Director's Note

I am pleased to present the Annual Report of the National Zoological Park, New Delhi for the FY – 2024-25. The present day National Zoological Park, New Delhi made its humble beginning as the Delhi Zoological Park with 188.62 acres of area, in the year 1959. The main objectives of the National Zoological Park are to create awareness amongst the people about the protection of the endangered wildlife, Conservation Education, Research and provide a healthy and inexpensive recreation to people of Delhi and its neighbouring areas.

This year featured several significant initiatives. A prominent event was the highly successful Wildlife Week, observed from October 2nd to 8th. Under the inspiring theme of "Wildlife Conservation Through Co-existence," this annual event truly thrived. We saw substantial engagement, with 1,411 students participating in 13 different activities and competitions. The week concluded with a prize distribution ceremony, where dignitaries from the Ministry of Environment, Forest and Climate Change (MoEF&CC) recognized these emerging conservationists, reinforcing their commitment to the natural world.

Beyond Wildlife Week, our dedication to environmental cleanliness was strongly demonstrated through the "Swachhata Hi Seva" campaign 2024, which ran from September 17th to October 2nd. This initiative highlighted our ongoing commitment to a cleaner and greener environment.

During the year 2024-25, we formally registered 19 interns, who gained valuable experience contributing to our conservation efforts. Additionally, 13 registered volunteers dedicated a total of 47 working days. Their crucial support greatly aided the zoo, while also providing them with valuable learning experiences.

The National Zoological Park is a vital sanctuary for wildlife conservation and promotion. The dedication of our employees and animal keepers forms the very foundation upon which this park stands. Recognizing their critical role, we consistently organized training programs for the efficient care and conservation of animals. Furthermore, our staff members were sent to other zoos across India to acquire practical knowledge and enhance their skills.

We sincerely appreciate the hard work, cooperation, and contributions of all zoo employees and every section involved in compiling this Annual Report. Their collective efforts are invaluable to the National Zoological Park's continued success.

Dr. Sanjeet Kumar, IFS
Director
National Zoological Park,

History of the Zoo

The National Zoological Park, New Delhi is one of the premier zoos of the country. It is popular destinations in the Delhi - NCR discharging its responsibility to help people appreciate, understand nature and wildlife better. The park is now more than **Sixty years** old and it's about time to review the facilities and services provided to general public. The National zoological Park should be a top of the mind educational and recreational facility in the region. It is in this context the vision and mission have been redefined as under:

In India, at the time of independence, there was no zoo in Delhi. The 'Indian Board of Wildlife (now National Board for Wildlife) which was constituted in 1951 laid stress on establishment of zoos in larger cities of the country in its first meeting in 1952.

Accordingly, an ad-hoc committee with some prominent nature lovers of Delhi, including Smt. Indira Gandhi, was constituted under the Chairmanship of Chief Commissioner, to formulate a proposal for establishment of Zoological Park for Delhi. Mr. E.F. Bowring Welsh, Secretary of the Society for Prevention of Cruelty to Animals was appointed as its Secretary. The committee met on 9th September, 1953 and approved the site between Purana Quila and Humayun's Tomb for the purpose. It also prepared an outline of the project.

Central Government was to provide necessary finance and get the project executed through Delhi state Govt., however express and its inability to undertake the scheme and suggested that the park be developed by Central Government, and shall be handed over to them in running condition to the Delhi Government. Since wildlife was managed by the Forest Department, first implementing official was drawn from Forest Service. Shri N.D. Bachkheti, an Indian Forest Service Officer of Uttar Pradesh was appointed as Superintendent on 1st October 1955.

Major Weinmann, the then Director of Ceylon Zoological Garden, Colombo was invited to help draw a detailed plan for development of the Park. He submitted a report along with a preliminary plan. As he was not available for continued consultations, it was decided to seek the services of Mr. Carl Hagenbeck, owner of the

famous Animal Park at Hamburg, West Germany, who gave the idea of open moat enclosures.

The Park was formally inaugurated on 1st November, 1959 by Shri Punjab Rao Deshmukh, Hon'ble Minister, Government of India. This Park was initially known as Delhi Zoo. In the year 1982 it was given the status of the National Zoological Park with the idea of it being the model zoo of the country.

Here at the National Zoological Park, birds and animals live in an environment that in many ways resemble their natural habitat. The National Zoological Park not only provides a home for endangered species, but also helps them to breed in captivity. Eventually they may once again thrive in the wild.

Vision

In twenty-year, time of Master Plan period the visitor experience will be far more rewarding and enriching than it is today. Quality of animal care exhibits, conservation education and sustainable management practices will take the zoo to the next level. The 'National Zoological Park' (NZP) will truly be the Nation's Zoo in terms of state of art facilities and management practices. It will be role model in the country for other zoos to seek guidance and inspiration.

NZP shall also endeavour to breed endangered species through organized breeding programs for the purpose of display, exchange and rehabilitation in wild. NZP will be a top of the mind educational and recreational facility in the region.

Mission

- (a) To generate awareness and compassion in the society towards wildlife and to garner their support for the national conservation effort.
- (b) To play an effective role in reducing man animal conflicts in urban landscape.
- (c) To play an effective role in species preservation.

Objectives

Objective of the park was to provide a healthy and inexpensive recreation to people of Delhi and its neighbouring areas. It was further realized that, conservation education and research on Wild animals can best be imparted through the zoo.

About us

National Zoological Park is a subordinate office under the Ministry of Environment, Forest & Climate Change, Govt. of India.

Health Check-up of employees for Zoonotic Diseases

As part of the *Swachhata Hi Seva* campaign, the **National Zoological Park** organized a **health check-up camp** on **1st October 2024** in collaboration with **Lok Nayak Jai Prakash (L.N.J.P) Hospital**. The camp was conducted for the sanitary staff, garden staff, store staff, and security personnel, recognizing their vital contribution to the upkeep and smooth functioning of the zoo. The initiative aimed to promote the well-being of frontline workers who play a crucial role in maintaining cleanliness and order.

Health camp held on 01.10.2025

Development Works carried out in the zoo during the FY – 2024-25

List of completed work:

Minor work

S. No.	Name of Work	Estimated Cost
1	Repair / Renovation of Residential Quarter No. C-3, at National Zoological Park, New Delhi.	7,91,284
2	A/R & M/O of Residential, non-residential building of NZP, New Delhi. (SH: - Labour for Day- To-Day Maintenance for Civil and Electrical Work)	1562649
3	Renovation of Store of Administrative block & toilet at NZP, Mathura Road, New Delhi. (SH: - Providing E.I & Fans, Air Conditioners)	856117

B) Providing Path for karal of Sloth Bear Enclosure Beat No. 04, Steel Drain jali near Goral Enclosure and Covering of one roof Squeeze cage with stainless steel at Quarantine Ward, repair of dustbin wall & other misc. civil works at National Zoological Park, New Delhi. 1785540
- 5** A/R & M/O Residential buildings, Non-residential 23969765

	buildings, enclosures and other areas of NZP, Mathura Road, New Delhi.	
6	Repair/renovation of Joint Director Residence at National Zoological Park New Delhi.	1304642
7	Replacement of damaged bamboo railing with M.S. Pipe railing and other misc. civil works of Beer Enclosure Beat No. 05 at National Zoological Park New Delhi.	891291
8	Replacement of damaged bamboo railing with M.S. Pipe railing of Sloth Beer & Himalayan Beer Enclosure Beat No. 04 at National Zoological Park, New Delhi	907022
9	Construction of Office room near Conference Hall in Director office at National Zoological Park, Mathura Road , New Delhi.	681987
10	Construction of karal at Beat No. 10 at National Zoological Park, New Delhi	903422
11	Providing & fixing chain link fencing for Deer Enclosure at National Zoological Park, New Delhi.	892510
12	Providing and Installation of Water Bubbler and Aerating aquascapes at pond near Amphitheatre of National Zoological Park, New Delhi.	725065
13	(A) Construction of Posts for fencing for Indian Elephant Enclosure at National Zoological Park, New Delhi. (B) Providing and Fixing Electric Fencing post for Indian Elephant Enclosure at National Zoological Park, New Delhi.	1805638
14	Providing & replacement of damaged Hi-finition CCTV Cameras in National Zoological Park, Mathura Road, New Delhi.	772293
15	Water Proofing Treatment of Moat for Tiger Enclosure Beat No. 08 at National Zoological Park, New Delhi.	908167
16	Providing & erection of 5.0 Mtr. Long octagonal poles with street light and feeder pillar in National Zoological Park, New Delhi.	865010

Replacement of damaged bamboo railing with M.S. Pipe railing of Royal Bengal Tiger Enclosure Beat No. 05

Celebration of Wildlife Day at the Newly built Amphitheatre

Stainless Steel Railing and Red Sand Stone on Cement Concrete Path at Left side of main entry gate

Summary Status of developmental activities Major works done in 2024-2025

Capital Head

Completed work:

- Peripheral boundary wall
- 12 Numbers of staff quarters
- Barking Deer / Zebra enclosure
- Renovation of Bird breeding cells

Ongoing work:

- Construction of Hyena Night cell and kraal
- Construction of eight number of night cell and Kraal for Tiger
- Construction of four number of night cells with kraal for Gaur
- Construction of sump with drainage line in staff quarters

Revenue Head

- Annual Repair and maintenance of residential and non residential buildings
- Renovation of animal enclosures – Sloth bear, Himalayan Black Bear, Royal Bengal tiger, Deer enclosure, Indian Elephant, Otter, Aviary
- Renovation of toilets and drinking water points
- Construction of Amphitheatre
- Construction of ramp at exit
- Installation of water Bubbler and Aerating aquascapes
- Repair and renovation of Souvenir shop
- Removal of damaged standoff barrier

Education and Awareness Programme during the Year

Zoos are living educational institutes that impart informal education and inspire empathy for wildlife. They foster understanding and awareness about the need for conservation of natural resources, besides maintaining ecological balance. Now, zoos have also become places for instinct development for wildlife and the environment. The education section of this park helps to make a visitor's experience meaningful and rewarding. This section is responsible for the planning and execution of educational programs and the production of zoo publications such as guidebooks, guide maps, brochures, leaflets, etc., as well as all informal education-related work.

EVENTS

In FY 2024-25 various events were organized to generate awareness among the students, visitors and local people about the wildlife, conservation and the protection of the environment. The details are as under:

VAN MAHOTSAVA 2024

Director of NZP plants a tree to inaugurate Van Mahotsav

Celebrating the noble cause of planting trees in the honor of mother proposed by Hon'ble PM, NZP celebrated the week by planting more than two hundred of plant saplings of different species. The campaign was carried forward by Sh. Jitender Kumar, DGF&SS, MoEF&CC, Principle Secretary to PM and officials from PMO and dignitaries from other Ministries by planting the trees.

SUMMER VACATION PROGRAMME 2024

To effectively utilize the summer break for students, the National Zoological Park (NZN) collaborated with the National Museum of Natural History (NMNH) to present an engaging Summer Vacation Programme in 2024. This initiative, commencing on May 22nd and culminating on World Environment Day, June 5th, aimed to conduct a mass mobilization campaign in support of Mission LiFE, focusing on environmental protection and preservation. The programme was structured into two sessions, the first spanning from May 22nd to 28th and the second from May 29th to June 4th, attracting over 250 participants from across Delhi. A diverse range of activities, including painting, poster making, debates, nature walks, and quizzes, was organized to ensure engaging and interactive sessions. Students also gained valuable insights through their interactions with professionals like doctors, teachers, and bureaucrats. The programme acknowledged the efforts of participants through the distribution of prizes, gifts, and certificates to both winners and all attendees.

World Environment Day participants from different activities

Craft made by the participants

INTERNATIONAL TIGER DAY

On 29th of July, 2024 International Tiger Day was celebrated at National Zoological Park with the participation of school students. The event included a keeper's talk at the tiger enclosure featuring an interactive session for the visitors and quiz for the students.

Keeper's talk on Tigers

Screening Shorts documentary on Tigers

WORLD ELEPHANT DAY

In celebration of *World Elephant Day* on 12th August 2024, a special program was organized in collaboration with the **National Museum of Natural History**. The event featured a *guided zoo walk* and an *expert talk*, aimed at raising awareness about elephant conservation. The program witnessed enthusiastic participation from numerous **school students**, making it both educational and engaging.

Keeper's Feeding the Indian Elephant

Students rally together to raise awareness

Students performing Nukkad Natak

WORLD SNAKE DAY

On 16th July National Zoological Park celebrated world snake day in collaboration with wildlife sos. They had an interactive session with the students about the safety measures to be taken while handling a snake. Also there was an informative tour of the Reptiles House for the students, by the zoo staff.

Group photo of students

WORLD RHINO DAY

World Rhino Day was celebrated on **22nd September 2024** in collaboration with **Indian Oil Corporation Ltd. (IOCL)**. This year's theme, "Keep the Five Alive", emphasized the importance of conserving all five species of rhinoceros. As part of the celebration, zoo staff engaged with visitors, highlighting the vital role rhinoceroses play in maintaining ecological balance. Additionally, college students participated in an educational visit, during which the Curator (Education) delivered an informative presentation on the significance of Rhino Day and ongoing conservation efforts.

Keeper's talk on Rhinoceros

ASIAN WATER BIRD CENSUS 2025

On 8th January, 2025 "Asian Water bird Census" has been carried out at National Zoological Park from 10 am to 12:30 pm in coordination with Shri T.K.Roy, Ecologist and Conservationist, AWC State Coordinator Delhi, Wetlands International South Asia. Volunteers from educational institutions (universities, NGOs) participated in the event. A total of 609 birds of 19 species belonging to ten groups have been spotted among five water bodies of Delhi Zoo.

Activities Related to the Promotion and Implementation of Official Language Hindi

At the National Zoological Park, continuous efforts are being made for the promotion, encouragement, and implementation of the Official Language Hindi in accordance with the Official Language Act, 1963 and the rules and directives framed under it. The Hindi Section regularly organizes various schemes and programs to strengthen the use of Hindi in official work.

1. Hindi Workshops and Official Language Implementation Committee Meetings

A Hindi workshop is organized once every quarter in the office, in which officers and staffs are provided information about the provisions and rules related to the official language, as well as administrative terminology. The objective of these workshops is to enhance efficiency in working in Hindi and to encourage employees to use the official language. Additionally, quarterly meetings of the Official Language Implementation Committee are held regularly, during which the progress in the use of Hindi is reviewed and necessary directives are issued.

2. Participation in All India Official Language Conference

To promote the use of Hindi and support its propagation on a national level, the Office Superintendent of the National Zoological Park represented the institution at the All India Official Language Conference held at Bharat Mandapam, New Delhi. Various aspects of the Hindi language were discussed during the conference, and new suggestions were presented to make the use of Hindi simpler, more practical, and effective.

3. Hindi Fortnight Celebration

In the month of September, as per the instructions of the Department of Official Language, Ministry of Home Affairs, Government of India, Hindi Fortnight was organized in the office. Under this initiative, various competitions such as Hindi

essay writing, debates, quizzes, typing contests, etc. were conducted to generate interest and awareness among the employees towards Hindi. Employees participated enthusiastically in these competitions, showcasing their creativity and expressive skills in Hindi. Winners were awarded prizes and certificates of appreciation.

4. Celebration of Hindi Month

The month of September was observed as Hindi Month, during which all officers and employees were encouraged to perform their maximum official work in Hindi. During this period, various awareness programs, poster exhibitions, and information displays were used to promote the message of using Hindi.

Following the Official Language rules of the Government of India, from September 14 to September 28, 2024, Hindi competitions were organized under the supervision of the Official Language Advisors and Hindi Officers of the Ministry of Environment, Forest and Climate Change. Employees of the National Zoological Park participated with great enthusiasm.

organized under the supervision of the Official Language Advisors and Hindi Officers of the Ministry of Environment, Forest and Climate Change. Employees of the National Zoological Park participated with great enthusiasm.

The list of winners is as follows:

1. Hindi Essay Writing Competition

Sl No.	Award Category	Awardee (Officer/Employee)
1.	First	Shri Bhagvendra Bagri, MTS
2.	Second	Ms. Seema Upadhyay, LDC
3.	Third	Shri Manoj Kumar, MTS
4.	Consolation	Shri Sachin Kumar, MTS

2. Extempore Speech Competition

Sl No.	Award Category	Awardee (Officer/Employee)
1.	First	Shri Buntichar Modak, MTS
2.	Second	Ms. Rini Ghosh, MTS
3.	Third	Shri Bhagvendra Bagri, MTS
4.	Consolation	Ms. Seema Upadhyay, LDC

3. Official Language and General Hindi Knowledge

Sl No.	Award Category	Awardee (Officer/Employee)
1.	First	Ms. Seema Upadhyay, LDC
2.	Second	Mrs. Jyoti, LDC
3.	Third	Shri Kashif Khan, LDC
4.	Consolation	Shri Sachin Kumar, MTS

4. Poetry Recitation Competition

Sl No.	Award Category	Awardee (Officer/Employee)
1.	First	Ms. Seema Upadhyay, LDC
2.	Second	Ms. Kajal, MTS
3.	Third	Shri Bhagvendra Bagri, MTS
4.	Consolation	Shri Sachin Kumar, MTS

Conclusion

Multifaceted efforts are being made at the National Zoological Park for the promotion of Hindi as the official language. Every effort is being made to ensure that all directives and policies related to the official language are followed, with the ultimate aim of creating a Hindi-oriented work environment in the office.

WORLD WETLAND DAY

On 2nd February 2025, the National Zoological Park celebrated World Wetlands Day with great enthusiasm. As part of the event, zoo staff engaged visitors in interactive question-and-answer sessions to raise awareness about the importance of wetland conservation. The celebration took place at the migratory birds' enclosure, where the zoo keeper delivered an informative talk highlighting the significance of wetlands as vital habitats for migratory bird species. The session emphasized the role of wetlands in supporting

biodiversity, regulating water cycles, and providing a safe haven for various wildlife. The day concluded with the distribution of souvenirs to the visitors, leaving them with a memorable experience and a deeper understanding of the need to protect our wetlands.

WORLD HIPPO DAY

The National Zoological Park celebrated World hippo day on February 15, 2025, prompting wildlife conservation awareness. The day saw visits from diverse groups, each benefiting uniquely. Three groups, though vastly different in age, background and purpose, benefited significantly from their visits. The school children gained a foundational understanding of wildlife, while the officer trainees received practical training to aid their conservation careers. The Zoo, on Hippo Day, served as a valuable educational resource, highlighting the importance of zoological parks in fostering both public awareness and professional development in conservation.

The Curator (Education) engaging with officer trainees on Hippo day

WORLD SPARROW DAY

Educational outreach session with a group of young school children

The National Zoological Park, New Delhi, observed World Sparrow Day on March 20th, 2025, with the primary goal of raising public awareness about sparrows and their ecological importance. The event saw enthusiastic participation from 127 students from two local schools, who engaged in a zoo walk with slogan chanting and a sparrow count, followed by an educational talk at the amphitheatre. Additionally, trainees from the Telangana State Forest Academy received specialized training, including a field visit and interaction with zoo officials, to bolster their conservation skills. A significant contribution from the Alka Harmony Foundation, involving the distribution of 100 sparrow nests to students and visitors, further empowered community involvement in habitat preservation. The day effectively highlighted the zoo's commitment to sparrow conservation through impactful educational initiatives and community engagement.

INTERNATIONAL DAY OF FORESTS

International Day of Forests, established by the UN in 2012 and observed annually on March 21st, aims to highlight the crucial importance of all forest types. In 2025, forests and foods is the theme for the day, celebrating the crucial roles of forests in food security, nutrition and livelihoods. On this occasion the National Zoological Park conducted a tree plantation drive under the theme "Ek Ped Maa Ke Naam" within its premises, along the boundary wall. This initiative involved zoo staff, with a particular focus on those nearing retirement, who planted trees as a symbolic gesture of enduring contribution to the park's ecosystem. This act signifies a commitment to ensuring the continued growth and integration of these trees into the park's landscape, serving as a lasting legacy.

WORLD WILDLIFE DAY

On 03.03.2025 World Wildlife Day was celebrated with a series of educational and engaging activities for school and university students, staff and visitors, focusing on wildlife conservation. A total of 60 school students, 42 University students, 18 MTS staff, zoo volunteers and more than 500 visitors

participated among
educational and awareness

events. The activities included expert talks, painting, mask making, leaf craft, nukkad natak, doodle activity for visitors and Keepers talk to promote awareness about the importance for protecting biodiversity.

Nukkad Natak

Prize Distribution

The celebration commenced with 60 enthusiastic school students marching and chanting slogans, setting a vibrant tone. Creative workshops, including leaf craft, painting, mask-making, doodle activity and Nukkad Natak allowed students to express their connection with wild nature. In alignment with this year's theme - "Wildlife Conservation Finance: Investing in People and Planet", an expert talk was conducted by Dr. Faiyaz A. Khudsar, Biodiversity Expert & Incharge Scientist, Biodiversity Parks Program, CEMDE, University of Delhi focusing on the financial aspects of wildlife conservation and the importance of wildlife corridors, provided valuable insights to attendees. A captivating street play by school students amplified conservation messages through storytelling. The Director, NZP interacted with the students and given the prizes for the winners of events. Participation certificates also given to all students participated from the school and colleges of Delhi NCR. The event progressed with a pledge ceremony, reinforcing commitment to wildlife preservation, and concluded with a zoo walk, enabling participants to observe and appreciate the park's diverse animal inhabitants. Interactive activities, such as doodle art, on-the-spot quizzes, and keeper talks, further enriched the visitor experience, deepening their understanding of conservation efforts.

IMPORTANT EVENTS OF 2024

WILDLIFE WEEK (02ND OCTOBER TO 8TH OCTOBER)

Wildlife Week at National Zoological Park is an annual tradition aimed at promoting awareness about wildlife conservation, biodiversity, and environmental sustainability. The theme of this year was "wildlife conservation through co-existence". The event, which took place at the Delhi Zoo premises, featured an array of engaging activities that brought students closer to the wonders of wildlife and the urgent need for conservation.

The first day kicked off with brief presentation on the National Zoological Park followed by Zoo-walk. The students embarked on a captivating walk through the zoo enclosures, led by knowledgeable guides. The volunteer and the zoo staff cheered them up with vibrant slogan

on Swabhav Swachhata - Sanskaar Swachhata, "Save Tiger, save Environment". This interactive experience allowed students to learn about various animal species, their ecological roles, and their significance in maintaining a healthy environment.

Each day was dedicated to one of the species of the zoo, thus the day ended with keeper's talk on that particular species. The program showcased Nukkad natak, On spot drawing

competitions, Nest making competition, quiz contests, debate competition, Rangoli making competition and many more fun activities.

These activities serve as crucial educational tools, cultivating a sense of responsibility and instilling a deep appreciation for the natural world. The event remained committed to nurturing a generation of environmentally conscious citizens who value and safeguard our precious wildlife and ecosystems.

The NZP staff was delighted with the students' enthusiastic involvement and their dedication to promoting wildlife conservation.

Nukkad Natak by group of students held on 02nd October, 2024

On **3rd October** participants embarked on a captivating Butterfly walk through the National Zoological Park grounds, led by butterfly expert. This interactive experience allowed students to learn about butterflies of NZP, their ecological roles, and their significance in maintaining a healthy environment.

The day kicked off with drawing competition, which was organised for school students. Students were divided

of the students of class 1 to 5, the Group B was with the students of class 6th to 8th, the Group C was for the students of class 9th to 12th and the group D was for the Divyangjan. About 600 students showcased their artistic talents and love for wildlife by drawing insightful pictures on the **Animals of the NZP**. With vibrant colors and imaginative depictions, the students breathed life into their artwork, celebrating the beauty of the animal kingdom and its connection to our ecosystem.

in 4 groups. The Group A encompassing

On Spot Drawing Competition held on 03rd October,

The day concluded with keeper's talk and enclosure enrichment at the lion Enclosure. The keeper had an interacting session with the visitors where he talked about the interesting facts about Asiatic lions and also distributed the informational material on Lion.

Keeper's talk on Asiatic Lion

4th October marked another exciting day of festivities, featuring a Clay modeling competition for Divyang (VH - Blind and low vision) & CWSN/PH students and a collage poster making competition for students of all age group.

Students from various categories participated in an exhilarating collage poster making competition. These performances were not only entertaining but also served as a powerful medium for delivering important messages about the coexistence of humans and wildlife. The theme of the competition was “Concealed beauty of Wildlife”. The collage posters creatively explored the delicate balance between our zoo residents and their natural habitats.

Poster Making Competition Held on 4th October, 2024

Adding an artistic flair to the celebrations, a clay modeling competition was organized for Divyang and CWSN/PH students. School students showcased their artistic talents during the visually impaired students and CWSN students, using "preserved wildlife" as the central theme. The artwork beautifully showcases different endangered species.

Clay Modeling Competition for Specially able children held on 04.10.2024

The programme concluded with the enrichment activities in the reptile enclosures. The reptile keeping staffs made materials for the enrichment purpose and also as per routine the enclosures were cleaned thoroughly.

On **5th October** the National Zoological Park (NZN) organized a leaf craft Competition tailored for students in the 9th and above categories, followed by bird feeder making competition and bird nest making competition. The day radiated with the impassionate Tree walk through the floral diversity of the ZOO.

Group photo of the participants with the Judges and the Zoo Authority

The programme started with Tree walk where students and attendees participated a passionate walk through the flora of the ZOO. They were guided by distinguished expert. They experts gave lots of information regarding trees and also taught how

to identify different species of trees. Led by knowledgeable guides, this Tree walk allowed everyone to connect with nature's wonders, fostering a deeper appreciation for the natural world.

Expert interacting with the students on Tree walk

The bird feeder making competition was for the students of 6th to 8th grade. They made beautiful art craft by using reusable waste materials provided by the zoo authority. This initiative underscores the importance of coexisting harmoniously with wildlife and preserving our environment for generations to come.

Nests made by the Participant

The day concluded with an interactive keeper talk at the Bear Enclosure, where the bear-keeping staff engaged visitors through an informative talk show highlighting fascinating facts about bears. This activity greatly enriched the visitor experience and significantly enhanced public interest in wildlife conservation and animal behavior.

K

Keeper's talk on Bear

On **06th October** National Zoological Park hosted an Expert Talk programme where distinguished experts explained informative presentation on the importance of conservation of wildlife and Biodiversity. Students also engaged themselves in interaction session with the expert regarding the topic where they cleared their doubts.

Experts interacting with the student

The day commenced with an invigorating Debate Competition featuring 11th and 12th-grade students. Participants delved into thought-provoking discussions on the intricacies of balancing conservation efforts with the demands of economic development. Their eloquent arguments and passionate presentations underscored the complexity of these vital issues.

Group photo of the participants with the Experts and Judges

On **7th October**, 2024 Participants had the opportunity to immerse themselves in the natural beauty of the National Zoological Park premises through an educational insect walk. Led by knowledgeable guides, attendees learned about the local insects and gained a deeper understanding of the importance of conservation.

Rangoli making Competition

Judges in action: Delivering fair and thoughtful evaluations

Students of class 6th to 8th participated in treasure hunt activity. The zoo staffs hid the clues regarding some animals of the ZOO and they had to find out them. By this activity they learnt about different facts of each animal also they had a mini tour of the Zoo. This event was a test of their intelligence in map reading and also their knowledge of wildlife.

The event of the day was Rangoli Competition with the theme of “Preserve Wildlife”. This colourful event enchanted everyone. The students of class 9th to 12th showcased their art through the colours. Their efforts come out in the shape of different animals and sceneries related to wildlife.

Rangoli made by the Winners

The staffs at National Zoological Park were enthralled by the students' passion and dedication to wildlife conservation. These events serve as a beacon of hope, nurturing the next generation of environmental champions who are committed to safeguarding our planet and its remarkable biodiversity.

The glorious 7 days of wildlife week finally concluded on 8th October with quiz activity and prize distribution ceremony, captivating the hearts and minds of all participants. The celebration of Wildlife Week at National Zoological Park is an annual tradition dedicated to raising awareness about wildlife conservation, biodiversity preservation, and environmental education.

The day started with informative nature walk through the premises of National Zoological Park by identifying the water birds. Led by knowledgeable guides, attendees learned about the migratory birds and gained a deeper understanding of the importance of conservation.

Treasure Hunt Activity

Quiz Contest

Followed by quiz activity the day become more exciting as the participants eagerly indulged themselves in the question answer games. The sole purpose of the activity was to provide them little more knowledge about the animals and wild. More than 60 students from different schools participated. The participants were given souvenir of the zoo for encouragement.

Prize Distribution ceremony

There was also an enriching keeper's talk session at the herbivore enclosures. The keeper shared the fun facts of the animals and a give them brief description about how they take care and maintain the animals in the zoo.

The day ended with a prize distribution ceremony honored by the AIG of MoEF&CC, the Director of the NZP and the OSD of the NZP. The ceremony showcased the finest art works done by the little champs. The honorable director gave a briefing about the Wildlife Week 2024. Then a short film shot on this occasion shown to the attendees. In total 1411 students participated in 13 activities/competitions among them 5 students for each competition were given prize. The honorable Chief Guest, AIG, MoEF&CC gave a heartwarming concluding speech to encourage the participants and also to the staffs and volunteer for the efforts they put on. After distributing prizes, all the winners had a photo session with the distinguished guests, volunteers and zoo staffs.

At the end Wildlife week served as such events which engaged young minds in the idea of conservation. It exaggerates the passion of students in wildlife. Their small interests when appreciated by such authorities become a ray of hope in their busy study schedule. Wildlife Week at NZP is an annual extravaganza that aims to educate and inspire people of all ages about the significance of biodiversity conservation and the critical need to protect Earth's treasured inhabitants. In such a way National Zoological Park successfully completed the celebration of Wildlife Week 2024.

“SWACHHATA HI SEVA”

National Zoological Park (NZN) organised a significant and impactful awareness program on 17th September 2024, under the auspices of the “Swachhata Hi Seva” campaign

2024. The event, held at the National Zoological Park (Delhi Zoo), New Delhi, was conducted under the esteemed leadership of the Hon'ble Minister Sh. Bhupender Yadav and the Hon'ble State Minister Sh. Kirti Vardhan Singh, both representing the Ministry of Environment, Forest and Climate Change (MoEF&CC). The rally culminated at a designated plantation site situated near the lake

The initiative garnered substantial participation, with over 300 individuals, including 92 students,

volunteers, staff members, and visitors, contributing to this important endeavor. The presence of dignitaries such as Smt. Leena Nandan, Secretary MoEF&CC, and Sh. Jitender Kumar, DGF&SS, MoEF&CC, alongside other senior officials from the Ministry, lent further prominence to the proceedings.

area of the zoo. At this location, the “Matri Van” was formally inaugurated by the Hon'ble Minister Sh. Bhupender Yadav and the Hon'ble State Minister Sh. Kirti Vardhan Singh. Following the

inauguration, the Hon'ble Minister Sh. Bhupender Yadav planted a

sapling of "Peepal," and the Hon'ble State Minister Sh. Kirti Vardhan Singh planted a sapling of "Jamun." Other senior officials from the MoEF&CC, officials from the Forest Department, Government of National Capital Territory of Delhi, and school students also participated in the

planting activity, planting saplings of Molsari, Amla, and Amaltas varieties. Furthermore, the

Hon'ble Minister Sh. Bhupender Yadav and the Hon'ble State Minister Sh. Kirti Vardhan Singh jointly inaugurated the electronic launch of a special drive aimed at planting 100 saplings in each of the 100 Nagar Vans across six states under the "EK

PED MAA KE NAAM" campaign. Prior to the aforementioned programs, senior officials from the Prime Minister's Office planted saplings under the "Ek Ped Maa Ke Naam" campaign in the Udyan area of the National Zoological Park.

The overarching theme of the Swachhata Hi Sewa campaign 2024 was "**Swabhav Swachhata - Sanskaar Swachhata,**" and it was observed from 17th September to 2nd October 2024.

During this period zoo will organize different activities like Zoo Cleanup Day, Organize interactive sessions, Health Check-up camp, install signages and selfie points etc. The goal of arranging these activities at National Zoological Park is to create awareness about Swachhata Hi Seva campaign 2024 and also to promote the concept of Lifestyle for Environment by staying close to the nature and planting a sapling. Souvenir and participation certificates were distributed to all participating students.

The National Zoological Park, under the guidance and support of the Government of India, actively participated in the Special Swachhata Campaign, which was conducted from September 17 to October 01, 2024. The campaign was initiated with the objective of promoting cleanliness, environmental awareness, and responsible citizenship. On 27th September the zoo conducted regular

cleanliness drives within its premises, actively involving staff members. These collective efforts were directed towards ensuring the cleanliness and upkeep of walkways, enclosures, and common areas within the park.

On 01.10.24 National Zoological Park organized Safaimitra Suraksha Shivar for the Zoo staffs. The facility provided to the animal keeper s, sanitary workers, garden staffs, commissary staffs and security staffs. Doctors from L.N.J.P hospital came to conduct the programme. They also informed about the importance of hygiene while working in field. There were about 75 participants who joined the initiative.

Green Ambassador for a day

– On this day volunteers, as “Swachhata Ambassador” spread the message of cleanliness among visitors. Almost 155 students and 15 teaching staffs from DAV Ashok Vihar and Bal Bharti Public School participated in this event. Also students from Sri Venkateswara college, University of Delhi joined the

interactive session “Swachhata Samvad”.

All of them took ‘Swachhata Pledge’. The volunteers talked about the importance of cleanliness and the students had a delightful session at selfie point.

Animal Adoption Scheme – 2024–25

The **Animal Adoption Scheme** is a vital public engagement initiative through which zoos offer animals or species from their collection for symbolic adoption by members of the general public. The primary objective is to foster direct public participation, enhance transparency, and promote greater accountability in zoo management and animal welfare.

The scheme is open to **individual citizens, animal lovers, corporate entities, celebrities, educational institutions**, and other organizations. By adopting zoo animals, conscious and esteemed individuals or groups can contribute meaningfully to the cause of **wildlife conservation**, particularly the protection of **endangered species**.

Key Highlights for the Year 2024–25:

- A total of **15 individuals** adopted animals under the scheme
- **15 different species** were symbolically adopted
- The total financial contribution received amounted to **₹13,17,500**

These contributions have significantly supported the enhancement of zoo facilities, including animal diet enrichment, habitat improvements, medical care, and overall welfare. The scheme also encourages broader awareness and instills a sense of ownership and empathy toward wildlife among the public.

List of Animal Adoption

S. No.	Name	Adopted Animal Name	Period	Amount
1.	Amrit Clinic (Barjinder Singh)	Indian star Tortoise	02.04.2024 to 01.04.2025	3500
2.	Rahul Kumar	Indian star Tortoise	22.07.2024 to 21.07.2025	3500
3.	IOCL Amit Kumar	Rhinoceros (2 No.)	29.07.2024 to 28.07.2025	1200000
4.	Madhu Nagpal	Indian star Tortoise	12.08.2024 to 11.08.2025	3500
5.	Dr. Manisha Kaushik and Madhu Nagpal	Indian star Tortoise	12.08.2024 to 11.08.2025	3500
6.	Dr. Manisha Kaushik	Indian star Tortoise	12.08.2024 to 11.08.2025	3500
7.	Ashok Mittal	Siamese Crocodile	29.08.2024 to 28.08.2025	21000
8.	Vikram Mittal	Marsh Crocodile	29.08.2024 to 28.08.2025	30000
9.	Manu Vedwan	Blackbuck	06.11.2024 to 05.11.2025	12000
		Common Rat Snake		200
10	Meenakshi Singh	Great Horned Owl	18.10.2024 to 17.10.2025	12000
11.	Mr. Harsh Vardhan Singh	Black Swan	02.12.2024 to 01.12.2025	4500
12.	Pratika Gupta	Indian star Tortoise	02.12.2025 to 01.02.2026	3500
13.	Fateh Pratap Singh Chawla	Indian Crested Porcupine	10.03.2025 to 09.03.2026	12000
14.	Meenakshi Singh	Scaly-breasted Munia	30.03.2025 to 29.03.2026	3000
Total				1,317,500

In conclusion, the **Animal Adoption Scheme** stands as a remarkable example of **public-private partnership** in wildlife conservation, reinforcing a shared responsibility towards protecting our planet's precious biodiversity.

Seasonal Special Arrangements for Upkeep of Animals

To ensure the well-being of animals during extreme weather conditions, the **National Zoological Park (NZN)** has made proper arrangements to provide a safe and comfortable environment throughout the year. During summer, **sprinklers** and **coolers** are installed in the animal holding areas to help combat the intense heat. In **winter**, animals are provided with **Hessian cloths**, **heaters**, **wooden flooring**, and **straw bedding** to protect them from severe cold. These seasonal measures reflect NZN's ongoing commitment to maintaining high standards of animal care and welfare.

A zoo keeper gently spraying water to cool down the animals on a hot summer day, offering them a refreshing break from the heat.

Sprinkler systems have been installed in Beat No. 05 to help regulate the temperature and provide thermal comfort for the Bengal tigers during the summer months.

Conservation Breeding Programme

CZA has identified about 70 endangered species for conservation breeding. It was felt that Indian Zoo should have at least 100 properly and scientifically bred individuals of each endangered species in captivity, to act as an insurance cover in case of population loss of species in wild.

In order to achieve above objectives, CZA has identified coordinating and participating zoos in India. They have been asked to construct appropriate enclosures for targeted species. National Zoological Park, New Delhi has successfully bred number of endangered animals and birds.

At present, this park participating zoo for the conservation breeding for the following species:

- A. Asiatic Lion
- B. Indian Rhinoceros
- C. Sangai Deer
- D. Red Jungle Fowl
- E. Bengal Tiger

Here are the current statuses of the following animals:

S.No.	Animal Name	Scientific Name	Status as on 31.03.2025				Requirement for Breeding			
			M	F	U	T	M	F	U	T
1	Bengal Tiger	<i>Panthera tigris tigris</i>	3	4	0	7	0	0	0	0
2	Asiatic Lion	<i>Panthera leo persica</i>	2	2	2	6	0	0	0	0
3	Eld's Deer (Brow-antlered Deer)	<i>Rucervus eldii</i>	24	33	15	72	0	0	0	0
4	Red Jungle fowl	<i>Gallus gallus</i>	19	21	0	40	0	0	0	0
5	Indian Rhinoceros (Greater One-horned Rhino)	<i>Rhinoceros unicornis</i>	0	1	0	1	1	0	0	1

1. Royal Bengal Tiger: Current population: 7 (3 males, 4 females). The National Zoological Park has seven Royal Bengal Tigers: three males (Hari, Sanatan, Karan) and four females (Aditi, Siddhi, Dhairya, Dhatri). One male “Karan” is normal-colored, born to a white tigress. One Male “Sanatan” was Received from Assam State Zoo Guwahati in year 2020. Wild-origin females Siddhi and Aditi are in a conservation breeding program. Siddhi gave birth to two female cubs, Dhairya and Dhatri, on May 5, 2023. Successful breeding from Aditi is anticipated next year.

2. Asiatic Lion: Current population: 6 (2 males, 2 females and 2 cubs). At present National Zoological Park has four Asiatic lions (Maheshwar, Sundaram - males; Mahagauri, Shailja - females). The pairing of Maheshwar and Mahagauri was successful this year, and the lioness is expecting.

3. One Horned Rhinoceros: Current population: 1 (1 female). The Delhi Zoo exchanged a female rhino with the Assam State Zoo for a male. While the exchanged female has paired successfully in Assam, the male rhino brought to Delhi tragically died from acute hemorrhagic enteritis, leaving the zoo with only one female Rhino.

4. Brow-Antlered Deer (Sangai Deer): Current population: 72 (24 males, 33 females, 15 unsexed), the largest in captivity, this species has bred successfully at the National Zoological Park. This success of the conservation breeding program has enabled the zoo to exchange over a hundred deer under the animal exchange program. As of March 31, 2025, 11/ 12 surviving fawns, and their re-wilding in Keibul Lamjao National Park is expected to further strengthen the National Conservation Breeding Programme.

5. Red Jungle Fowl: Current population: 40 (19 males, 21 females). However, most of the current population is homozygous. To ensure successful breeding and maintain genetic heterozygosity, two additional pairs of Red Jungle Fowl are required.

To ensure the continued success of our conservation breeding program for these critically endangered animals, the National Zoological Park is actively pursuing communication and animal exchange initiatives with relevant zoos. This collaborative approach is vital for enhancing genetic diversity and strengthening our national conservation efforts.

Animal Acquisition/Transfer/Exchange during the Year

LIST OF ANIMAL ACQUISITION

S.No.	DATE	SPECIES NAME	RECEIVED NUMBER				RECEIVED FROM
			M	F	U	T	
1	11-Sep-24	Indian Rhinoceros /Greater One- horned Rhino (<i>Rhinoceros unicornis</i>)	1	0	0	1	Assam State Zoo, Guwahati
2	11-Sep-24	<i>Bengal Tiger (Panthera tigris tigris)</i>	1	0	0	1	Assam State Zoo, Guwahati

Status of the compliance with condition's stipulated by the Central Zoo Authority

SI.	Norm No. UnderRZR,200 9	Condition Stipulated	Time period to comply	Since when pending	Status with regard to compliance of the conditions
-----	-------------------------------	----------------------	-----------------------	--------------------	--

1. General requirements

1	10.1(1)	There are a few beats in which the animals are not in the enclosures of adequate and proper size as well as in near-natural settings so as to meet the behavioral requirements of the animal and communicate a credible conservation message to the visitors. This is the case particularly with the langur, rhesus macaque and civets in Beat No.9 and birds like kite, eagle and owl in Beat No. 18.	Six Months.		Under Construction
---	---------	--	-------------	--	--------------------

2. Administrative and staffing pattern

2	10.2(1)	As mandated by the rule 10.2(1), the zoo should have whole time in-charge of the zoo. The Ministry should post a full time director of the zoo and she he should reside inside the zoo premises for effective management and dealing with unforeseen crises.	As soon as possible.		Done
3	10.2(2)	The Zoo is a large zoo, but there is no Biologist in the zoo. A good biologist can take care of animal welfare which is inadequate in the zoo at present, help creation of near-natural environment, generate empirical data on animal behavior, conservation breeding, etc. The zoo operators should provide a properly trained Biologist, even if on deputation basis. to the zoo.	As soon as practicably possible.		Under Process

3. Development and Planning

4	10.3(7)	<p>The quarantine facility, with rudimentary structure behind the zoo hospital needs to be completed as soon as possible. During our visit, we found that the zoo Ranger alone is coordinating with the Civil Construction Unit (CCU) of the Ministry and the needed nuanced input for a top-class quarantine facility is not being given to the CCU. As a result, the structure is below-par and risk-prone. The Zoo and CZA should guide the CCU in creating facility which is the best in the class, given that this zoo is in the national capital.</p>	Six months		Done
---	---------	---	------------	--	------

4. Animal housing, display and animal enclosures

5.	10.4(1), 10.4(2) and 10.4(6)	<p>There are many enclosures which are not displaying animals in nature -immersing enclosures. In addition in such cases and in some other cases, the designs and dimensions of the enclosures are not as per the needs of biological requirements of the animals. A few examples are given below:-</p> <p>a. There is no perching material for the birds like owls, kites, eagles, etc in Beat No. 18. They are in cages which are very small and covered with glass on visitor-side. The glass is obviously creating greenhouse effect which might be creating searing hot condition inside the enclosure during summer. Moreover, the reflection of glass is making peeking inside and locating bird is extremely difficult. This is giving negative conservation message to the visitors, besides causing hardship to the birds.</p> <p>b. The enclosures related to langur, rhesus macaque and palm civet have been mentioned above. None of them is nature-immersing. The shade for the visitors in these enclosures</p>			
----	------------------------------------	--	--	--	--

		<p>(Beat) No.9) is cutting off sunshine to the animals inside the enclosures. A trade-off may be found out so that the animals also get sunshine during the harsh winter months.</p> <p>C. The newly-created gharial enclosure is very small and has no proper ramp for the animal to come out of water. It does not give look of a near-natural habitat. The water into the pond may also not be good, as the water filtration unit there was not working.</p> <p>d. In carnivore enclosures, six-seven feet tall cement-concrete water-sprinklers have been installed. If possible, water sprinkling should be done through some camouflaged means Otherwise, these cement-concrete cylindrical structures should be camouflaged through natural vegetation.</p> <p>e. Star tortoises, which are species of warmer climate, should be provided a small night shelter inside the enclosure during the night hours in winters. It was not given.</p>			Under Process
6	10.4(3)	As suggested earlier, in front of carnivores enclosures two water cannons need to be installed to prevent attack from the animal in case of an accidental fall of some person into the enclosure.	As soon as possible.		
7.	7. 10.4(9) and 10.4(10)	At some enclosures, like that of lion-tailed macaque and white tiger, the location for viewing by visitors is above the level of animal paddock. This kind of design is detracting from the concept of a modern zoo where the visitors will see the animals at eye-level and the design will be such that the barrier (moat) will not create a visual obstruction. The national zoological park should make an endeavor to realize this concept in all its enclosures. The signages with relevant information on biology, behavior, etc of the animals	Six Months.		

		need to changed or refurbished and content changed as per the latest knowledge and research findings. As expected under the rule, the large zoos should provide interactive interpretation facility. The stand-off barriers are broken partially at some places. They need to be repaired.			
--	--	--	--	--	--

5. Upkeep and healthcare of animals

8	10.5(5)	<p>I. During our visit, we found many rats in some enclosures, particularly in those feeding cells. Where food suitable to rats was available, like those in the feeding cells of pig-tailed macaque, birds, etc. The rats should be controlled immediately as they are potential source of a disease outbreak in the zoo. This ubiquitous presence of rats in the zoo is also giving very bad conservation message and quality of upkeep in the zoo.</p> <p>II. The night shelters of both sloth bear and Himalayan black bear are so small that animal can hardly fit in. The food is given on the floor, thus mixing with the urine and excreta of the animal.</p> <p>III. The water bowl is also so situated that the keeper cannot wash the distal (from the location of keeper outside the iron bars) end of the bowl. This is not hygienic.</p> <p>IV. Outside the white tiger enclosure, there was lot of smell. Similarly, there was lot of smell outside the night shelter of the wolves. Sanitation and hygiene of these areas need to be maintained.</p> <p>V. There seems to be no drainage (except a soak pit) in the leopard and baboon enclosures. Drainage should be provided, so that there is no</p>	As soon possible.		
---	---------	---	-------------------	--	--

		<p>overflow of polluted effluents into the backyard of the enclosure.</p> <p>VI. At some enclosures, for example in case of tiger, we found that despite there being a paddock outside free, the animals were kept in inside kraal where neither there was sunlight. nor place for movement of the animal. Animal welfare needs to be given more priority in the zoo.</p>			
9	10.5(6)	<p>There is greater need for keeping close watch on health and general behavior of animals. The curatorial staff needs better training and field exposure on these aspects of management. For example, during our visit there was injury on the foot of one of the wolves, but the curatorial staff did not notice that.</p>	Training on regular basis.		
10	10.5(10)	<p>During our visit, we learnt that although daily reports are being prepared at the beat level, the report was not being shared by the Range management to the higher management. Moreover, in a centralized system of monitoring of animals through cameras. many of the cameras were dysfunctional. These deficiencies on monitoring the health and welfare of animals should be removed.</p>	As early as possible.		

6. Veterinary and infrastructure facilities

11	10.6(1)	<p>Although the zoo has adequate facility in its veterinary hospital, but a part of the in-patient ward of the hospital is very dark, depressing and dingy with covered cages. Diurnal animals need some sunlight. and all animals need some fresh air. Effort should be made to let some natural light in through some innovative intervention. During winter, the animal should be provided with facility of</p>	As soon as possible.		
----	---------	--	----------------------	--	--

		adequate warmth.			
12	12. 10.6(3)	The quarantine ward should be made operational as early as possible. As stated earlier, it is inadequate and deficient.	Six Months.		

7. Post-mortem and disposal of carcasses of animals

13	10.7(4)	The incinerator for burning carcasses in the zoo highly inadequate and needs to be replaced.	As early as Possible		
----	---------	--	----------------------	--	--

8. Acquisition and breeding of animals

14	10.9 (1) & 10.9(4)	Perhaps because of various constraints, the zoo has As many species of animals which do not have mates Some of the examples are:- i. There is only one langur (male). ii. There are five Indian Muntjak males. iii. There are two male jackals. iv. There are two female rhinos. v. There is only one female Rhea Greater. vi. There are two male ostrich. vii. There are two male jaguars. viii. There are two female striped hyena. Effort should be made to have breeding pairs of species in the zoo.	As soon as possible.		ii. Done. iii. Done. vii. Died. viii. Done.
15	10.9(1)	a. The zoo should make efforts to add to the diversity of mammals and birds. There are many zoos which can provide mammals and birds from their surplus stock. For example. Rangapahar zoo in Dimapur, Nagaland has good number of Oriental Pied Hornbill in surplus stock. b. The lone langur in the zoo should be given to some other zoo or released in the wild. C. Rhesus macaque in Beat No.9 in the enclosure is giving very bad impression on the conservation. It should be off-	As soon as possible.		

		display or released in the wild.			
		d. The zoo has lot many peacocks and Brahmini kites in the free-range of the zoo. So, such peacocks and kites in the enclosures do not carry much conservation message. They are breeding in the open better.			

9. Education and outreach activities

16	10.1	Many school children visit the zoo, but we did not see interactive devices for the visitors to learn about natural world. There should be interactive nature-learning and conservation awareness devices and methods in the repertoire of the zoo in their education and outreach activities.			
----	------	---	--	--	--

10. Visitor Facilities

17	10.12 & 10.1(2)	Tin shade at the entrance of the zoo is spoiling the Six Months facade of this national zoo. As the tickets to the visitors are being sold online, they (visitors) need not queue up at the entrance and do not need tin shade. So, the tin shade at the entrance of the zoo should be removed. Engaging an architect to review the facade may help.	Six Months.		
----	-----------------	--	-------------	--	--

List of free living wild animals within the zoo premises

Mammals:

1. Palm Civet
2. Porcupine
3. Mongoose
4. Five Striped Squirrel
5. Bats

Reptiles:

1. Cobra
2. Rat Snake
3. Common Krait
4. Monitor Lizard
