Director's Message

Dr. Sunil S. Hiremath, IFS.,

Nehru Zoological Park, Hyderabad, remains one of India's premier zoological destinations, attracting close to 2.3 million visitors every year and offering an inspiring experience that brings visitors closer to nature. The Park continues to serve as an important centre for conservation, captive breeding, education, research, rescue, and rehabilitation.

The year 2024-25 has been another successful and progressive year for the park. Significant improvements were made to enhance visitor experience and animal welfare, including the launch of the Zoopedia mobile app, online ticketing facility, a newly developed website, and improved digital services to help visitors plan their zoo visit with greater ease. Visitor amenities were further strengthened through better landscaping, spacious lawns, plantation works, improved footpaths, and other beautification efforts that have enriched the overall ambience of the zoo.

The Park also continued to place strong emphasis on animal care, enclosure enrichment, and habitat improvement. Special attention was given to the behavioural and physical well-being of animals through better enclosure management and enrichment measures, while modernised facilities and new additions to the collection helped improve both welfare and visitor interest. The zoo's ongoing breeding, rescue, and rehabilitation efforts also reflect its vital role in wildlife conservation, with 117 rescued animals and birds received between April 2024 and January 2025 for medical care and shelter.

The disciplined and committed zoo staff deserve special appreciation for their dedication to animal welfare, security, rescue operations, and the maintenance of a healthy environment for the animals in their care. This meticulously prepared annual report stands as a testament to the hard work, teamwork, and devotion of the Curator and staff of Nehru Zoological Park, Hyderabad. I wish the team many more accomplishments in the years ahead.

Dr. Sunil S. Hiremath, IFS.,
Director Zoo Parks
Telangana, Hyderabad.

J.Vasantha, IFS

Curator's Message

The Nehru Zoological Park, Hyderabad is committed to the welfare of animals and wildlife conservation. The Zoo plays a vital role in the conservation of rare and highly endangered species. To fulfill the goals set up for the wildlife conservation a dedicated team of Veterinary, Animal keepers, Gardeners, Watchmen, Education wing, Public relations and Research.

The Zoo is housing 196 indigenous and exotic species number over 2000 from roaring Lions to slithering beauties. Zoo has bred many species and catering to the young one. The animal exchange program are taken up with other Zoo within the country and as well as from other Zoo's from abroad there are many other animal exchange programs which are in pipeline.

The zoo team is highly thankful to Shri. R.M. Dobriyal IFS, Principal Chief Conservator of Forest (HoFF), Telangana and Sri Elusing Meru, IFS, Principal Chief Conservator of Forest (Wildlife) and Chief Wildlife Warden, Telangana and Dr. Sunil S. Hiremath, IFS, Director Zoo Parks, Telangana for their constant support and guidance in zoo management. I acknowledge the support of my team i.e Assistant Curators Veterinary staff, Executive staff, Field staff from Animal section, Garden section, Security Section, Education wing, Public relations and Social media staff who have worked together towards the development of the zoo.

J.Vasantha, IFS
Curator
Nehru Zoological Park
Hyderabad

VITAMINS, MINERALS AND FEED SUPPLEMENTS

I. CARNIVORES

1. Calcium Carbonate - 10 gms for each animal + Calcium liquid 10ml
2. Multi vitamin syrup each 10 - 20 ml

II. HERBIVORES

1. Mineral mixture 10-20 gms/day in the cattle feed
2. B-Complex syrup 5-10ml in the water weekly thrice only
3. Romen tonic powders 10-20 gms alongwith feed.

III. PRIMATES

1. Multivitamin capsules 1 No.

IV. BIRDS

1. B-Complex liquid 5-10ml/one liter of water.

V. SUMMER MEDICINES

1. Glucon - D daily in the water
2. Stresswel liquid daily in the water for birds.
3. Thermocare powder daily in the water for all animals.
4. Groviplep powder daily in the water for all animals and birds.

VACCINATION SCHEDULE OF ANIMALS

Sl. No	Date & Month	Activity	Species	Schedule
1	1 st week of January	Infectious Canine Hepatitis (ICH/Leptospira)	All Bears	Once in a year
2	2 nd week of January	Ranikhet Disease (RD) LaSota vaccine	All Birds	Every two months
3	4 th week of February	Foot & Mouth Disease	Large Mega Herbivores (Elephant, Indian Gaur, Giraffe and Thamin Deer)	1 st Time
4	3 rd week of March	Canine Distemper (CDV) CANIGEN 8 DHPPII (7 in 1 vaccine) for Canids	All Canines (Wolf, Jackal, Indian Fox and Striped Hyena)	Once in a year
5	3 rd week of April	Pasturellosis (HS)	Mega Herbivores	1 st Time
6	3 rd week of June,	Enterotoxaemia (E.T)	Elephants, Indian Gaur, Thamin Deer and Barasingha. Indian Gaur, Barking Deer and Thamin Deer	1 st Time
7	2 nd week of July	Anti Rabies Vaccine (ARV)	All Canids (Jackal, Wolf, Wild Dog, Indian Fox and Striped Hyena) prone to transmit rabies.	Once in a year
8	3 rd week of September	Feline Distemper	All Felines (Lion, Tiger, Panther and Jaguar)	Once in a year
9	1 st week of September	Tetanus Taxoide	Elephants	Once in (6) months
10	4 th week of September	Anti Rabies Vaccine (ARV)	Elephants	Once in a year
11	4 th week of October	Foot & Mouth Disease	Large Mega Herbivores (Elephant, Indian Gaur, Giraffe and Thamin Deer)	2 nd Time
12	3 rd week of October	Pasturellosis (HS)	Mega Herbivores Elephants, Indian Gaur, Thamin Deer and Barasingha.	2 nd Time
Sl. No	Date & Month	Activity	Species	Schedule
13	4 th week of December	Infectious Bovine Rhinotracheitis (IBRT)	Indian Gaur	Once in a year
14	3 rd week of December	Enterotoxaemia (E.T)	Indian Gaur, Barking Deer and Thamin Deer	2 nd Time

Remarks:-Vaccination schedule prepared based on outbreaks reported in Nehru Zoological Park, Hyderabad for past experiences.

DE-WORMING SCHEDULE OF ANIMALS

Sl.No	Date & Month	Species
1	2 nd week of January	Birds & Reptiles
2	2 nd week of February	Carnivores, Meerkat
3	2 nd week of February	Omnivores
4	2 nd week of March	Herbivores & Primates
5	2 nd week of March,	Vultures
6	2 nd week of April	Reptiles & Birds
7	2 nd week of May	Carnivores, Meerkat
8	2 nd week of May	Omnivores
9	2 nd week of June	Herbivores & Primates
10	2 nd week of June,	Vultures
11	2 nd week of July	Reptiles & Birds
12	2 nd week of August	Carnivores, Meerkat
13	2 nd week of August	Omnivores
14	2 nd week of September	Herbivores & Primates
15	2 nd week of September	Vultures
16	2 nd week of October	Reptiles & Birds
17	2 nd week of November	Carnivores, Meerkat
18	2 nd week of November	Omnivores
19	2 nd week of December	Herbivores & Primates
20	2 nd week of December.	Vultures

DIS-INFECTION SCHEDULE

Sl. No	Name of the Activity	Proposed date to be conducted
1	Sanitation of night houses with Aciphor and Khursolin 2% solution. Potassium Permanganate (KMNO ₄) foot bath should arrange in front of all night houses specified by the aluminum tray and with sponge.	Everyday
2	Super Bleaching of all Wet moats	For every 15 days (10 th and 25 th of every month)
3	White wash to all night houses	For every three months (10 th to 12 th , January), (12 th to 15 th , April), (12 th to 15 th , July) and (12 th to 15 th , October).
4	Slake lime apply to all water troughs and water feeders	For every three months (10 th to 12 th , January), (12 th to 15 th , April), (12 th to 15 th , July) and (12 th to 15 th , October).
5	Sprinkling of lime and bleaching in the kraals and cages and on foot paths (3:1)	Seasonal activity for every three months (20 th to 26 th) of January, April, June and September of every year.
6	Burning of enclosure during winter season for pest control	Every month 5 th and 6 th (From October to January)
7	Butax spray 2% to all Herbivores kraal to prevent ticks, mites, flees whenever required	Every month 5 th and 6 th (From October to January)

17. HEALTH CHECK -UP OF EMPLOYEES FOR ZONOTIC DISEASES

Two days health camp was conducted at Nehru Zoological Park , Hyderabad for the Zoo employees in collaboration with the Care Hospital , Mozam Nampally Branch.

SEASONAL SPECIAL ARRANGEMENTS FOR UPKEEP OF ANIMALS

I) Summer Arrangements in Nehru Zoological Park, Hyderabad, Telangana

1. Arranged sprinklers and small rain guns in all enclosures
2. Arranged foggers in the Reptile House, Macaws and all Pheasantry and Aviary area in the Zoo Park.
3. Arranged all Bird Cages covered with Thunga.
4. Provided shade net to the Duck Pond, Stork Pond area.
5. Arranged Coolers in Chimpanzee, all monkey area and Carnivore enclosures.
6. Arranged Air Condition, Exhaust Fans in the Nocturnal Animal House.
7. Shady Shelters were provided to all Herbivore enclosures.
8. Provided Summer Fruits like Water Milan, Musk Milan and Citrus Variety Fruits was provided to all Apes, Monkeys, Primates, Birds and Bears.
9. Provided ample of protected water to all animal houses time to time to avoid De-hydration.
10. Provided Glucon-D, Electral Powder, Vitamin C supplements, B-Complex supplements and Thermo Care Liquid in the water to avoid summer stress (Veterinary Section).
11. Kashkash thattis provided to all the Animal House enclosures to avoid direct sunlight exposure on the animals.
12. Atleast 3 to 4 times watering was done on the Kashkash thattis and thunga grass to avoid summer heat.
13. Thunga grass provided on the top of all animal houses to avoid summer stress.
14. All Animal Keepers, Head Animal Keepers, Park Supervisors taken preventive steps time to time to avoid summer stress to the wild animals, Birds and Reptiles etc.

II) The preventive measures against seasonal diseases during rainy season in Nehru Zoological Park, Hyderabad, Telangana

1. Sprinkled of lime and bleaching (3:1) ratio in all kraals and in and around the kraals for (7) days.
2. Cleaned all animal night houses with Aciphor liquid or Khursolin liquid 2% solution.
3. Arranged phenyl foot baths at Main Gate, Service gate and all animal house entries.
4. Removed left over feed, faecal material and grasses daily basis to avoid contamination.
5. White washed to all night houses with Kalika Chunna (Natural Lime) once in 3 months.
6. Bleaching to all wet moats once in (15) days. It is suggested to bleach the moat water with Bleaching Powder for sanitation of moat water in the interest of wild animals health care.
7. Drained of water from wet moats, de-silting of all wet moats and fill with fresh water to avoid water contamination.
8. White washed to all water troughs with slating lime atleast once in a month to avoid fungal infection and water contamination in the drinking water sources.

9. Supplied Anti-bacterial powder to all Herbivores for 5 to 7 days to prevent infections before monsoon season (Veterinary Section).
10. Supplied Antibacterial powder to all Birds in the water for 5 to 7 days to prevent infections before monsoon season. (Veterinary Section).
11. Vaccinated against E.T to all Mega Herbivores in the Zoo as preventive measures. (Veterinary Section)
12. De-wormed to all Herbivores in the Zoo against parasitic infection. (Veterinary Section)

III) Winter Arrangements in the Captive Wild Animals and Birds at Nehru Zoological Park, Hyderabad, Telangana

1. Arranged heaters in all night houses of Carnivores, Primates and Bears.
2. Common Langur enclosures covered with green shade net to avoid winter waves.
3. All the Carnivore night houses covered with gunny bags to avoid winter waves and to protect from pneumonia disease.
4. All Bird night houses covered with 75% roof level covered with green shade net or gunny roll to protect from winter waves.
5. Heaters were arranged in night houses of Small Cat Enclosures and covered with gunny roll to protect from winter waves.
6. All bird night houses provided with nest boxes insulated material in it, particularly in the Macaws and Cockatoos area.
7. Night Houses of Small Monkeys like Squirrel Monkey, Marmoset and Giant Squirrel provided with small wooden boxes with dry paddy straw and partially covered with gunny roll to avoid winter breezes in the night time.
8. Night houses of Reptile House provided with dry leaves, bulbs, small Pots and Dense to protect themselves from winds.
9. Animal house of Mouse Deer Breeding Centre covered outside with green shade net and provide dry paddy straw, wooden hides and Gampas in each animal night house to protect from winter waves.
10. Heaters provided in Night Houses of Tiger Moat, Lion Moat, Primates, LaCONES, Summer House, Small Cat enclosure, Lion Safari Park and Tiger Safar Park.
11. Air condition stopped in Nocturnal Animal House for 3½ months (November, 2024 to Mid February, 2025).
12. All night houses of Carnivores provided with wooden planks to avoid cramps in the foot region.
13. Neem leaves burnt in Elephant Moats, Giraffe night houses to avoid mosquitos and winter breezes.
14. Partial closure of roof level with gunny roll covered in Vulture enclosure and Quarantine ward to avoid winter breezes.
15. Provide Gampas, Matkas in Macaws area and New Aviary to protect themselves from winter breezes and as insulating material for egg laying and nesting.

1. RESEARCH WORK CARRIED OUT AND PUBLICATIONS

Successful breeding of canids in Nehru Zoological Park, Hyderabad:

The Nehru Zoological Park, Hyderabad is pioneering in conservation breeding of rare, endangered, threatened and endemic species in captivity. The Indian Mouse Deer is one of successful conservation breeding programmes in India, which was got massive credibility for reintroducing the animals into wild. NZP, HYD successfully bred several RET species such as Asiatic Lion, African Lion, Bengal Tiger, Jaguar, One-horned Indian Rhinoceros, Indian Gaur, Brow Antlered Deer, Himalayan Goral, Indian Hog Deer, Barking Deer, Sambar Deer, Nilgai, Chinkara, Spotted Deer, Blackbuck, Sarus Crane, Spot-billed Pelican, and Indian Chameleon.

In recent years the NZP, HYD is focused on breeding of canids in captivity and succeed in breeding of rare species of Indian Dhole, Indian Wolf and Golden Jackals, among which Indian Dhole and Indian Wolf were bred for the first time in NZP, HYD.

Breeding success of dholes *Cuon alpinus* at Nehru Zoological Park, Hyderabad: lessons learned

Captive breeding programs play an important role in the conservation of endangered species however; many species struggle to breed in captivity. Therefore, understanding the factors that influence breeding success is crucial in order to develop species-specific strategies to reduce the chances of breeding failure. The dhole *Cuon alpinus* is facing increasing threats in the wild including habitat loss, prey depletion, disease transmission from domestic dogs and human-wildlife conflict thus a species recovery program has been initiated in several Indian zoos through captive breeding programs. Dholes are known to show lower reproductive success in captivity due to limited knowledge about their reproductive biology, nutritional requirement and poor husbandry practices. However, by providing appropriate environmental conditions and dietary supplements significantly enhance the breeding performance of dholes in captivity. The Nehru Zoological Park received two pairs of dholes from Pilikula Biological Park. Unfortunately, the first litter did not survive due to perceived housing conditions. The puppies died after one month of birth due to bone disorder likely attributed by the smooth flooring and lack of sunlight in night houses. In the subsequent breeding cycle, changes were made to the housing conditions for the dholes. A day kraal with natural substrate (sandy soil), abundant sunlight and an artificial cavernous den was used for whelping. Additionally, we improved the quantity of diet and supplements for females during the both pre-partum and post-partum periods to improve the reproductive health. These changes resulted in no pup mortality. Our study highlights the significant knowledge gap regarding species habitat requirements in captivity, particularly with respect to breeding. Our observations provide valuable insights: keeping pups on a smooth surface without sunlight access is not ideal as it affects on their growth and survival. Further future captive breeding programs for dholes and other similar species can use these observations as a reference.

Gestation period and litter size of dholes in Nehru Zoological Park, Hyderabad.

Year	Whelp date	Gestation days	Litter size
2022	15 Nov 2022	61	5
2023	22 Nov 2023	63	5
2024	03 Feb 2024	64	2

Breeding Biology of Indian Wolf (*Canis lupus pallipes*):

The Indian Wolf is listed as Vulnerable in IUCN red list and Schedule -I species IWPA, 1972. In the year 2019, a pair of Wolf (1:1) was received from Arignar Anna Zoological Park, Vandalur, Chennai in animal exchange programme. After a successful breeding of Indian Dholes in NZP, HYD, we attempt to breed for the first time Wolves in adapting the same breeding plan of Indian Dhole. On 2.0.2025 we recorded five pups' births of Indian Wolf with a gestation period of 62 days. A continuous research work is going to study the detailed breeding biology of the species in captivity.

Breeding Biology of Golden Jackal (*Canis aureus*):

Golden Jackals are bred successfully in Nehru Zoological Park, Hyderabad. This year we have recorded three pups' births on 03.05.2025 with an average gestation of 59 to 62 days in our study.

Breeding Biology of Sarus Crane (*Grus antigone*)

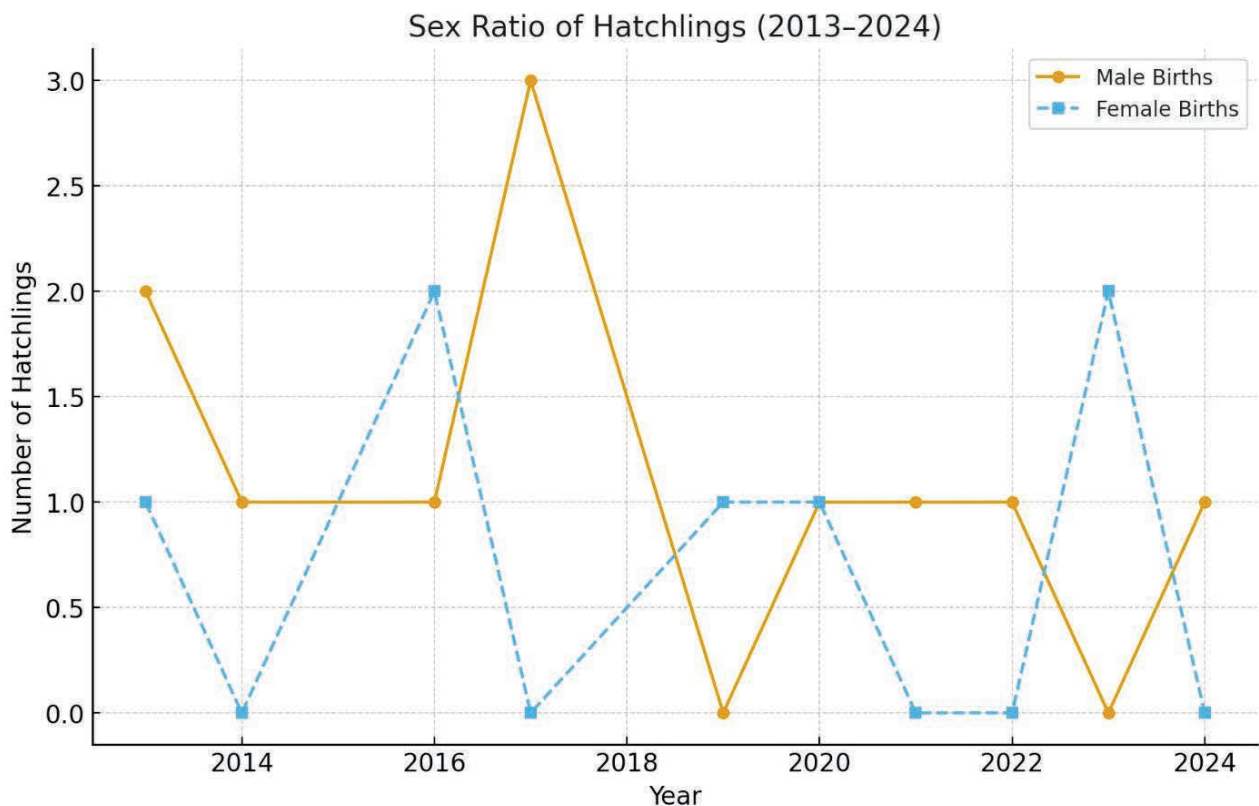

Nehru Zoological Park, Hyderabad, Telangana, India, has been involved in captive breeding programmes, including Red jungle fowl, Grey jungle fowl, Silver pheasant, other water bird species and parrots and parakeets. It proved successful in almost all cases. Here, we attempted to do the same for the Sarus Crane (*Grus antigone*), which is listed in Schedule I of the Wildlife (Protection) Act 1972, vulnerable species on IUCN Red List, Appendix II of CITES, and Appendix II of the Convention on Migratory Species. It is the largest bird in India and the tallest flying bird in the world.

The first breeding history of sarus crane was observed in the years of 2016. After that there was no breeding record of this species till 2019. The research work was carried from 2019 to till date. To successfully breed sarus crane in captivity we have done enclosure enrichment and provided artificial nesting materials every year in the month of August. During 2024 in the month of March-April mating activity was noted. In June they started egg laying and eggs were hatched successfully in the month of July. Breeding season of the species observed in Nehru Zoological Park, Hyderabad is September to October; clutch of the species two eggs and

incubation period of species is 28 to 32 days. During the period, a total of 5 chicks were survived and mortality was noted as 50%. The present study reveals that the mating activity, nesting activity, incubation period, chick survival rate and mortality rate of sarus crane in captivity. In year 2025, we recorded egg laying in the month of June (19 one egg and 21 one egg). However, due to the unfavorable weather condition during the incubation period, eggs are not hatched.

A pair of Sarus Cranes with chicks

CONSERVATION BREEDING PROGRAMME OF THE ZOO

1. MOUSE DEER BREEDING CENTRE:

The conservation breeding program of Mouse Deer (*Moschiola indica*) was started on 03.03.2010 in off-display facility in the Neru Zoological Park with the financial from Centra Zoo Authority. Initially, the program was started with six individuals consisting of two males and four females of captive and wild origins. Owing to effective husbandary practices and health care the captive population showed steady increase. We frequently introduced wild born individuals in the captive breeding program to maintain genetic diversity at the centre and also to avoid inbreeding issues. Further, genetic profiling of all individuals in the centre was conducted and found all individuals are genetically different (heterozygosity). It is one of the successful captive breeding and reintroduction program in India. The reintroduction program was started in the year 2018 with soft release protocols. The soft release protocols were developed using IUCN guidelines for reintroduction of animals. So far 264 individuals have been released in various sites in Telangana.

2 VULTURE BREEDING CENTRE:

The Conservation Breeding Centre for White-rumped Vultures (*Gyps bengalensis*) was established on November 22, 2010, in Nehru Zoological Park, Hyderabad. The initial founder stock comprised of 5 birds (2 males and 3 females) from the zoo. During the 2014-15, an additional 6 vultures (5 males and 1 female) were brought from Sakkarbagh Zoo, Junagadh, Gujarat. As of March 2016, the vulture population had increased to a total of 11 individuals. The vultures are provided with a diet consisting of a whole goat carcass, weighing approximately 20 kg, twice a week. Mating behavior of the vultures was observed and recorded, with two male vultures paired with two females. On December 1, 2012, one egg was laid and successfully hatched into a chick. The process of hatching, incubation, chick birth, and parental care behaviors were documented. Unfortunately, the chick died after 18 days due to a congenital defect.

In the following year (2013-14), only one fertile female laid an egg, which was incubated by the parents but did not hatch due to infertility. The same situation occurred in the next year (2014-15). During the 2015-16, two male vultures were paired with two females, resulting in one pair laying an infertile egg and the other pair successfully hatching a chick. Unfortunately, the chick died after 11 days due to kidney failure and an enlarged gall bladder. Despite ongoing efforts, breeding success has not been achieved as the eggs laid each year are either infertile or the chicks do not survive beyond 18-75 days (3 individuals). Therefore, it is proposed to acquire 10 young pairs to continue the breeding program. Due to old stock, breeding was not success. To continue the breeding program, we acquired 5:5 Long-billed Vultures (*Gyps indicus*) from JCBC Pinjore, Haryana on 27.06.2025. All individual were shifted to main breeding centre at VBC, NZP-HYD, birds were PIT tagged for individual identification. Currently birds are under close monitoring through CC-TV, and pairing is ongoing.

Long-billed Vulture (Gyps indicus)

Ongoing research projects:

Research collaboration with National Institutes and State Universities

- Nehru Zoological Park is collaborates with various institutes for research, particularly in the fields of conservation, animal health and diseases studies
CCMB-LaCONES:
- Utilizing biotechnological, reproductive tools for early pregnancy diagnosis and genetic profiling of animals.
- Ongoing research project on hormonal stress level study of various animals through fecal sample analysis.
- Soon bio-banking workshop will be conducted in NZP, HYD in collaboration with
CCMB-LaCONES
- **AIIMS Bibinagar:**
- Ongoing research project on zoonotic diseases. A comprehensive surveillance
- study on the health and well-being of zoo staff.
- **VBRI (Veterinary Biological & Research institute):**
- Research on animal diseases, disease diagnosis, micro-biology, parasitology, pathology, hematology, toxicology, chemical bacteriology, and feed sample testing, PVNRTU (Vet University), PJTSAU (Agril University), FCRI (Forest College):
- Collaborating for research on animal diseases, micro-biology, parasitology, pathology, hematology, soil parameters, water (heavy metals & chemicals), fodder grass testing, animal behavior and breeding biology.

MORTALITY OF ANIMALS

Sl. No.	Animal Name	Scientific Name	Date of Death	Sex	Reason for Death
1	Indian Hog Deer	<i>Axis porcinus</i>	08.04.2024	Male	Internal haemorrhages, shock and death.
2	Grey Junglefowl	<i>Gallus sonneratii</i>	10.04.2024	Male	Cirrhosis of liver
3	Red Junglefowl	<i>Gallus gallus</i>	15.04.2024	Female	Renal failure and Nephritis
4	Meerkat	<i>Suricata suricatta</i>	21.04.2024	Male	Shock due to traumatic injury and internal haemorrhages.
5	Indian Chevrotain / Mouse Deer	<i>Moschiola indica</i>	21.04.2024	Male	Heat stroke
6	Chinkara	<i>Gazella bennettii</i>	03.05.2024	Female	Severe trauma, haemorrhagic shock
7	Lesser Flamingo	<i>Phoeniconaias minor</i>	04.05.2024	Female	Nephritis
8	Silver Pheasant	<i>Lophura nymthemera</i>	06.05.2024	Female	Trauma caused by infighting
9	Royal Bengal Tiger (White) (Abhimanyu)	<i>Panthera tigris</i>	14.05.2024	Male	Chronic renal failure
10	Sugar Glider	<i>Petaurus breviceps</i>	18.05.2024	Female	Pulmonary shock
11	Galapagos Giant Tortoise	<i>Chelonoidis niger</i>	20.05.2024	Female	Cirrhosis and intestinal impaction
12	Grivet/African Green Monkey	<i>Chlorocebus aethiops</i>	20.05.2024	Female	Head injury
13	Patas Monkey	<i>Erythrocebus patas</i>	22.05.2024	Male	Respiratory failure due to old age complications
14	Leopard Cat	<i>Prionailurus bengalensis</i>	26.05.2024	Female	Hypovolemic shock

15	Honey Badger / Ratel	<i>Meilivora capensis</i>	18.06.2024	Female	Multi organ failure due to changes in vital organs from old age.
16	Ring-necked Pheasant	<i>Phasianus colchicus</i>	20.06.2024	Female	Hepatitis
17	Black crowned night heron	<i>Nycticorax nycticorax</i>	26.06.2024	Male	Respiratory failure and nerves symptoms
18	Indian Chevrotain/ Mouse Deer	<i>Moschiola indica</i>	30.06.2024	Male	Hepatitis
19	Knob-billed Duck	<i>Sarkidiornis melanotos</i>	04.07.2024	Female	Multiple internal injury and shock.
20	Golden Pheasant	<i>Chrysolophus pictus</i>	25.07.2024	Male	Hypovolemic shock and cooxyza
21	Indian Eagle Owl	<i>Bubo bengalensis</i>	28.07.2024	Female	Multi organ failure.
22	Meerkat	<i>Suricata suricatta</i>	29.07.2024	Male	Haemorrhagic Gastritis & Hepatitis.
23	Indain Hog Deer	<i>Axis porcinus</i>	05-08-2024	Male	Multi organ failure
24	Black Buck (Leucistic)	<i>Antilope cervicapra</i>	05-08-2024	Female	Gastro-enteritis
25	Indian Chevrotain / Mouse Deer	<i>Moschiola indica</i>	19-08-2024	Female	Shock and death.
26	Indian Chevrotain/ Mouse Deer	<i>Moschiola indica</i>	20-08-2024	Male	Inernal haemorrhages and shock
27	Indian Muntjac/ Barking Deer	<i>Muntiacus muntjak</i>	25-08-2024	Female	Pneumonia and old age complications.
28	Indian Chevrotain/ Mouse Deer	<i>Moschiola indica</i>	25-08-2024	Male	Internal haemorrhages and shock
29	Fishing Cat	<i>Prionailurus viverrinus</i>	26-08-2024	Male	Icterus
30	Red Junglefowl	<i>Gallus gallus</i>	30-08-2024	Female	Shock from trauma.
31	White Buck	<i>Antilope cervicapra</i>	01-09-2024	Male	Severe Gastro-enteritis.

32	Red Junglefowl	<i>Gallus gallus</i>	08-09-2024	Male	Internal haemorrhages and shock
33	Grey Junglefowl	<i>Gallus sonneratii</i>	24-09-2024	Male	Inicterus (Liver dysfunction).
34	Red Spurfowl	<i>Gallus spadicea</i>	26-09-2024	Male	Hypovolemic shock.
35	Indian Chevrotain/ Mouse Deer	<i>Moschiola indica</i>	02.10.2024	Female	Pneumonia & Enteritis
36	Himalayan Black Bear (Rani)	<i>Ursus thibetanus laniger</i>	07.10.2024	Female	Cirrhosis.
37	Black Buck	<i>Antelope cervicapra</i>	25.10.2024	Male	Hypoxia and respiratory failure due to punctured intercoastal muscles.
38	White Peafowl	<i>Pavo cristatus</i>	26.10.2024	Male	Pericarditis
39	Ring-necked Pheasant	<i>Phasianus colchicus</i>	28.10.2024	Female	Jaundice due to metastasis of tumour.
