1. **Report of the Officer-in-charge**

People For Animals, Wardha animal centre is a non-granted organization established in 1999 with the aim of provide safe shelter & medical treatment for the animals in need. In this financial year we rescued numbers of wild animals, some of them released in their natural habitat. Below data is based on our record book, and given information is true as per my information.

2. **History of the Rescue Centre**

People For Animals (PFA), Wardha was established in 1999 to provide safe shelter, medical treatment and food for the animals in distress, and to relocate them at a later stage. PFA Wardha, Unit were established in the year 1999 by a Group of Friends who was interested in Preservation of fauna and flora in Wardha district.

3. **Vision**

- ✚ Multispecialty Hospital
- ✚ Additional wildlife enclosures
- ✚ Aviary
- ✚ Herpetarium
- ✚ Mobile Ambulance
- ✚ Mobile ICU van for small animals
- ✚ Heavy crane for shifting animals
- ✚ Additional animal care sub centre

4. **Mission**

To provide safe shelter, medical treatment and food for the animals in distress, and to relocate them at a later stage.

5. **Objective**

- Preservation of fauna and flora in Wardha district.
- Protecting animals from conflict with human beings.
- Provide succour and medical treatment to the abandoned and wounded animals.
- Providing shelter for abandoned, wounded and rescued animals.
- Rescuing wildlife animals which are in danger.
- Undertaking tree plantation programs.
- To work in collaboration with Central Zoo Authority, Animal Welfare Board of India and local Forest Department to protect wild animals.
- Organizing awareness programs to educate the villagers and urban population about the importance of conserving nature and not to resort to killing of animals without any reason.

18.	Chinkara Fawn	Milk	50 ml goat milk 6 times in a day.	-	Saturday

14. Vaccination Schedule of animals

Sr. No.	Species	Disease vaccinated for	Name of the Vaccine and dosage/ quantity used	Periodicity	Remarks
	.Hanuman langur, leopard, jackal, civet cat, Indian small civet cat, mongoose.	1.Rabies, 2. tetanus 3. Panlucopania, 4. Feline calci virus, 5. Feline herpes virus, 6. Canine distemper virus, 7. Infectious canine hepatitis, 8. canine parainfluenza, 9. canine parvovirus, leptostirosis.	Rabivac Tricat/Biofel Vanguard plus	Yearly and as per antirabies vaccination schedule recommended	As animal was accepted for treatment and temporary care, vaccination was done according to species if needed

15. De-worming Schedule of animals

Sr. No.	Species	Drug used	Month
	All species	As per identification of parasite after fecal sample examination by consultant veterinarian.	Nil

16. Disinfection Schedule

Sr. No.	Species	Type of enclosure	Disinfectant used and method	Frequency of disinfection
1.	Blue bull	Open enclosure with night shelter.	Fipronil solution (spraying)	Every three months or as directed by consultant veterinarian.
2.	Black buck	Open enclosure with night shelter.	Fipronil solution (spraying)	Every three months or as directed by consultant veterinarian.
3.	Jungle Cat	Closed enclosure with night shelter.	Fipronil solution/deltamethline alternate.(spraying)	Every three months or as directed by consultant veterinarian.
4.	Indian Pangolin	Closed enclosure with night shelter.	Fipronil solution/deltamethline alternate.(spraying)	Every three months or as directed by consultant veterinarian.
5.	Cockatoo	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
6.	African grey parrot	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
7.	Blue-fronted amazons parrot	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
8.	Rose ringed parakeet	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.

9.	Sloth Bear	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
10.	Asian Palm Civet	Closed enclosure with night shelter.	Fipronil solution (spraying)	Every three months or as directed by consultant veterinarian.
11.	Western Hanuman Langur	Closed enclosure with night shelter.	Fipronil solution (spraying)	Every three months or as directed by consultant veterinarian.
12.	Four-horned Antelope	Open enclosure with night shelter.	Fipronil solution (spraying)	Every three months or as directed by consultant veterinarian.
13.	Marsh Crocodile	Small cage with water pond	Chlorine Bleach solution	Every three months or as directed by consultant veterinarian.
14.	Spectacled Cobra	Small cage	Chlorine Bleach solution	Every three months or as directed by consultant veterinarian.
15.	Indian soft shell turtle	Small cage with water pond	Chlorine Bleach solution	Every three months or as directed by consultant veterinarian.
16.	Common rat snake	Small cage	Chlorine Bleach solution	Every three months or as directed by consultant veterinarian.
17.	Indian rock python	Small cage	Chlorine Bleach solution	Every three months or as directed by consultant veterinarian.
18.	Indian Eagle owl	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.

19.	Cattle Egret	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
20.	Woolly necked stork	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
21.	Indian roller	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
22.	Cormorant sp.	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
23.	Red-naped Ibis	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
24.	Yellow footed green pigeon	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
25.	Common Barn owl	Closed small cage.	Benzylamine hydrochloride solution. (diluted solution use for cleaning of cage)	Every three months or as directed by consultant veterinarian.
26.	Indian Peafowl	Closed enclosure with night shelter.	Fipronil solution/deltamethline alternate.(spraying)	Every three months or as directed by consultant veterinarian.
27.	Leopard	Closed enclosure with night shelter.	Fipronil solution (spraying)	Every three months or as directed by consultant veterinarian.

17. Health Check-up of employees for zoonotic diseases

Sr. No.	Name	Designation	Date of Health Check up	Findings of Health Check up
1.	Mahesh Sangatsaheb	Animal Keeper	Date not available (Health check-up done personally by keeper Not by rescue centre)	Negative
2.	Shubham Kangali	Animal Keeper	Date not available (Health check-up done personally by keeper Not by rescue centre)	Negative
3.	Niwal	Animal Keeper	Date not available (Health check-up done personally by keeper Not by rescue centre)	Negative

18. Development Works carried out in the Rescue Centre during the year.

N. A.

19. Important Events and happenings.

Team of People For Animals, Wardha along with Forest department and police department rescued approximately 2 years female leopard. Leopard sparked panic in Wardha city when she strayed inside hospital building of AVBRH sawangi meghe on Monday. This nail biting rescue operation lasted for 6 hours. Around 9 am Forest department and our PFA rescue helpline number received call saying leopard was spotted in hospital. We reached the spot but high wall and fencing of hospital couldn't stopped her from crossing boundaries and she got stuck into ditch the rescue operation was risky as hundreds of people and patients were inside campus area of hospital but we successfully track leopard down and have launched massive hunt for the 'Beast'. we manage to fire tranquilizer dart into it. The leopard was then brought into our rescue centre for further treatment and medical examination which was done by our Veternarians. After 24 hours of observation we released her in its natural habitat with the help of forest department.

We would like to take immense pleasure to share attainment our PFA Wardha unit made. Few days back our unit pull off pangolin wound debridement which is supposed to be central India's first achievement. Irrefutable pangolin is most trafficated animals in the world and it's treatment and captivity management are even more intricate. We are doing almost best handling critical management of pangolin. We request to you appreciate spirit of senior anaesthesiologists of sawangi meghe institute of medical science, who do volunteering work in our shelter and also stepped in to our support and help us throughout process of Gaseous anaesthesia with Isoflurane management. We would also like to share, In past eight months we have successfully rescued, treated and released 5-6 pangolins in Wardha district. We believe recovery of pangolin we treated will surely paid off time and efforts we put in.

20. Seasonal special arrangements for upkeep of animals.

- Provide rolling bottle feeder for peafowl.
- Scattering grains on the ground for peafowl.
- Frozen fruits provided during summer season.
- Provide some plants in herbivorous animals' cage.
- Special arrangement for birds by cover up the entire cage by joot bags to protect from during hot summer season.
- Provide warm light in bird cages during winter season.

21. Research Work carried out and publications

- N.A.
