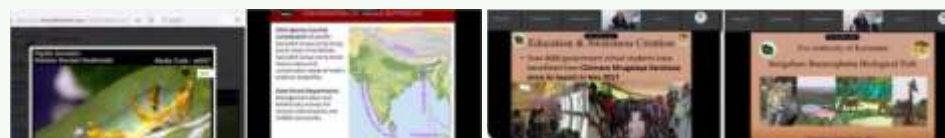

- Quiz Competition

**Date: 30.06.2021**

**Activity:**

- Webinar on Know your Species, Know your Zoo.

**Date: 01.07.2021**

**Activity:**

- Online Drawing and Craft Competition

Education & Awareness programmes

**Description**

An online quiz competition that was open for all was conducted on the biology of the Species in-focus (Malabar banded swallowtail) through Google Forms. 99 entries were recorded for this activity and 7 participants were announced as winners.

**Description**

An informative talk about the biology of the species in focus (Malabar banded swallow tail) was presented by Dr. Krushnamegh Kunte followed by the session on the zoo by Mrs. Vanashree Vipin Singh, IFS, Chief Conservator of Forests & Executive Director on the journey of the zoo, challenges faced, amenities provided and the numerous initiatives undertaken over the years.

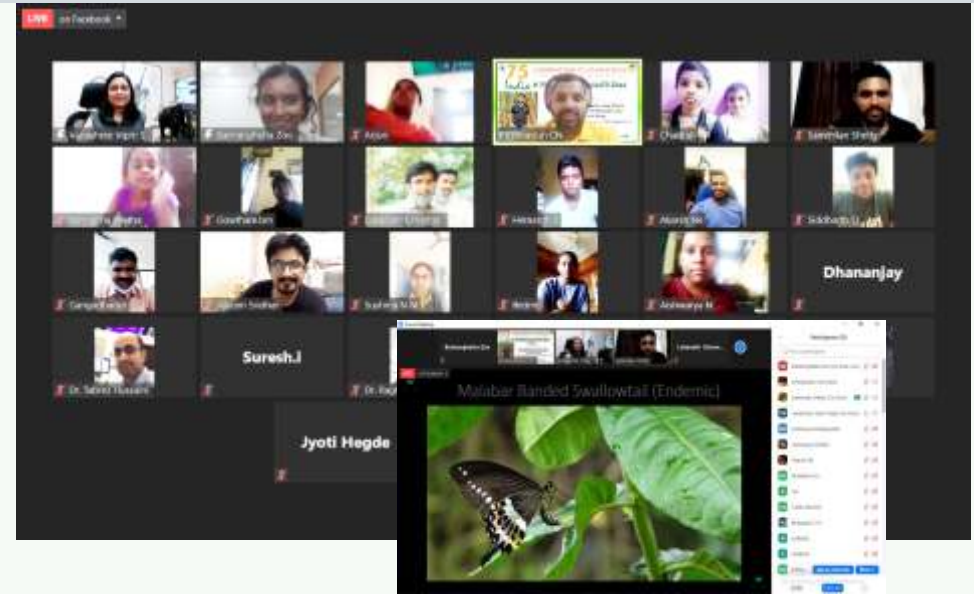

The webinar can be viewed on the following YouTube link:

<https://youtube.be/wPXaDOJm04>  
It has had an online outreach of 407 views so far.

**Description**

An online drawing and craft competition was organized for all age groups, with the theme of Butterfly lifecycle. 33 entries were received for both the competitions and a total of 9 winners were announced in the online closing event.

**Date:** 02.07.2021

**Activity:**

- 5 Online Conservation Talk by Sammilan S Shetty

**Description**

A conservation talk was conducted by Butterfly Expert, Sammilan S Shetty, who owns a Butterfly Park in Belvai, in the midst of Western Ghats. The speaker introduced about moths and butterflies, their role in the ecosystem, interesting facts including identifying a new host plant, *Citrus medica*, for the Malabar Banded Swallowtail Butterfly. The winners of the quiz were announced at the end of the talk.

The talk has been uploaded on BBP's social media page for further outreach. <https://fb.watch/v/CsFJF4ij/> The talk had 53 participants and 886 views on social media.

**Date:** 03.07.2021

**Activity:**

- 6 Photography & Elocution Competition

**Description**

An online Photography and Elocution competition was organized for all age groups. The theme for the Photography competition was "Butterflies in Action" and the topic for the Elocution Competition was "Unique facts about the Malabar Banded Swallowtail Butterfly and why should we conserve them". 48 entries were received for both the competitions and a total of 9 winners were announced in the online closing event.

Date: 04.07.2021

Activity:

7 Closing ceremony

Description

A video highlighting the events conducted throughout the week was uploaded on Youtube. The video also included announcement of winners for the various competitions conducted as part of Azaadi Ka Amrith Mahotsav.

The ceremony can be viewed on the following YouTube link:

<https://youtu.be/u-IE8xpUark>

The total number of hours of outreach activities : 147 hours

Azaadi Ka Amrith Mahotsav continues in Bannerghatta Biological Park!

Bannerghatta Biological Park has taken inspiration from the Azaadi Ka Amrith Mahotsav programme and regular in reach awareness is being conducted for students and visitors.

On 6th July, 150 students from Sri Siddaganga Mutt learnt about the Species in Focus "Malabar Banded Swallowtail" and took a wildlife pledge to protect and conserve natural resources including wildlife as per the Article 51 A of the Constitution of India.

World Snake Day:

A guided tour of the snake park was organized for public on 17<sup>th</sup> and 18<sup>th</sup> July 2021 to create awareness about the different species of snakes, their importance in the ecosystem, myths about snakes and how to prevent snake bite along with Do's and Don'ts. Additionally, informative posters were shared on social media to create awareness for a wider audience.

Venomous			Non Venomous		
King Cobra	Spectacled Cobra	Russell's Viper	Rat Snake	Rock Python	Red Sand Boa
ಕಾಳಿಂಗ ನರ್ಪ	ನಾಗರ ಹಾವು	ರೊಳಕು ಮಂಡಲ	ಕೆಲೆ ಹಾವು	ಹೆಬ್ಬಾವು	ಮಣ್ಣು ಹಾವು

### Hippopotamus Naming Ceremony:

Hippopotamus Dashya's male calf was adopted and named as "Sunny" by Adopters Nikhil Gupta and Neha Aggarwal. Awareness creation was conducted by keepers for the public on hippopotamus facts and their management at Bannerghatta Zoo along with which enrichment was provided for Dashya and Sunny in the form of a cake made of grass, water melon, carrot, banana.

### Tiger Day :

World Tiger Day is celebrated annually on 29th July to raise awareness about the status of the keystone species, the tiger and the theme for this year was "Tigers & Their Habitat". Awareness creation was conducted about the status of tigers in the wild along with display of census methods used to estimate wild tiger population and the importance of conserving its habitat for bio-diversity preservation, which in-turn benefits humans. In addition, the role of zoos in tiger and bio-diversity conservation was highlighted along with ways to minimize human impact on tiger and its habitat by not creating demand for illegal wildlife trade

### World Lion Day :

was celebrated to create awareness about these majestic creatures, interesting facts and the need to conserve flag ship species was explained to visitors. Citizens also contributed towards olfactory enrichment for Lions through Mrugalayakke Shramadhana (Donation of Services at Zoo) where wildlife enthusiasts donated their services by harvesting fodder, which was handed over to the animal keeper.

### Tiger Day :

On spot drawing competition was also conducted with the support of Lions Club of Bangalore Aikya and 55 Students and Staff from SOS Children's Villages India took part in the silent march in the zoo premises to spread the conservation message. Enrichment was provided for the zoo tiger and Tigress Hima was adopted by Mrs. Archana from Bangalore to support ex situ conservation at BBBP

### Snake Bite Awareness Day :

Education programme conducted on Snake Bite Awareness Day with focus on snake behaviour and biology as well as ways to mitigate human snake conflict.

### Elephant Day :

was celebrated on 12th August to create awareness and to conserve these endangered species. On this occasion, Elephant Rita was adopted by Amit Narang from Dubai through online mode.

The celebrations commenced with citizens and wildlife enthusiasts providing their services to the zoo in the form of fodder harvesting through Mrugalayakke Shramadhana (Donation of Services at Zoo). The harvested fodder was fed to the elephants by the mahouts.

Further, the elephants received enrichment of various fruits and vegetables along with browse which were provided in a way which encourages their browsing behavior. Treats were also placed in a pipe, where the elephants had to retrieve it using their trunk.

55 students from SOS Children's village took part in the awareness creation session along with visitors to learn about these gentle giants, their management at BBP, threats they face in the wild and need to conserve these endangered species. Post learning about elephants, visitors took the wildlife pledge and a Elephant Friendship Band, which was made by elephant mahouts families, were tied to the visitors by them. Senior Jenu Kuruba mahout, Motanna, provided the mahouts, kavadis and their children with a elephant necklet, which was also created by the family of the mahouts, as a promise to take care of the elephants as well as to pass on the skills to their children

**International Vulture Awareness Day :**

On the occasion of "International Vulture Awareness Day" which is celebrated on first Saturday of September every year, Bannerghatta Biological Park created awareness on vultures species found in Karnataka, their importance, threat to vulture population and ways of conserving them. We joined hands with Bannerghatta National Park and conducted a signature campaign for public to pledge and join their hands in conserving these endangered scavengers. Field staff Sri. Kumar, Deputy Range Forest Officer and Smt. Suma, Forest Guard from Ramanagara Ramdevara Betta Vulture Sanctuary created awareness in BBP about the unique features, ecological importance and need to conserve vultures.

**Wildlife Week :**

As part of Wildlife Week various in reach and out reach activities were conducted with the theme Conservation to Co-existence: The People's Connect. In reach activities included Green Warrior game where visitors learn about waste segregation through a game and conservation movies were played in the zoo auditorium. A nature walk was conducted to document the local diversity and over 65 citizens participated. Drawing and singing competitions related to the theme were conducted along with interaction with zoo keepers

Outreach activities included awareness creation at Loyola High School and Pre University College for over 300 students on urban human animal conflict. Urban human animal conflicts included highlighting the important role of snakes, how they are attracted to cities mainly due to garbage menace which attract rodents, how slender Loris are used for black magic, demand for two headed snakes because people think it's good luck, need to plant local tree species and allow monkeys, birds to feed on it to further disperse seeds, use of manja ropes during flying kites which can inturn kill or injure birds and leopards being a highly adaptive species and being spotted in cities. Further, a nature walk was conducted in the institute premises to connect students to the biodiversity around them. Photography and Logo competition have also been organized as part of Wildlife week.

## 20 Enrichment Activities

Enrichment is the process of providing captive animals with some form of stimulation to encourage natural species-specific behaviors in them. Enrichment plays an important role in satisfying both the physical and psychological needs of animals, allowing them to make choices and have control of their environment in captivity. Enrichment introduced to animals is changed periodically to stimulate them continuously and to avoid habituation. Animal enrichment is divided into five categories such as environmental, food, cognitive, sensory and social enrichments. Some of the enrichments introduced to animals at Bannerghatta Biological Park were

### Environmental Enrichments:

The physical habitat of the animal plays an important role in its welfare. Meeting animal's physical requirement provides a positive environment for the animal to live in. By mimicking their natural environment in captivity, an enriched habitat allows animals to perform natural behaviors, permit them to be more active and increase their control over the environment and also stimulate exploratory behaviour.

**Feline enclosures** – Felines are mostly nocturnal or crepuscular in nature having large range and being exposed to a variety of stimuli in their natural environment. Most cats being arboreal use a vertical dimension of the habitat for movement, foraging, hiding, resting etc. Similarly in captivity, enclosure were enriched with platforms, hiding spaces, scratch post, vertical and horizontal pathways (branches and logs) to encourage them to climb, leap, move as per species requirement.

**Lion:** Elevated resting platforms for Lions along with the natural rocky habitat of the enclosure.

**Leopard:** Horizontal and vertical pathways with connections to resting platforms, shallow water pond and rocky boulders in the enclosure to imitate their natural habitat and promote species-specific behaviour

**Jungle cat:** Arboreal connection to different parts of the enclosure was provided using branches, bamboo bridge, elevated platforms etc., hollow logs were placed for hiding space, boulders and scratch post were placed inside the enclosure for the animals to exhibit natural behaviour.

**Toddy cat:** Coconut leaves were used to create darkness inside the enclosure to imitate their natural nocturnal environment. Natural tree branches were used to allow arboreal movement, wooden feeding platform with a ramp for access, littering box for females to give birth was also provided to meet animal's requirements

**Himalayan Black bear enclosure:** In wild, bears are good climbers and spend majority of their life on trees. They climb trees & rocky outcrop to forage for food, rest, elude enemies etc. Similarly in zoo climbing structures, swing, and fire hose hammock was provided to keep the animal active. Also food was scattered and places to hide food in different parts of the enclosure was developed to promote exploratory and foraging behavior

**Indian Giant Squirrel enclosure:** In wild giant squirrels are completely arboreal, spending time on tree canopy foraging on a variety of food and taking shelter in the tree holes. Natural tree branches and vines were used to promote arboreal movement of the animal in captivity similar to their wild counterparts. A natural feeding platform, water trough and nest box are also placed for the animal to rest during night.

**Bird enclosures –**

Parakeet enclosures - Natural vines of different thickness were used to create a 3 dimensional space for the birds to perch, also allowing them to gnaw on the vines to keep their beak growth in control.

**Rose ring parakeet**

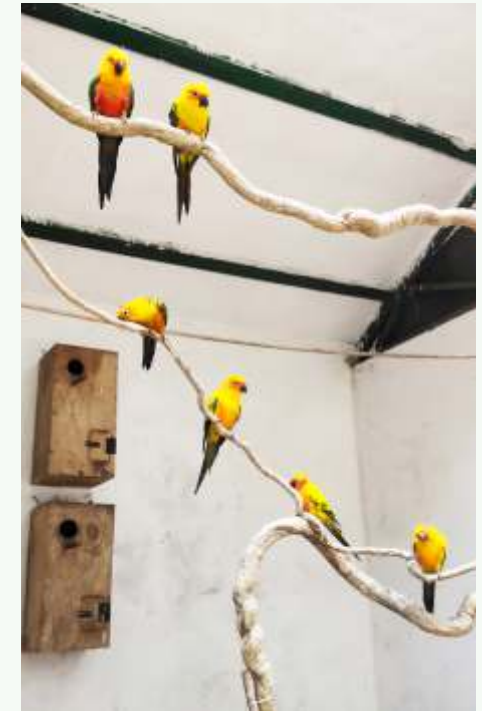

**Cocktail**

**Conure**

**Lorikeet**

**Enrichment Activities**

**Peafowl enclosures:** Shrub like plants are planted in the enclosure to create a natural habitat for peafowl, perches and stumps were placed to promote perching at different heights; sand pit and litter area was created to aid dust bath to get rid of parasites or bugs and to keep the feathers in good condition and promote natural behavior in birds.

**Hornbill enclosure:** In wild, hornbills spend majority of their time on tree tops foraging for food, taking water bath and dust bath occasionally and nesting in the tree cavities. Similarly, in captivity perches of different thickness are placed at different heights which optimize vertical and horizontal enclosure space for hornbills providing more perching opportunities also allowing them to jump back and forth between different levels. Natural perches with small, forked side-branches are provided to allow bird to clean inside their bills. A shallow water trough and sand pit for water bath and dust bath was also provided along with nest box for resting

## Food Enrichments:

Food based enrichment is the most widely used method of enrichment where way of presenting food is manipulated. The aim of food-based enrichment is to prolong feeding times by making feeding more challenging for the animal. A variety of feeding methods and presentation of food encourage animals to work for their food. The ultimate goal is to stimulate and extend the appetitive and consummatory behaviour of an animal.

**Zebra:** A bamboo puzzle feeder with small holes to allow food to scatter when zebra move them around was created to promote exploratory and natural grazing behavior of the animals.

**Giraffe:** Puzzle feeder made of bamboo filled with fruits and vegetables to promote using their long pre-hensile tongue to feed

**Hippopotamus:** Fodder grass, water melon, carrot, banana, apple etc were presented in the form of a cake on the occasion of hippopotamus calf first year birthday

**Elephant:** Food was suspended from fire hose rope and pipe was filled with fruits, jaggery and sugarcane to encourage elephants to use their trunk in pulling out the food

**Himalayan Black Bear:** Fire hose puzzle feeder filled with fruits was suspended in the enclosure to allow bear to use their cognition to get access to the food

**Indian Giant Squirrel:** Flame of the Forest flower was given to squirrel occasionally to imitate their diet in wild.

**Parakeets:** Flame of the Forest flower was given to Rose-ring and Alexandrine parakeet seasonally to imitate their diet in wild.

**Lorikeets:** Branches of Taloor lac (Jalari) tree with flowers were placed inside the enclosure to promote exploratory behavior and nectar foraging as in wild lorikeets

### Sensory Enrichments:

Sensory enrichment focuses on the stimulation of the animals' senses. This can encompass any of the five senses Visual, olfactory (smell & taste), auditory (sound) and tactile (touch). These senses are all important means of communication and are routes of gathering information about animal's surrounding environment. The most common form of sensory enrichment used is olfactory enrichment and tactile enrichment; which utilizes sense of smell and sense of touch. This type of enrichment will normally induce extra scent marking from the animal reaffirming its territory boundaries.

**Hippopotamus:** As part of sensory and play enrichment dead bamboo stick was thrown into the water to promote exploratory and play behavior in hippos

**Indian Grey Wolf:** Overripe papaya and banana were scattered in the different parts of the enclosure as part of sensory enrichment to promote exploratory behavior and scent roll of the animals on fruit.

**Lion:** Ball made of fodder grass was presented to lion cubs as sensory and tactile enrichment to promote exploratory and play behavior in them

**Royal Bengal Tiger:** Chicken scent trail was used to attract Tiger to the suspended play enrichment as part of olfactory enrichment. Other scents were also sprayed in different parts of the enclosure leading to Flehmen response followed by marking its territory by spraying urine.

### Use of Positive Reinforcement Training for ease of management at Bengaluru Bannerghatta Biological Park

**Vanashree Vipin Singh (IFS)**, CCF & Executive Director, **Amala M Anil**, Education Officer, **Suresh I**, Elephant Supervisor, **Dr.Umashankar K S**, Assistant Director (Veterinary Services).

**Abstract:** Positive Reinforcement Training (PRT) involves rewarding an animal for desired behaviours performed as per cues or signals received from the keeper or trainer. Since this process is voluntary, the animal takes part only if it desires to, hence welfare of the animal is not compromised. PRT can be used as a tool to reduce stress during specific husbandry duties and procedures. It can also enrich the animal's experience with its keeper and improve the bond between animal and keeper hence habituating the animal to daily husbandry duties. Infact, if the animal responds well, its welfare improves since PRT is not a stressor and due to protected contact (PC) between the animal and the keeper, the safety aspect is not compromised hence ensuring safe interaction between keeper and the animal. PRT has been used in various animals housed at Bengaluru Bannerghatta Biological Park (BBBBP) for varied husbandry and managemental duties, without the need for causing unnecessary stress.

#### Case Study 1:

##### Positive Reinforcement Training for Behavioural Alteration with Protected Contact for Temple Rescued Elephant Sunder

21 year old, bull elephant Sunder was abused in a temple through constant chaining, injuries caused by beating (Pic 1) and was in solitary confinement. He was rescued and relocated to BBBP in 2014 and exposed to new keepers and environment. Prior to musth, aggressive behaviour was directed towards his keepers and due to being solitary for the first 15 years of his life, integrating Sunder with the elephant herd at BBBP was also a challenge. PRT with PC was initiated using a mixture of cut fruits and vegetables, (Pic 2) while he was housed in a corral to improve the bond between the keeper and Sunder. Gradually, Sunder started to respond to basic commands and allowed the keeper to have direct contact and to monitor him closely for daily health check up.

Sunder learnt to display his foot pads for foot care and sides of his body for general monitoring. His aggressive behaviours such as throwing stones towards the keeper also reduced and this behaviour was altered into a Barter System, where Sunder would return any stones in his enclosure to the keeper, in exchange for treats (Pic 3). Since his bond with the keeper improved, he gained confidence to socialize with the rest of the elephant herd with the assistance of the keeper, who would ensure Sunder would not unnecessarily flee at the sight of other elephants, who would approach to interact with Sunder (Pic 4). Even during musth, when he is housed in his corral, Sunder can be confined to one end of a corral by one keeper using PRT, while other keepers can safely work inside and if any treatments are required such as wound dressing, they can be performed safely from across the barrier. He has also been trained to display his ear for blood draw (Pic 5) and to open his mouth upon command for visual inspection of his mouth and for temperature check. He was also taken to the weigh bridge in the zoo premises, where he was weighed in 2020, for the first time in 5 years since he moved to BBBP (Pic 6).

Pic 1: Injured Sunder in the temple

Pic 2 : PRT with PC using cut fruits and vegetables

Pic 3 : Sunder returning stone for treats - Barter System

Pic 4 : Assistance of keeper to ensure Sunder's integration with the herd

Pic 5 : Display of ear for blood draw

Pic 6 : Weighing of Sunder for first time in 5 years, since rescue

### Case Study 2:

#### Positive Reinforcement Training with Protected Contact for Lion Tailed Macaque

A female Lion Tailed Macaque (LTM) was trained to display her rear to closely monitor the estrous cycle using PRT (Pic 8) & PC between the keeper and LTM, using fruits as treats (Pic 7). Since the bond between the keeper and the LTM improved with PRT, health check could be conducted by observing between the fur for any wounds and ticks (Pic 9) and she was moved to her new enclosure voluntarily by guiding her to the transport cage and shifting her to the new enclosure, without the stress of darting (Pic 10).

Pic 7 : Bonding between keeper and the LTM using fruits

Pic 8 : Monitoring of estrous swelling

Pic 9 : Health check under the fur

Pic 10 : Shifting the LTM to a new enclosure without darting

#### Conclusion:

Positive Reinforcement training can be used as a tool to ease management of wild animals in captivity without compromising welfare and safety of both the keeper and the animal.

## 22 Conservation Breeding Programme of the Zoo

Currently, Bannerghatta Biological Park is selected as participating zoo for King Cobra conservation breeding by Central Zoo Authority. Further we initiate to expand it to other species such as Asiatic Dholes and Grey Jungle fowl.

3	Royal Bengal Tiger Krishna	1	0	0	1	28-09-2021

\* Lions disposed to Lion and Tiger Safari, Tyavarekoppa, Shivmogga

\* Tiger disposed to Kittur Rani Chennamma Mini Zoo, Belgaum

## 26 Rescue & Rehabilitation

Bengaluru Bannerghatta Biological Park (BBBP) being in close proximity to Bengaluru city receives lot of urban wildlife rescued from human-animal conflict and illegal trade. Most of these animals (except for large carnivores and bears) are received and treated in the Bannerghatta Rehabilitation Centre (BRC), which was started by Wildlife Rescue and Rehabilitation Centre (WRRRC) and is part of BBBP. BRC is not open to the public and situated away from the zoo premises.

The rescued animal details, including species, name of rescuer, etc. is entered at BBBP security gate upon arrival and once permission is obtained from the Assistant Director (Veterinary Services), it is shifted to BRC after confirmation of data entry at parking gate.

Upon arrival at BRC, rescued animal's body weight and body condition is examined. Healthy animals are de-wormed and vaccinated, if required. Whereas, injured animals are treated to stabilize their condition prior to any medical procedures. Further relevant diet is formulated for the species and the animals are observed for 1 - 2 weeks to assess their health condition.

In the unforeseen circumstance of an animal death, the animal will be sent to Institute of Animal Husbandry & Veterinary Biologicals (IAH&VB) lab located inside BBBP premises, where the post-mortem is conducted. The deceased animal is burnt in WRRRC premises, in the presence of Range Forest Officer (RFO)/ Deputy Range Forest Officer (DRFO) from Butterfly Park range and mahazar is conducted on spot.

However, animals which are fit for release are certified by the wildlife veterinarian and release request with time, date of release is submitted to BBBP and Bannerghatta National Park (BNP) officials. The above said animals are released back to wild, in a suitable habitat, in the presence of BBBP and BNP officials and release mahazar is conducted at the time of release and submitted accordingly

Arrival of Rescued/ Seized animals at BRC

Animals are weighed and body condition is measured

Species appropriate diet is formulated

Animals are under observation for 1 - 2 weeks

If the animals die during treatment, post mortem is conducted along with mahazar and burnt at BRC

Animals are stabilized by providing First Aid

Release of healthy animals in suitable habitat in the presence of Bengaluru Bannerghatta Biological Park & Bannerghatta National Park staff

**Inventory Form of All Animals Treated at Bannerghatta Rehabilitation Centre- BRC (WRRC)**

## 27 Compliance with conditions stipulated by the Central Zoo Authority

Sr. No	Norm No. under RZR, 2019	Condition	Time period to comply	Compliance
<b>1. General requirements</b>				
1.	10.1(6)	All the residential quarters including the Officer's quarters still has entry from zoo and reported is being shifted outside the zoo Tender process is initiated to for construction of the quarters outside the zoo premises. Veterinarians and night duty staff are still reportedly staying during the night hours on Bear Rescue Centre premises for ensuring the security and medical care of the rescued bears. The staff of hill view restaurant shall discontinue from staying in the premises. This practice should be discontinued. Entire residential colony should be separated from the zoo premises by a boundary wall with a minimum height of two meters from the ground level. entry to the residential colony should not be through the zoo premises.	Immediately	Tender was floated for construction of 24 nos of mahout quarters with estimated cost of Rs. 486.00 lakhs during March 2020. Due to Covid-19, the work could not be taken up. This will be initiated on availability of budget.
2.	10.1(7)	Drainage system in the zoo should be improved by way of contemplated commissioning of the underground drainage (UGD) and the sewage treatment plant (STP).	3 months	The UGD layout plan is ready for execution and will be started on availability of budget.
3.	10.1(9)	All-out effort should be made to prevent entry of dogs in the zoo premises as the same were seen during the visit.	Immediately	All the efforts have been made to prevent entry of dogs in the zoo premises. Necessary gates are placed at the critical places. Now there is no entry of dogs into zoo.
<b>3. Development and Planning</b>				
4.	10.3(1)	Submission of amended Master Plan of the zoo should be expedited	2 months	The amended Master Layout Plan has been cleared in 93rd Meeting of the Expert Group on Zoo Designing of Central Zoo Authority. The compliance to the observations made by the Committee were submitted on 23-09-2020. The copy of the amended Master Layout Plan is yet to be received from CZA.
5.	10.3(1) & 10.3(3)	The existing facility at Rescue Centre area should be handed over to the Wildlife SOS to use for rescued bears from Madaris or any source where other required facility viz medical, quarantine, post mortem facilities should be developed for long term use.	Immediately	Due to large number of wild animal-human conflict in Karnataka, we are housing 40 wild leopards, 3 sloth bears and 2 tigers in the Rescue center presently. We also have aged lions, tigers and bears from safari and zoo, where these animals are not fit for exhibition.

				We also expect more leopards, tigers and sloth bears from the Karnataka Forest Department due to increasing wild animal - human conflicts. Therefore the existing facility of Rescue center will be efficiently utilized for rescued animals. Separate area has been identified near Rescue Center for construction of separate rescue center for rescued bears from Madaris, for which BBP has sought funds from government. Once this is made available, separate RC will be constructed for rescued bears.
6.	10.3(7)	The Bears rescued at BRC from Madaris as well wild should be segregated and regular test for TB be undertaken.	Immediately	Action initiated.
7.	10.3(7)	The facility created for two Tigers from the Born Free, UK is no more now. Any Tigers that are rescued and brought to the BBP should be housed at Rescue Centre area. The facilities created by the CZA for circus animals should be formally hand over to the BBP, Govt. of Karnataka so that same is used for housing rescued Tigers.	Immediately	The facility created for 2 tigers from the Born Free, UK can be utilized for the Safari Tigers breeding purpose.
8.	10.3(7)	The Bears rescued from wild should be housed in different enclosure avoiding mixing with rescued from Madaris.	Immediately	Action have been taken to ensure the wild rescued bears are kept separately, away from the bears rescued from Madaris.
9.	10.3(8)	Irrespective of the varied agencies engaged by the Zoo Operator for administrative convenience, acceptance of any rescued wild animal into premises of the Bengaluru Bannerghatta Biological Park should be reported to the Chief Wildlife Warden of the State as per extant provisions. In the event of acceptance of rescued animal of endangered species, a copy of the Report should be submitted to the Central Zoo Authority.	Immediately	Noted
<b>4. Animal housing, display of animals and animal enclosures:</b>				
10.	10.4(1)	The night shelter of Bear Rescue Centre is visible from the visitor's route it should immediately be camouflaged by planting tall saplings of appropriate species. Alternatively, visitors route should be diverted before reaching Bear Rescue Centre.	Immediately	Action initiated.
11.	10.4(1) & 10.4(3)	In the Herbivore Safari, all the cement structures viz water howdy, feeding turf, resting shade should be camouflaged by appropriate natural materials. It should be ensured that such facilities are not very close to the visitors route.	Immediately	Action initiated.

12.	10.4(2)	The Pulling door, drainage, door locking system, plinth of cell etc, of night-house of under construction Leopard Safari should be done as directed during visit.	Immediately	Action has been initiated and will be attended on priority.
13.	10.4(2)	In case of Hippopotamus enclosure: ·Only one enclosure may be designated for viewing ·The enclosure walls may be camouflaged A sewage treatment plant may be set-up behind Hippopotamus enclosure.	Immediately	·Action initiated ·Walls are camouflaged with elephant grass It will be attended after pandemic decreases
14.	10.4(2)	The reptile section needs redesign keeping in view the following points. ·Viewing of each enclosure should be restricted to 25% of the perimeter ·Visitor circulation should be planned such that movement should be uni-directional ·Vegetation and live hedges shall be planted in the area	Immediately	Attended.  Attended designated path movement.  Necessary action initiated.
15.	10.4(2)	In case of Caiman enclosure ·Additional vegetation shall be added to the enclosure ·A designated viewing area should be demarcated ·Hedge should be planted along the fence Basking sites shall be created	Immediately	Attended. Attended. Planted. Attended.
16.	10.4(3)	Provision of rail barricade should be made in order to reduce damage by wild Elephants in Safari.	6 months	Four railway gates have been constructed
17.	10.4(6)	Adequate width for live hedge be kept and undertake enrichment of arena and cell with appropriate species in Giraffe enclosure and so for the other enclosures.	Immediately	Attended.
18.	10.4(6)	Suitable enrichment options in Avian enclosures should be provided in the from vegetation and perches.	Immediately	Attended.
19.	10.4(7)	In the Rescue Centre, appropriate screening of Tiger enclosures be carried out	Immediately	Screening of Tiger enclosures are placed in the Rescue Center.
20.	10.4(8)	Design of animal enclosures for endangered species either new or proposed for revamp/reconstruction as contemplated in the approved Master Plan should be taken up on priority and obtain approval from the CZA to execute their construction accordingly.	Immediately	Will be attended immediately after Covid-19 pandemic.

20.	10.4(8)	Design of animal enclosures for endangered species either new or proposed for revamp/reconstruction as contemplated in the approved Master Plan should be taken up on priority and obtain approval from the CZA to execute their construction accordingly.	Immediately	Will be attended immediately after Covid-19 pandemic.
21.	10.4(9)	The seating area near Herbivore enclosure should be hedged to mask the enclosures.	Immediately	Action will be taken.
<b>5. Upkeep and healthcare of animals:</b>				
22.	10.5(2) & 10.5(3)	Fodder should not be placed in one place in Herbivore Safari which deprives the young and weaker ones. Fodder should be placed at different sites. Should also hang some to the branches for browsers.	Immediately	Fodder is distributed in different areas to facilitate the young and weak animals to get access.
23.	10.5(5)	Use of turmeric powder as disinfectant may be encouraged instead of chemical disinfectants	Immediately	Action has been taken. Biodegradable environmental friendly disinfectants are being used and usage of chemical disinfectants has been stopped. Turmeric powder is also being used where ever required.
<b>9. Acquisition and breeding of animals :</b>				
24.	10.9(1) & 10.9(4)	Effort should be made to pair the existing female Giraffe	Immediately	Male Giraffe is paired with the existing female.
25.	10.9(11)	Irrespective of the varied agencies engaged by the Zoo Operator for administrative convenience, any release of captive animal from premises of the Bengaluru Bannerghatta Biological Park in to the wild should be as per norms specified by the Central Zoo Authority with requisite prior permission.	Immediately	Animals released into wild are as per the CZA norms.

# SAFARI

The safari section is the most sought after by visitors, from within and outside India. Safari unit is an expedition to observe the free ranging captive wildlife in immersive, naturalistic exhibits in the midst of the natural forest. The landscape is a representation of the adjoining dry deciduous and mixed deciduous forests of the national park which is also home to a wide variety fauna which are often spotted within BBBP safari range as well

The safari is further subdivided into different sections and visitors get to learn and explore the safari area in protected, closed buses and jeeps which are provided by the zoo, in partnership with the Karnataka State Tourism Development Cooperation (KSTDC). An audio guide is also available for visitors in English and Kannada to get a further insight about the safari and to learn about the resident animals

### Herbivore Safari:

The thrill of the safari starts with the Herbivore Safari, which houses mixed species belonging to the Cervidae and Bovidae family, free ranging within an area of 68 hectares, barricaded by rubble wall. This section was developed in 1970's but opened to public viewing during 2002. Species within this area includes Spotted Deer (*Axis axis*), Sambar Deer (*Rusa unicolor*), Nilagi (*Boselaphus tragocamelus*), Gaur (*Bos gaurus*) and Black buck (*Antelope cervicapra*). Various feeding units are located in viewing vicinity from the safari roads to give visitors a glimpse of the co-operating feeding of different herbivore species, as they would in their natural habitat. Frequently, young ones of spotted deer, sambar deer and gaur can be spotted as they are breeding well within this area.

The herbivores can also be spotted drinking water in one of the five, interconnected natural lakes, viz. Deepankere, Chennamanakere, Gowdankunte, Seegadikunte and Gowdanakere, which fill up during the rainy season and sustain even during summer months. Wide variety of avifauna and reptiles such as Marsh crocodiles (*Crocodylus palustris*) are spotted in the water bodies. Common bird species include Common moorhen (*Gallinula chloropus*), Bronze winged jacana (*Metopidius indicus*), Little cormorant (*Microcarbo niger*), Great cormorant (*Phalacrocorax carbo*), White throated kingfisher (*Halcyon smyrnensis*), Brahminy Kite (*Haliastur indus*), Pond heron (*Ardeola grayii*), Black crowned night heron (*Nycticorax nycticorax*), Spotted dove (*Spilopelia chinensis*), Peafowl (*Pavo cristatus*), etc. to name a few. Sambar deer can also be spotted in the middle of the lakes, feeding on freely available grass and during summers they can be spotted in naturally formed slush ponds drenching themselves to keep cool. Rutting season for gaurs gives visitors a mind chilling experience of the gaurs vocalizing.

### **Bear Safari :**

After the herbivore safari, visitors get a glimpse of the natural forest, before they reach the sloth bear safari. Trails of both captive and wild Asian Elephants (*Elephas maximus indicus*) movement are evident in this patch through dung, broken twigs or leaves scattered on the roads and signs of feeding from tree barks

Bear safari is home to around 64 rescued sloth bears (*Melursus ursinus*), out of which majority were previously used as performing bears by Kalandar tribals and others were rescued from human-animal conflict or found as abandoned cubs. This 20 hectare safari area is protected by a dry moat along with solar fence all around the safari and a double gate system to prevent sloth bears from escaping while vehicles enter and exit the safari

The bears are allowed to free range within this area during the day in compatible groups. Watermelon, honey and other seasonal fruits are scattered in the field in the afternoon to encourage foraging behavior and the natural habitat is also suitable for the bears to dig the soil to feed on termites. Natural burrows have also been created by the bears, where they rest during the hot time of the day and return back to their individual holding houses for the night, where they are provided with finger millet porridge, fruits, milk and eggs in the morning and evening. There is animal housing facilities in 05 blocks namely Panchavati, Chitrakuta, Kishkinda, Dr. G.K.V Block and Jambava. The facility created in the Bear Safari is managed in collaboration with Wildlife SOS to house and maintain bears rescued from Kalandars and human-animal conflict

### **Leopard Safari :**

After the bear safari is the upcoming leopard safari, which is currently under construction. Bannerghatta is home to a good population of free ranging leopards (*Panthera pardus*) and highlighting these top predators is vital through display of captive leopards in this safari unit for visitors to learn about these elusive big cats.

## Lion & Tiger Safari:

The next carnivore safari sections are surrounded by chain-link mesh, moat and railway lines used as barricades along with double gate system for entry and exit. First of the carnivores is the lions (*Panthera leo*) and the prides have been grouped according to compatibility. They are allowed in the safari field on a rotational basis and visitors get a glimpse of these majestic group animals interacting and resting close to the natural lake between bamboo clusters.

After the lions' is the white tiger safari which has a water pond, resting platform and trees for scent marking in the field for these leucistic big cats. They are often confused to be Siberian Tigers but are very much Royal Bengal Tigers (*Panthera tigris tigris*) with low melanin pigment.

Across the field, is the last section of the safari which houses the coloured Royal Bengal Tigers. They camouflage extremely well in the long grass, bamboo breaks and create the excitement while visitors search for these endangered big cats within the safari area. They can be spotted scent marking, clawing trees, resting in water or between grass and occasionally surprise visitors with close encounters next to the safari vehicles.

Since the safari units are accessible to free ranging wildlife, the safari closes for visitors at 5:30 pm and no safari vehicles move in this area, allowing free movement of free ranging Asian Elephants, Sloth Bear, Indian Leopard, Sambar Deer, Spotted Deer and Gaur to name a few. All captive animals in the different safari unit are monitored by their keepers for any signs of ill health and the same is reported to the veterinary team, headed by the Assistant Director of Veterinary Services.

Feeding of all carnivores is done indoors in the holding house, after the safari closes at 5:30 pm and feed is weighed and quality is checked before it is provided to all the animals. Tuesday is a starve day for all felines and canids, mimicking their natural behavior in the wild as they do not consume food on a daily basis

Keepers and security personnel assess the mesh and doors of all safari units twice a day to ensure no damages or escape routes or trespassing of free ranging wildlife into the safari. Staff are on a rotational basis in the morning and evening to provide security and to monitor the safari animals round the clock. Range forest officer maintains the infrastructure and before the onset of the dry season, weeding and fire lines are created within the safari range to prevent spread of forest fires.

Additionally, tribals such as Jenu Kurubas and Iruligas are employed and play a vital role in ensuring safety at night, midst the movement of these free ranging animals, within the safari area of BBBP.

The safari is an educative experience for visitors to explore the wilderness of the natural forest and to learn about captive wildlife in its natural habitat, with safety and less intrusion with the hope that they are motivated to adopt green life styles to contribute their bit for nature and wildlife conservation

## 29 Elephant Care Centre

An area of 60Ha. supported with thick bamboo breaks and a water body called Seegekatte, intermitted with grasslands was proposed and approved in the Master Plan as "Elephant Care Centre". Out of the 60Ha area, 49.50Ha area is enclosed with a secured railway barricade fencing with gates wherever necessary and this serves as a habitat for the captive elephants in BBP. This is in adherence to the recommendation made by the CZA. A 0.65Ha emergency Corral is constructed within the enclosure to contain and separate the elephants for medical procedures and also as a musth corral. There are 25 elephants which are housed here in the Elephant Care Center and within the area of herbivore safari, an elephant weaning center has been established.

The elephants housed here enjoy a semi-captive management system where they are cared for by their respective mahouts and kavadis in the care centre during the day and are free ranging in the National Park area in the evening, where they can feed on natural fodder, socialize with wild elephants which are free roaming in the adjoining National Park.

## 30 Rescue Centre

The National Zoo Policy 1998, provides opportunity to all the zoos to function as rescue centre for orphaned, refused, rescued wild animals subject to the availability of appropriate housing and up keeping facilities. This Park has one of the Rescue Centers launched by the Government of India in the year 1999 under Central Zoo Authority for rehabilitation of rescued animals. The park has successfully established the Rescue Center over an area of 17.50 Ha within the Biological Park limits. The Rescue Centre established started functioning from December 2000 as an off-display area.

The Rescue Center has two wings, one each for Lions and Tigers. The lion block is called as L- block having 12 houses, each house consisting of 6 holding rooms connected to kraal of 1500 Sq m., where a total of 72 lions can be housed. Right opposite to the lion block another semicircular housing complex namely T-block of half the size of L-block has been constructed for housing tigers. There are 05 housing units in this block and each of the housing unit has 06 animal holding rooms connected to kraal of 1500 Sq.m, where a total of 30 tigers can be housed. Presently, rescued leopards, tigers & sloth bears and aged animals from zoo & safari are housed in this unit.

Rest of the center is planned to harbor different varieties of trees and plants to create natural surrounding like forest inside the center.

A Bear Rescue Centre, by using a part of the existing Bear Safari with the existing rescued animals has been established at Bannerghatta Biological Park, Bengaluru, with the collaboration of Wildlife SOS, New Delhi, for the benefit of the bears rescued from Khalandars, found stray, injured, orphaned, trapped & sick etc., (which also enables to rescue and rehabilitate more such bears). As on 31-3-2022, 64(22 male & 42 female) rescued bears, are being accommodated in this rescue centre. The maintenance costs of all these Bears are directly met by Wildlife SOS, an NGO. Tigers rescued from various circuses in Europe were accommodated at Born Free Foundation (BFF), Bannerghatta Biological Park, Bengaluru. As on 31-3-2022, a wild male rescued tiger is accommodated in this unit. The maintenance cost of this animal for the year 2021-22 is met by BFF, an NGO

## 31 Butterfly Park

### (A Centre for Research, Training and Education)

BBBP is in the Northern most tip of the Mysore Elephant Reserve, between the Eastern Ghats and Western Ghats. In order to avoid unfavorable conditions during breeding season, butterflies migrate twice a year from Eastern Ghats to Western Ghats and vice versa. Hence Blue tiger, Striped tiger, Plain tiger, Common crow, Emigrants are commonly spotted during this season around Bengaluru Bannerghatta Biological Park. Since this habitat was favorable for butterflies, it was identified as a priority in 2001 and gave rise to India's first Butterfly Park which was established in the BBBP in collaboration with the Government of India and Government of Karnataka. It was conceptualized as an integrated centre that supports conservation, education and research activities with exclusive focus on butterflies as a flagship family of invertebrate conservation. The butterfly park has the following major components:

1. A butterfly garden, to sustain local butterfly population
2. A butterfly conservatory enclosed under a polycarbonate roof
3. A museum and an audio-visual dome
4. Research and captive breeding laboratory
5. Nursery – host plants and nectar plants
6. Host plant garden for rearing caterpillars in lab

The Butterfly Park is spread across 7.5 acres and was inaugurated in 2007. The natural vegetation of the adjoining natural park including shrubs and trees have been retained in this area. A dedicated butterfly trail of 1 km has been established from the entrance of the butterfly park, which guides visitors through the different host and nectar plant garden, which attracts local butterflies, and leads visitors to the three-domed structure consist of a butterfly conservatory, museum, and multi-media center.

Earthen Pots hung for Acoustic Control to avoid eco sound

Entrance to conservatory dome

Butterfly conservatory is a closed landscaped garden under polycarbonate roof and spread over 10,500sqft, having a suitable habitat for butterflies throughout the year with both host and nectar plants. As an additional source of food, diluted honey dipped in cotton is placed on artificial flowers and ripened fruits are also provided. Approximately 10 to 15 species of butterflies and moths, which are bred and reared in-house, are released in this area for visitor viewing. The conservatory is surrounded by metal mesh supported with concrete pillars and roofed with transparent polycarbonate sheets. Inside the dome, earthen pots with small holes are placed along the roof to minimize echo to minimize the disturbance to the butterflies. Appropriate temperature and humidity is maintained to support the flora and fauna, through sprinklers, water fall and air blowers. Dedicated staff also conduct guided tours for visitors to create awareness about the resident butterflies, moths, life cycle and their host plant.

Apart from display and awareness creation to the public about these winged jewels, an off-show research and breeding lab is established to maintain a sustainable population of butterflies, moths and other insects. Dedicated rearing rooms are present for different life stages of butterflies.

Exhaust for Heat Management

Plantation inside Rearing Room

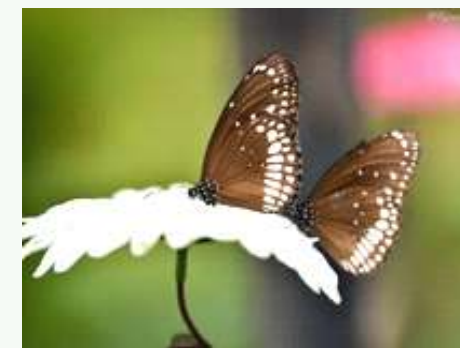

Separate Net for Species wise Breeding

Species wise racks & tray for larva rearing

Fruit Tray

Artificial Flower with diluted honey

Nectar and Host Plants

Butterfly feeding on Nectar Plant

Different species of butterflies along with the necessary host plant and nectar plants are housed in this area to support breeding. The second instar larva are collected and shifted to the larval chamber where sufficient host plant leaves are provided for feeding to ensure maximum numbers survive. The pupa are shifted to a pupal chamber and necessary support is provided to ensure metamorphism and hatching success. Once the butterflies hatch from the pupa, a sustainable population is retained in the lab for breeding and the remaining are released in the conservatory for public display.

Some of the success breeding includes that of the Southern Birdwing, Blue Mormon and Bush Brown to name a few. Through public participation, we aim to create awareness about how our survival is dependant on conservation of these ecosystem engineers.

The conservatory leads to a museum that provides educative information on life evolutionary aspects, unique characters of butterfly and life cycle of locally available butterflies. Also movie about butterflies and moths is played throughout the day at Audio-visual centre in both English and the local language, Kannada.

## 32 Animal Health Care

The zoo has a modern hospital headed by an Assistant Director (Veterinary Service) and supported by veterinary officer, 1 biologist and 2 supporting staff (labours). The hospital has an operation theatre (OT), X-ray facility, in-patient facility and store unit for medicines and equipment as well as a fully equipped ambulance for animal rescues. The Veterinarians have been active in training veterinary interns to get hands on experience and impart knowledge on the skills required to work effectively as a wildlife veterinarian.

The following equipments are available in the zoo hospital :

- ✓ Gaseous Anesthetic machine      ✓ Operation table
- ✓ X-ray unit, digital radiography & Other surgical equipments      ✓ Autoclave

The following equipments are available for restraining of animals :

- ✓ Dist inject projector and pistol      ✓ Pneumatic projectors
- ✓ Blow pipe      ✓ Hand syringe

### Major Disease Investigations carried out during 21-22

	Scientists Involved	Place & Date	Species of animal	Disease investigated / suspected
1	Dr Manjunatha V and Team	Bannerghatta Biological Park, Bangalore	Spotted Deer Sambar Deer	Theilariosis
2	Dr Manjunatha V and Team	Bannerghatta Biological Park, Bangalore	Tigers	Cytauzoonosis
3	Dr Manjunatha V and Team	Bannerghatta Biological Park, Bangalore	Gaur	MCF
4	Dr Manjunatha V and Team	Bannerghatta Biological Park, Bangalore	Star Tortoise	Severe Pin worm infestation
5	Dr Manjunatha V and Team	Bannerghatta Biological Park, Bangalore	Lions	Feline infectious peritonitis

### WILD ANIMAL DISEASE DIAGNOSTIC LAB, BANNERGHATTA - WADDL

BBP has a well equipped pathology laboratory namely Wild Animal Disease Diagnostic Laboratory (WADDL), a branch of IAH & VB headed by a scientist and lab technician. There is a post mortem room where all the carcasses of dead captive animals are subjected for postmortem and pathological investigation to determine the cause of death. After the postmortem, the carcasses are disposed by burning. A bio-medical waste disposal pit was constructed beside postmortem room to degrade and dispose medical (veterinary) wastes.

#### Activities in the WADD Lab

- Clinical Examination of Blood, Serum, Urine and Exudates from the Wild Animals
- Blood Examination : Hematology – parameters including WBC, RBC, Hb, PCV, DLC, Platelets, MCV, MCH and MCHC

#### Mandates of the WADDL , IAH&VB, Bannerghatta Biological park

- Post mortem Examination of Wild Animals, Wild Birds and Reptiles and diagnosis of disease
- Wild Animal Disease investigation and suggestions to take control measures to control the diseases in the BBP, BRC and WRRC
- Bacterial Isolation and identification by cultural, staining and biochemical methods in Wild animal and Birds
- Fungal Isolation and identification by cultural, staining methods in Wild animal and Birds
- Acid Fast staining / Ziehl Neelsen staining for the Acid fast bacteria such as mycobacteria spp and other protozoa
- Confirmation of the Wild animal diseases by PCR technique by using specific primers and suggesting the treatment and control measures
- ABST ( Antibiotic sensitivity assay Test) to know the choice of antibiotic to treat the diseases effectively and same time to avoid the wrong antibiotic usage and to avoid Anti biotic resistance
- Identification of sex of the birds : where the male and female birds looks same, / monomorphic birds by Feather DNA sexing using PCR technique
- Veterinary Forensic studies : species identification of wild animals

Hematology Unit

Urine analysis

PCR Unit

Serology Unit

Microscope Unit

## PROGRESS REPORT OF WADDL FROM APRIL 2021 to MARCH 2022

		Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Total

### 33 List of free living wild animals within the park premises

Bannerghatta Biological Park is on the northern most tip of Mysore Elephant Reserve and hosts a rich population of free ranging fauna. The neighboring, Bannerghatta National Park is connected with Thali Reserve forest, Cauvery Wildlife Sanctuary, MM Hills, BRT Tiger Reserve, Bandipur Tiger Reserve, Nagarahole Tiger Reserve of Karnataka, Sathyamangalam and Mudumalai Tiger Reserve of Tamil Nadu and Wayanad Wildlife Sanctuary of Kerala.

#### Invertebrates

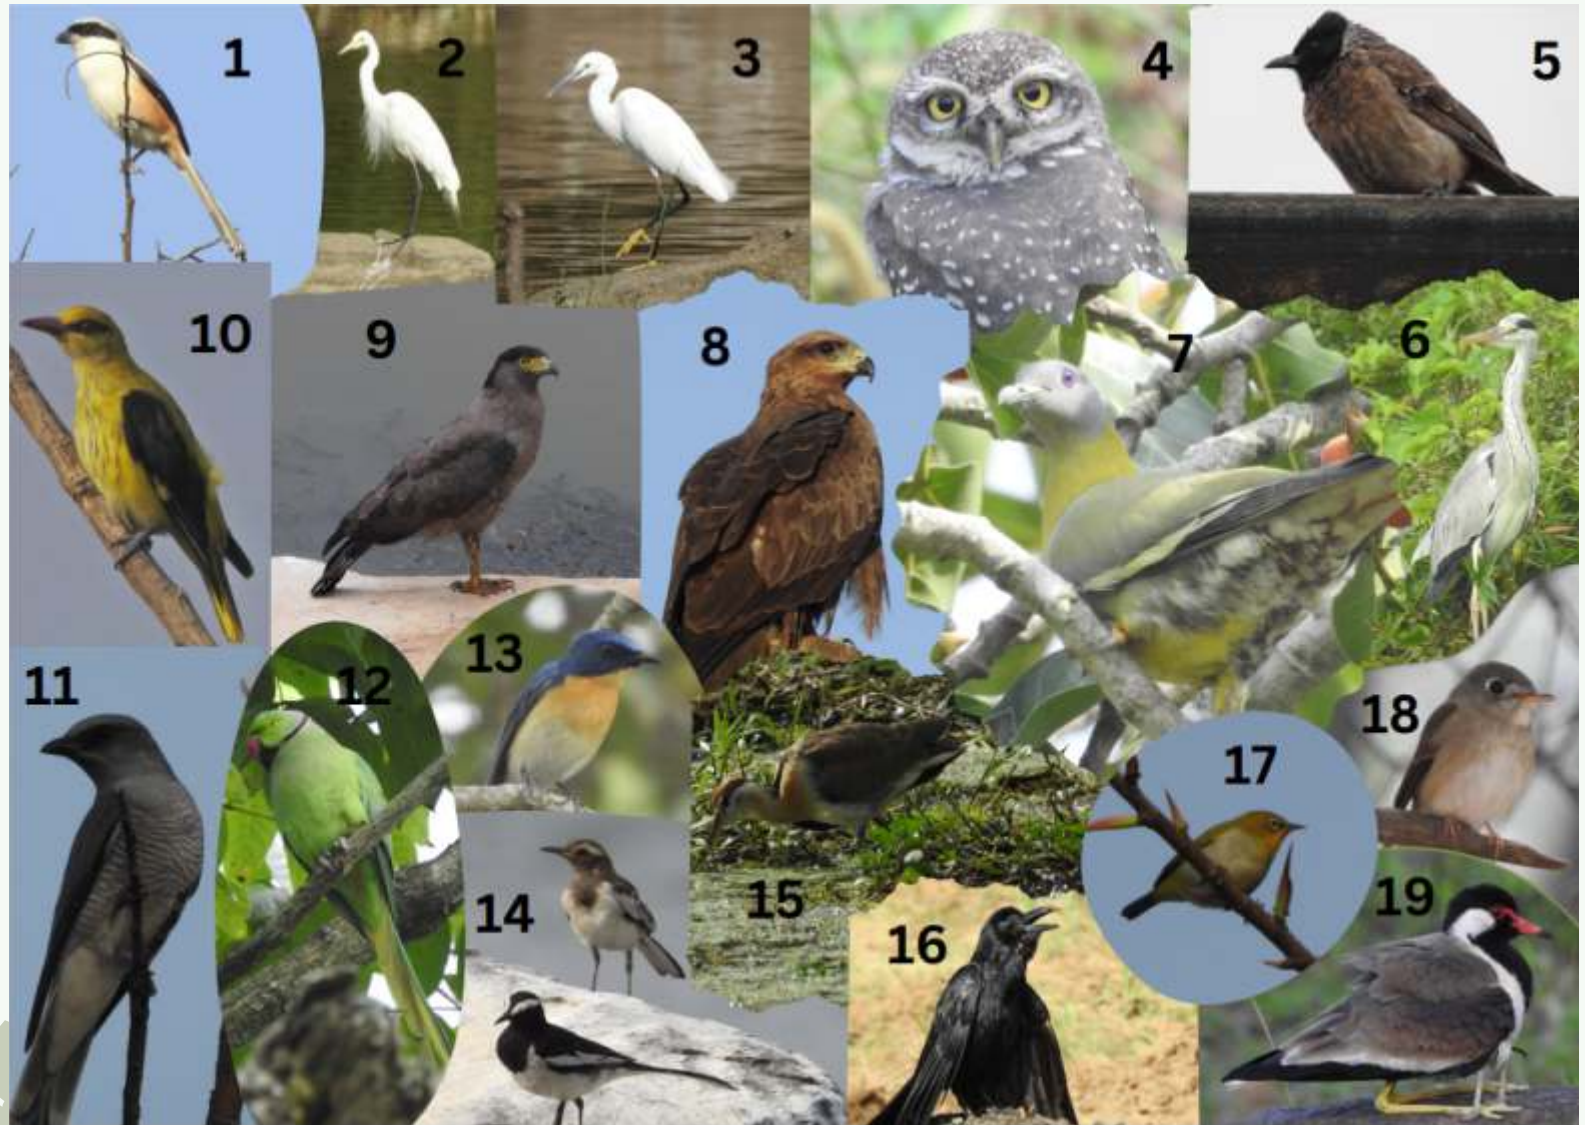

- 1: Golden Orb Spider
- 2: Giant Snail
- 3: Freshwater Crab
- 4: Bella Moth
- 5: Signature Spider
- 6: Indian Owlet Moth
- 7: Monkey Grasshopper
- 8: Blue Mormon
- 9: Dung Beetle
- 10: Wandering Violin Mantis
- 11: Red Bug
- 12: Honey Comb
- 13: Jewel Bug

**Birds**

- 1: Long-tailed Shrike
- 2: Intermediate Egret
- 3: Little Egret
- 4: Spotted Owlet
- 5: Red Vented Bulbul
- 6: Grey Heron
- 7: Yellow-legged Pigeon
- 8: Black Kite
- 9: Crested Serpent Eagle
- 10: Golden Oriole
- 11: Large Cuckooshrike
- 12: Rose-ringed Parakeet
- 13: Tickell's Blue Flycatcher
- 14: Large Pied Wagtail
- 15: Bronze-winged Jacana
- 16: Large-billed Crow
- 17: Oriental White-eye
- 18: Brown breasted flycatcher
- 19: Red-wattled Lapwing

## Reptiles and Amphibians

- 1: Sand Boa
- 2: Peninsular Rock Agama
- 3: Oriental Garden Lizard
- 4: Checkered Keelback
- 5: Star Tortoise
- 6: Tree frog
- 7: Asian Common Toad
- 8: Marsh Crocodile
- 9: Indian Flapshell Turtle

## Mammals

- 1) Spotted Deer
- 2) Bonnet Macaque
- 3) Grey Mongoose
- 4) Barking Deer
- 5) Sambar
- 6) Asian Elephant
- 7) Gaur
- 8) Wild Boar

## Mushrooms

- 1) Golden-Scruffy Collybia
- 2) Trametes sp. - Pycnoporus (Orange Tree Fungus)
- 3) and 4) Coprinellus sp. - Fairy inkcaps
- 5) Phallus sp. - Veiled lady
- 6) Panaeolus antillarum

Bengaluru Bannerghatta Biological Park provides an opportunity to adopt animals on a yearly basis. Adoption covers partial cost of Animal Feed, Maintenance and Veterinary health care with provision for Income Tax rebate under 80G (5) (iv) of Income Tax Act, 1961.

BBBP was a self sustained organization which was run only on gate revenue and we had also adopted a few mini zoos of Karnataka. COVID-19 pandemic had played a great disaster on the zoo where the footfall had reduced drastically, which impacted revenue of the zoo.

With the support of wildlife enthusiasts and campaigning for the animal adoption programme by celebrities such as Sri. Darshan Thoogudeepa, Smt. Anu Prabhakar and Sri. Raghu Mukherjee, BBBP and other zoos in Karnataka received a great surge in adoptions and it has greatly helped us sustain during the pandemic.

During this time, One Day Feeding programme was also initiated, where citizens could also contribute towards the daily feed of the resident animals. We are extremely grateful to citizens for their continuous support towards Ex situ conservation at Bengaluru Bannerghatta Biological Park through the Animal Adoption and One Day Feeding Programme.

### Adoption, One day feeding and donations details for the year 2021-22

Sl. No	Name of the Person/Firm	Name of the animal adopted	Amount Paid
1	Lokanath Patha, Bengaluru	Star Tortoise	2000
2	R Deepa, Bengaluru	Alexandrine Parakeet, Indian Cobra & Star Tortoise	6000
3	Sharadamma Bengaluru	Cockatiel, Zebra Finch & Lesser Whistling Teal	6000
4	Nagamani V, Bengaluru	Indian Cobra	2000
5	Dr Nikhil Moorchung, Bengaluru	Jungle Cat	5000
6	Shikha Awasthi Shrimali, Bengaluru	King Cobra	3500
7	Swarnamayuri Bose K S, Bengaluru	Hog Deer	7500
8	Sukriti Kiran, Bihar	Indian Cobra	2000
9	Abaran Foundation Bengaluru	Tiger Cubs Sanya and Sara	250000
10	Adi Ramanlal, Mahi Ramanlal & Aria S Sood, Bengaluru	Lion Cub Maria	125000
11	Vinod Nair, Bengaluru	Lion Cub Tia	125000
12	Sujatha Palakodeti, Bengaluru	Great Indian Hornbill	5000
13	Adrita Dwivedi, Bengaluru	Hanuman Langur and Staff Welfare Fund	11001
14	Mukund Joshi, Bengaluru	Elephant Calf Ahilya and Lion Cub Akira	343750
15	Arvind Madan, Bengaluru	Grey Jungle Fowl	3500
16	Anupama Parthasarathy, Bengaluru	Hybrid Lion Cub Sher-Yar	50000
17	Navya Kumar, Bengaluru	Indian Grey Wolf	20000
18	Chhavi Sharma, Bengaluru	Amazon Grey Parrot	3500
19	Jevika Shetty, Bengaluru	King Cobra	3500
20	Avinash Shrimali, Bengaluru	King Cobra	3500
21	Sajid Khan, Bengaluru	Lion Cub Sultana	125000
22	Arjun K Murthy, Bengaluru	King Cobra, Rose-ringed Parakeet	5500
23	Roopa Malavally, Bengaluru	Spectacled Langur	10000
