#### **Zoo Superintendent's Desk**

Rajkot Zoological Park is one of the modern & naturalistic developing zoos of the country and it spreads over an area of 55.33 hectors. Zoo housed number of free living animal species. Old mini zoo known as Aji Dam zoo was set up in February 1992, where Asiatic Lion, Tiger, Leopard, Himalayan Black bear, Black Buck & Crocodile were housed in old fashion enclosures. Since old mini zoo at Aji dam suffered from many drawbacks and did not match the standards set by the Central Zoo Authority, as a follow up of the recommendation of the CZA, the Municipal Corporation of Rajkot took decision and Standing Committee has passed a resolution to set up a new modern zoological park in an extensive area known as "Pradyuman Park" situated about 02 km away from Aji Dam zoo. This area was considered as an ideal site for developing a modern zoological park which is now known as "Rajkot Zoological Park". All the animals were shifted from Aji Dam mini zoo to Rajkot Zoological Park during December, 2009 & Zoo was opened for public on 14th August, 2010.

The Year 2020-21 has been affected by Pandemic Covid – 19 crises all over the world. Due to Covid – 19, zoos also faced major issues in entire world and so Rajkot Zoological Park also. Zoo was closed for visitors from 17<sup>th</sup> March 2020 to 18<sup>th</sup> October 2020. Most of the zoos find financial cut off due to no visitation. Yet Rajkot Municipal Corporation did not allow any financial cut off in Zoo maintenance funds.

On-going improvement and development activities got affected by yet completed in some time. The expected results could be achieved only if contemplated activities are planned in advance, in a systematic way. Yet, Zoo has planned and implemented important activities, animal welfare activities and other projects.

I would like to express my sincere thanks to Dr. U.G.Patel, Veterinary officer, Sri Ravi C. Chauhan, Biologist cum Education Officer, Sri Bhargav P. Bhatt, Curator, Sri Manoj J. Gohel, Veterinary Asst., of Rajkot Zoological Park for preparation of Annual Report. I would like to convey my thanks to all staff of Rajkot Zoological Park and resources provided by Rajkot Municipal Corporation for the development of Rajkot Zoological Park.

(**Dr R. K. Hirpara**) Zoo Superintendent Rajkot Zoological Park

#### **History of the Zoo**

A dam built on river Aji on the outskirts of Rajkot city is a popular attraction for outing and picnic for the people of the city and the surrounding villages. The area adjoining the water reservoir was developed as a public park by the Municipal Corporation of Rajkot. In 1987, a deer enclosure was constructed in the area to provide attraction and subsequently a mini zoo known as Aji Dam, was set up as an adjunct to the public park in February, 1992, where Asiatic lion, Tiger, Leopard, Himalayan Black Bear, Black Buck & Crocodile were housed in old fashioned enclosures. Since Mini zoo suffers from many drawbacks and does not match standards set by CZA, its closure was recommended by CZA after its evaluation.

As a follow up of the recommendations of the Central Zoo Authority and sharing the aspirations of the people of Rajkot, the Municipal Corporation of Rajkot took decision and its Standing Committee, passed a resolution vide resolution no. 750 dated 04/02/1999 to set up a new modern zoological park in an extensive area known as "Pradyuman Park" situated about two kilometres away from the old Mini zoo. It was also decided that the animals from old mini zoo would be shifted to the proposed new zoo.

Rajkot Zoological Park with surroundings...

#### **Establishment of Modern Zoological Park**

Pradyuman Park covers about 55.37 hectare area which is undulating with ridges and valleys, rocky outcrops and well drained, surround by two big lakes - Lalpari and Randarda. This area was considered as an ideal site for developing a modern zoological park to be known as "Rajkot Zoological Park"

The Rajkot Zoological Park, Rajkot was inaugurated by the Hon. Chief Minister of Gujarat State during that time Shri Narendrabhai Modi on 14th August 2010. He has been very keen about the Zoo and its importance for Wildlife Conservation and Education.

Inauguration of Rajkot Zoological Park by Shri Narendra Modi, Hon. Chief Minister, Gujarat State

#### Physical features of the area

An area of 55.37 hectares known as Pradyumn Park located just on the outskirts of the city is hilly and picturesque piece of land surrounded by two big lakes viz., Lalpari Lake and Randarda Lake. The land form is undulating with gentle to steep slopes having concave and convex rocky formations providing natural drainage.

#### Geology, Rock & Soil

Geologically the land mass of present Saurashtra region was once under the sea and during some past geological upheaval, it emerged from the sea bed, having rocky hillocks and plains. The Pradyuman Park area is typical one such hillock with basaltic rocks underneath overlaid with ignite rocks as outcrops and cut up with shallow valleys filled with black cotton soil. It is an ideal site for a modern zoological park where animals can be exhibited in near natural habitats. The area provides enough space for animal enclosures, roads, pathways, shelters, lawns, tree groves and water features. There are exposed rocks and boulders strewn all over the site, which will be utilized for enriching and enhancing the exhibit value.

#### Flora and fauna in the Zoo premises

Zoo is enriched with various types of trees, shrubs and herbs. The natural vegetal cover is sparse and patchy, with bare open areas on rocky grounds and low height trees & shrubs in valleys. Therefore the total area of the zoo has been taken under tree plantation of local species. As a result of this special drive, presently entire area is covered with more than 40,000 trees, shrubs, herbs, creepers and climbers of local flora.

More than 100 free ranging species of birds, 6 species of mammals and 12 species of reptiles have been listed within the zoo premises.

#### **Vision statement**

Instead of the age-old-exhibition and recreation values, zoos shoulder additional responsibility to act as nature conservation centres to further the cause of wildlife conservation. Zoos also have education value, where the visiting publics get an opportunity to learn about nature, natural history, eco-systems, wildlife and their conservation issues to get sensitized to become nature lovers, leading to become conservationist. Zoos are nature's laboratories, offering ample opportunities to carry out research on animal health, nutrition, food, diseases, anatomy, physiology, inter and intra spp. behaviour, breeding biology and to make base line data pool of healthy spp. for clinical treatment of wild animals.

#### **Mission statement**

# "Inspiring Love & Empathy for Wildlife amongst Public and Awareness for Nature Conservation"

#### **Objectives**

- 1. The main objective of the zoo shall be to complement and strengthen the National efforts in conservation of the rich biodiversity of the country, particularly the local wild fauna.
- 2. To support the conservation of endangered species through coordinated Breeding under ex-situ conditions and raise stocks for rehabilitating them in wild as and when it is appropriate and desirable.
- 3. To inspire amongst zoo visitors empathy for wild animals, an understanding and awareness about the need for conservation of natural resources and for maintaining the ecological balance.
- 4. To provide opportunities for scientific studies useful for conservation in general and creation of data base for sharing between the agencies involved in in-situ and ex-situ conservation.
- 5. Besides the aforesaid objectives, the zoos will function as rescue center for Orphaned wild animals, subject to the availability of appropriate housing and upkeep infrastructure.

# Pandemic covid – 19 Precautionary Measures undertaken at Rajkot Zoological Park

The Rajkot Zoological Park had been closed from 17<sup>th</sup> March 2020 for visitors to safeguard the animals, Staff and visitors against Covid – 19. Zoo has taken up all the necessary precautions guided by CZA and government.

Regular hand sanitization of entire zoo staff, regular temperature monitoring, social distancing, tyre bath at entry gate for all types of vehicles, Entire Zoo sanitization, animal sections sanitization and Rapid antigen test for whole staff were carried out. All such measures were under taken regularly at Rajkot Zoological Park.

**Precautionary Measures undertaken at Rajkot Zoological Park** 

#### **Zoo Reopening**

As the Covid – 19 pandemic has affected zoos globally and due to that all the zoos in India had been shut down for visitors for some period of time till Lock Down was there in the country. Even after lock down removed gradually, zoos are closed for some more time as precautionary measures for the safety of staff, animals and visitors. Rajkot Zoo remained closed for almost 7 months from March 2020 to October 2020.

Rajkot Zoological Park was reopened in October 2020 with all the necessary precautionary measures and guideline given by CZA and Government.

From October 2020 to March 2021 total 2,13,662 visitors has experienced the zoo visit at Rajkot Zoological park.

#### **Online Webinars**

#### **Education and Awareness programmes during the year**

Rajkot Zoological Park had organized an online webinar on the occasion of World Environment Day 2020 as zoo was closed for visitors. This webinar was organized for students and faculties of Marvadi University, Rajkot.

The theme for the webinar was "TIME FOR NATURE" – Students are environment protectors and how they can contribute in nature conservation. The webinar was taken by Dr. R.K. Hirpara, Zoo Superintendent, Rajkot Zoological Park and Mr. Ravi C. Chauhan, Biologist cum Education Officer, Rajkot Zoological Park.

# **Environmental and Feeding Enrichment for Animals**

#### **Conservation Breeding Programme of the Zoo**

Rajkot zoo is selected as a participating zoo for planned coordinated conservation breeding program of Asiatic lion and has succeed in breeding this spp. At Rajkot zoo total 49 Asiatic lion cubs born Till 2020. Thus there is good pool of knowledge and experience of breeding of Asiatic Lion which will be continued as part of zoo under development. For this facility existing old mini zoo at Aji Dam has been maintained as breeding centre for Asiatic Lion. Animal Exchange was done with Hyderabad Zoo to change the bloodline of Asiatic Lion with and exchange of One female A.Lion sent from Rajkot Zoo to Hyderabad Zoo and One Male A.Lion received from Hyderabad zoo.

#### **Important Events at Rajkot Zoological Park**

#### **Continues Second year Birth of Indian Wolf at Rajkot Zoological Park**

Rajkot Zoological Park has one pair of Indian Wolf (Canis lupus palipus) and previous year born wolf pups 03 male, total population 4:1 Indian wolf. The breeding pair have created natural den in their exhibit only. In the month of December 04 pups were observed inside the den. All are healthy and both male and female taking proper care of pups. In the month of January one pup died which was male. The other 03 pups are healthy and active in parental care. Mother observed to be remaining inside the den most of the time and only came out during night. Wolf pups were also observed during night through CCTV camera placed in exhibit area and also in night shelter.

At present total 4:1:3 healthy Indian Wolf available at Rajkot Zoological Park. Pups and breeding pair observed continuously through CCTV and with physical observations for monitoring.

**Wolf Pups**
