Report of the Officer-in-charge

Rajiv Gandhi Zoological Park had 2018 – 2019 as one of the productive year of the recent time which observed comprehensive achievements in terms of zoo's future expansion. Although the Master Plan of zoo got approved back in 2013, nothing substantial could be gained owing to diverse impediments blocking planned developmental projects. Not with standing, all adversities could be effectively countered by the different stakeholders within the Pune Municipal Corporation engaged in the execution of zoo master plan projects. Tree authority cleared the pending proposal to cut down the trees existing at construction site which paved the way to initiate the construction of enclosures for the selected species. For the first time massive construction work to establish enclosure for Jungle cat, Leopard cat, Rusty spotted cat, Malabar giant squirrel, Asiatic lion and new reptile section kick started with a set plan to complete it within the corresponding year. Amongst the project works taken up excluding reptile section, completion of remaining enclosures would help display the newer species for the zoo visitors.

Ex situ conservation breeding programme of Malabar giant squirrel, one of the stated objective of zoo got a desired stimulus. The species bred twice till the end of 2018, which prompted Pune Municipal Corporation to built an off display facility which would meet behavioral and biological need of the species. After the second successive birth genetic study of the founder specimen began by collecting requisite bio samples to asses the genetic heterozygosity. The technical aid from LaCONES is being sought for the purpose. The ex situ breeding facility shaping up across the off display northern stretch of zoo have two cages constructed initially admeasuring 45 sq. meter each. The scope for the future expansion of project is kept making provision for two more such cages if population of the species augments satisfactorily. The facility would be probably inaugurated sometime in the mid 2019.

The zoo management had been focusing hard for the breeding of Royal Bengal tiger from last few months. The compatibility between the pair was an issue in the very beginning; nevertheless hardship of staffers started bearing fruits in the end. The repeated introduction of mates with each other started courting one another and had successful mating. The tigress 'Riddhi' delivered four healthy cubs fathered by wild origin male the 'Bagiram'. The birth of tiger cubs becomes one of the biggest achievement for the zoo as the earlier tiger breeding had been far earlier, some fourteen years back. The siblings, three male and a female are named by Hon'ble Mayor of Pune Municipal Corporation in a grand naming ceremony witnessed by large sections of media across the city. The cubs would be released for public display, soon they becomes capable to roam across the moated enclosure.

The Sloth bear enclosure had been devoid of species for almost a year leaving management desperate to have the animals through exchange programme. It was Kanan Pendhari Biological Park, Bilaspur who extended helping hand where we got the pair from in exchange of pair of Chinkara. The young sub adult pair remains playful and busy in varied activities all day long in the enclosure attracting sizable number of visitors.

Pune Municipal Corporation is highly indebted to Central Zoo Authority for providing financial assistance for the construction of enclosure for Rusty spotted cat. One another favor from authority the civic body waiting for is clearance for the amendment in the approved Master (lay out) plan and animal collection plan of zoo. The amendment proposal envisage to incorporate exotic species viz Ziraffe, Zebra, Green anaconda, alligator and selective antelopes from African savanna. The approval for the revised plan would help reduce sizes of few existing enclosures and accommodate more species on a given area. Further its being planned to modify existing enclosure of four horned antelope to Zebra. If the things goes on as per the plan, then there would be first exotic species in the zoo's collection plan in the form of Zebra by the end of 2020.

With warm regards!

History of the **ZOO**

Pune Municipal Corporation established Peshwe Park Zoo at the foot hills of Parwati in 1953 where the Pashwa's had their private Menagerie. The zoo had been established on a limited land of around 7 acres where the animals used to be housed and displayed to the visitors in a concrete cages behind the iron bars. This zoo was representing the typical traditional zoos of the time wherein only the objective of recreation for the visitors had been focused.

With the formation of Central Zoo Authority in 1992 the scenario of the Indian zoos got totally changed. The zoos had to transform from the meagre menagerie to the scientific wildlife conservation centre. With a view to develop a zoo which would fulfil the objectives of naturalistic animal housing, conservation breeding, wildlife conservation education and research a new site at Katraj having a land area of 130 acre was selected and development work initiated in 1996. The new zoo inaugurated on 14th March 1999 and renamed as Rajiv Gandhi Zoological Park and Wildlife Research centre.

Initially the infrastructure development in the form of naturalistic enclosures for the ungulates, primates, Sloth bear, Royal Bengal tiger, Asian elephant etc. was established. The old reptile park established in 1986 had merged in the zoo. At present the zoo is a

home to around 63 species of wildlife fauna including mammals, birds and reptiles which represents the Western Ghat and Deccan plateau. The animals are being displayed in spacious naturalistic enclosures in a thematic manner. Enclosure exhibits are developed simulating the animals naturalistic habitat where environment enrichment is focused considering animals behavioral need. Animal upkeep and health care has been taken care of establishing veterinary hospital equipped with advanced diagnostic tools and treatment facilities.

Our Vision

The Rajiv Gandhi zoo will use this unique facility to build conservation consciousness among the citizens of Pune that will assist in creating a pro environment lobby force for protecting biodiversity of our unique state with its diverse ecosystems that include the bio-rich Western Ghats, the semiarid grasslands of the Deccan, and the aquatic ecosystems, along with the region's diverse range of plant and animal species

Our Mission

A living centre committed to wildlife conservation through ex situ breeding, research and education.

We achieve this by:

- Promoting the ex situ breeding of threatened wildlife species in captivity
- Conducting research pertaining to animal husbandry, health, behavior and enrichment
- Inculcating the sense of responsibility towards the society through the need based educational programme focusing importance of wildlife.

Our Objectives

- I) Display of wild fauna of western Ghat in naturalistic enclosures.
- ii) Conservation breeding of selected endangered wildlife species
- iii) Awareness towards wildlife conservation through educational activities
- iv) Research pertaining to wildlife behavior and health aspects
- v) Rescue & Rehabilitation of injured, sick and abandoned wild animals

Development Works carried out in the zoo during the year

In the year 2018 -2019 major infrastructure development projects undertaken especially the construction of enclosures which becomes the part of first phase of master plan. Infrastructure development carried out in the year

New enclosure for the Asiatic lion:

Asiatic Lion is flagship species in the approved collection plan of zoo and made available in the zoo since 2016. The pair of species is being displayed to the visitors in the facility meant for white tiger. The separate enclosure for the species admeasuring 2600 sq. mtr. is coming up on a new land area opposite to the Elephant facility.

The work for the new enclosure has began which would be a 'U' shaped dry moat type facility. The enclosure construction is expected to be completed by the end of the next financial year.

New reptile section:

The new reptile section work initiated earlier got halted owing to the non removal of trees across the project site. However this year the impediment of vegetation negated by the Pune Municipal Corporation paved way for the construction of proposed facility. The project being huge may require considerable time for its completion due to involvement of budgetary allocation and project prioritization by the civic body.

Ex situ conservation breeding facility for the Giant squirrel:

Malabar giant squirrel is the state animal of Maharashtra and one of the species identified under ex situ conservation breeding programme launched by Central Zoo Authority. Since this zoo is acting as a participating zoo for the ex situ breeding of Giant squirrel an efforts were on to breed the species. The

recent success in the breeding of giant squirrel has prompted to establish off display facility to breed the species with scientific approach. Initially two cages which measures 45 sq. mtr. each are constructed leaving scope for the future expansion of the facility.

Construction of enclosure for lesser cats:

The construction of enclosure for Jungle cat, Leopard cat and Rusty spotted cat kick started finally this year. Though the project work delayed in the beginning, from the third quarter of the year onward the construction work taken up desired momentum. All three exhibits admeasuring around 100 sq. mtr. each will be ready of the next financial year.

Refurbishing of resting shades:

The resting shades constructed far earlier got in dilapidated conditions and had a shabby appearance. All three resting shades meant for zoo visitors are refurbished with ferroconcrete work.

7th October, Valedictory Function

This year wildlife week observed phenomenal response from the school unlike preceding year where school examination coincided during the event. The students accompanied by the respective school teachers and staffers participated wholeheartedly full of exhilaration supporting the students. Every student and team of students involved in the event tried to deliver their best in each competition they appeared in. The sensational performances from the students in different

competitions had made the job of judges quite difficult to select the winners. The meticulous evaluation of performances by the judges who remained particular to make a choice of best performers was commendable. Outperforming candidates declared winners in the different competitions were awarded with trophies and certificates on 7th October, at the hands of Chief guest Mr. Vilas Bardekar, Chairmain, Maharashtra State Biodiversity Board.

Chief Guest Mr. Bardekar applauded the splendid job by the participating students in every competition and the efforts taken up by the respective school management. He praised Pune Municipal Corporation for showcasing empathy for the wildlife by organizing such an event which would help spread wildlife conservation awareness amongst different strata of society through schools and colleges. The vote of thanks was proposed by Mrs Ashwini Yadav, Educational Officer of the Zoo. Mr. Praksh Inamdar, Zoo Volunteer extended his selfless sincere services throughout the event. The media coverage imparted by the local print media through daily news highlighting wildlife week activities witnessed large number of students participation in the competitions and public gathering to enjoy the event.

Important Events and Happenings

LIPOMA IN LEOPARD

The only leopard male namely Sibba aged 19 years was detected with tennis ball size swelling at right cervico-madibular, region on 02.04.2018. The clinical examination revealed swelling was without pain. The fine needle aspiration of the growth was done, to study the histopathology to diagnose the condition animal is suffering from. The laboratory examination revealed the growth as 'Lipoma'. Although the size of growth was seen gradually increasing the animal had no problems clinically and the welfare of the animal not

compromised. Hence the decision of surgery on animal deferred and the animals is currently under veterinary supervision.

INJURY OF RHESUS MACAQUE

Alfa male dominance is commonly seen in the species like Rhesus macaque. On 22.04.2018 two adult males had serious fight with each other to maintain supremacy within the troop. During the fight one of male got injured with deep lacerations over the face. The wound was just ventral to right eye over the cheek measuring 3 inches in length. The Suturing of the wound was carried under general anaesthesia with Xylazine @ 1 mg/kg and Ketamine @ 2 mg/Kg body weight. The animal completely recovered eventually post surgery.

TRANQUILIZATION OF GIANT SQUIRREL FOR COLLECTION OF BIOLOGICAL SAMPLE FOR GENETIC ANALYSIS

This zoo is identified as a participating zoo for the conservation breeding programme of Malabar Giant squirrel (*Rutufa indica*). At present in the collection there are 01 male and 02 females as a founder stock. The recent success in the breeding of species has prompted to take up the breeding programme on scientific lines. The genetic study

of the founder animals was planned out to assess the genetic heterozygosity. The requisite bio samples collection for the genetic analysis from the founder stock was carried out from 22/8/2018 to 28/8/2018. For the purpose animals were effectively sedated with Ketamine @ 20 mg/Kg body weight and the blood samples were collected from coccygeal vein. The bio samples including blood, scat and hairs were sent to LaCONES for the desired study.

BREEDING IN ROYAL BENGAL TIGER

The attempts to breed Royal Bengal tiger were on for quite some time in the past, however the compatibility between the pair was an issue in the beginning. Nevertheless, constant efforts of the staffers to introduce the mates repeatedly started bearing fruits as animals began courting each other. The wild origin male tiger namely Bagiram aged 9.5

years and female Riddhi aged 9 year mated successfully in the second week of July. and the female tigress delivered 5 cubs on 23.10.2018. However one of the cub succumbed to the weakness and non acceptance by the mother. The sexing of young ones revealed three males and one female, all found healthy. The cubs diet was supplemented with calcium, and multivitamins preparations. All the cubs dewormed at the age of 1, 2 and 3 months and vaccinated against feline rhino trachititis, feline calci virus and feline panleucopenia and rabies at the age of 2, 3, 4 and 6th months.

COMPLETE FRACTURE OF TARSAL BONE IN BLACK BUCK

On 28.11.2018 one blackbuck female was observed having lameness in right hind limb with its distal extremity moving freely down and hanging without support which aroused the suspicion of animal sustained fracture. The animal was sedated with Xylazine and ketamine combination. The clinical examination revealed the proximal extremity of tarsus bone has complete fracture with open wound. After repositioning of fractured fragments plaster cast applied with window for draining and dressing of open wound. The animal treated with antibiotics and calcium supplement to speed up the recovery. Animal showed uneventful recovery subsequently.

LAMENESS IN ROYAL BENGAL TIGER

The wild caught male tiger 'Bagiram' developed persistent lameness in right forelimb. In the initial stage animal was treated symptomatically with anti inflammatory drugs, nervine tonics and glucosamine preparations. However the treatment of this sort was not found effective and animal could not be relieved of painful condition. To diagnose the lameness condition the decision was made out to sedate the animal.

On 02.03.2019 animal was immobilized under xylazine and ketamine combination

anaesthesia. The repeated thorough 'X' ray examinations were carried out on the affected limb. The X ray examination revealed irregular growth at proximal extremity of humerus which was suspected for osteosarcoma. To confirm whether its osteosarcoma a fine needle aspiration cytology was performed under sedation. However laboratory findings were negative for any cancerous growth.

BACTERIAL INFECTION IN FEMALE ELEPHANT

20 year old Female elephant had signs of dullness and inappetance. The clinical examination of animal revealed rise in rectal temperature to 100.4 F whereas temperature of the freshly voided faeces was 99.7 F. The blood samples were collected and send for laboratory analysis. The laboratory reports were indicative of bacterial infection. The animal was treated with Inj. Byrocine 60 ml and Inj. Melonex plus 40 ml intramuscularly for 3 days. Animal showed complete recovery and normal activity after 5th day.

Seasonal special arrangements for upkeep of animals

SUMMER MANAGEMENT

1. To counter the summer stress fogger system is made available in the Kraal section of Asiatic lion and Royal Bengal tiger.
2. Coolers are provided in Sloth bear, Leopard, Asiatic lion and Royal bengal tiger night cubicles.
3. Wallowing pond is established in sambar exhibit.
4. Elephants are given cold water bath twice a day in summer.
5. Rain gun system for watering the garden area is utilized to maintain cool atmosphere around enclosures.
6. All snake houses are fitted in with foggers, fans and coolers which are put into use depending upon variations in the ambient temperature.

WINTER MANAGEMENT

1. Wooden planks are used in the tiger and lion night cubicals over which dry grass is spread to create sufficient warmth.
2. In the resting sheds of deer and antelopes hips of dry grass utilized as bedding material in the reptile houses blankets and heaters are used in adequate numbers.

Conservation Breeding Programme of the Zoo

Rajiv Gandhi Zoological Park is actively acting as a participating zoo for the conservation breeding programme of Malabar giant squirrel. After the successful first ever breeding of the species, from last year the breeding aspect is further widely focused by the zoo. The second successful birth of youngone from the same pair of animal has raised the hopes and boost up the confidence about successful breeding programme of species. Here onwards it was utmost important, the breeding perspective needed to be concentrated on scientific lines. The genetic heterozygosity easement of the founder stock initiated by collecting requisite bio samples from the individuals. The LaCONES has been approached for the genetic study of the available stock of animals.

The work of separate off display conservation facility has initiated where it is planned to construct two cages admeasuring 50 sq. mtr. each with five night cells. The scope for future expansion of the facility is kept if population of the species augments further. The progeny born out of the founder stock would be exchanged with other zoo to change the blood line within the animals.

राजीव गांधी प्राणिसंग्रहालयात प्रजनन केंद्र : नामशेष होणारा वंश जपणार

महाराष्ट्राचा राज्य प्राणी 'शेकरू'ची वंशवृद्धी

सुषमा शिंदे-नेहरुकर ।
लोकमत न्यूज नेटवर्क

पुणे : महाराष्ट्राचा राज्य प्राणी शेकरू (जार्जंट रिव्हरल) नामशेष होण्याच्या मार्गावर आहे. यामुळेच शेकरूच्या संरक्षण व संवर्धनासाठी केंद्रीय प्राणिसंग्रहालय प्राधिकरणाच्या मदतीने पुणे महापालिकेच्या कात्रज येथील राजीव गांधी प्राणिसंग्रहालयात 'शेकरू'चे प्रजनन केंद्र (ब्रीडिंग सेंटर) सुरू करण्यात आले आहे. लोकसभा निवडणुकीची आचारसंहिता संपल्यानंतर या ब्रीडिंग सेंटरचे उद्घाटन करण्यात येणार आहे.

राजीव गांधी प्राणिसंग्रहालयाचे संचालक डॉ. राजकुमार जाधव यांनी सांगितले, की केंद्रीय प्राणिसंग्रहालय प्राधिकरणाने 'वन्यप्राण्यांच्या राष्ट्रीय

प्रजनन कार्यक्रम' अंतर्गत देशभरतील नामशेष होण्याच्या मार्गावर असलेल्या ७२ वन्यप्राण्यांच्या वंशसंवर्धनाचा निर्णय घेतला आहे. त्यानुसार देशातील विविध प्राणी संग्रहालयांना वेगवेगळ्या वन्यप्राण्यांचे ब्रीडिंग सेंटर सुरू करण्याचे आदेश दिले आहेत. यानुसार महाराष्ट्रात पुणे महापालिकेला 'शेकरू'चे प्रजनन केंद्र सुरू करण्यास सांगितले आहे.

शेकरू थोडा लाजरा आणि उंच झाडावर वास्तव्य करून राहणारा प्राणी आहे. त्याची घाटे बांधण्याची पद्धत वेगळी असते. एका झाडावर अनेक ठिकाणी तो घाटी बांधतो. यातील एखाद्या घाट्यातच शेकरूची मादी पिलांना जन्म देते. यामुळे ब्रीडिंग सेंटरमध्ये प्रजनन करून घेणे कठीण काम आहे. यामुळे गेल्या दीड वर्षांपासून याबाबत प्रयत्न सुरू होते.

तीन पिलांचा जन्म

• तुकतेच शेकरूचे अत्यंत कठीण असे ब्रीडिंग यशस्वी झाले व तीन पिलांना जन्म झाला आहे. याबाबतचे ब्लड रिपोर्ट हॅदराबाद येथे जेनेटिक टेस्टसाठी पाठविण्यात आले आहेत. आता कायमस्वरूपी शेकरूचे ब्रीडिंग सेंटर सुरू करण्यात येत आहे. महापालिकेच्या या संग्रहालयात एक नर आणि दोन मादी शेकरू एक-दीड वर्षांपासून आणून प्रायोगिक तत्वावर प्रयत्न सुरू आहेत.

“ शेकरूचा ब्रीडिंगची अत्यंत कठीण घाचणी यशस्वी झाली असून, आता अधिकृतपणे हे सेंटर सुरू करण्यात येणार आहे. यासाठी आवश्यक तेवढा निधी व सुविधा उपलब्ध करून देण्यात आल्या आहेत. अन्य वन्यप्राण्यांसाठीदेखील हा विचार सुरू आहे.

वाघांसाठी फॉगर, कूलर

राजीव गांधी प्राणिसंग्रहालयात वन्यजीवांचे उन्हापासून संरक्षण

पुणे : प्रतिनिधी

पुण्यात सध्या तापमानाचा पारा ४० अंशांच्या घरात आहे. जसजसा उन्हाळा वाढतोय तसतशी अंगाची लाहीलाही होत आहे. कात्रज येथील राजीव गांधी प्राणिसंग्रहालयातील प्राण्यांचीदेखील हीच अवस्था होत होती. मात्र, या प्राण्यांचे उकाड्यापासून संरक्षण करण्यासाठी संग्रहालयाकडून विविध उपाययोजना करण्यात आल्या आहेत. त्यामुळे आता या संग्रहालयात 'ठंडी... ठंडी... गर्मी का मौसम आया...!' असेच म्हणावे लागेल.

कात्रज येथील या संग्रहालयात सुमारे ६३ प्रजातीचे ४२० प्राणी आहेत. त्यामध्ये सरपटणारे प्राणी, सस्तन प्राणी, पक्षी यांचा समावेश आहे. त्यांना पाहण्यासाठी देशभरातून लाखो पर्यटक येत असतात. प्राणिसंग्रहालयाचे जवळपास वन्यविभागाकडे आहे. यासंदर्भात संग्रहालयाचे संचालक राजकुमार जाधव यांनी सांगितले की, सध्या उन्हाळ्यामुळे याताळण्याचे तापमान ४० अंश सेल्सिअसवर जाऊन पोचले आहे. त्यामुळे संग्रहालयातील वाघ, सिंह, बिबट्या, अम्बल, हत्ती यांसारख्या प्राण्यांची विशेष काळजी घ्यावी लागते. या प्राण्यांच्या राहणीवाचामध्ये कूलर आणि फॉगरची व्यवस्था केली आहे.

सरपटणाऱ्या प्राण्यांसाठीमुद्दा फॉगरची व्यवस्था करण्यात आली आहे. इतकीना दिवसातून दोन-तीन वेळा थंड पाण्याने आंघोळ घालण्यात येते. हाचि वार्गीतील कृमिशुद्धी प्राण्यांच्या खंदकाभोवती थंड पाण्याचे मिश्रणही फिक्त आहेत. त्यामुळे परिसरात हिरवळ कायम राहण्यास मदत होते. शिवाय खंदकाभोवतीचे तापमानही त्यामुळे थंड राहाते.

या ठिकाणी वैद्यकीय उपाययोजनांचीही व्यवस्था करण्यात आली असून, त्यासाठी पशुवैद्यकीय अधिकाऱ्यांनी, पशुवैद्यकीय पर्यवेक्षक, वेड अंमिलत कीपर, अंमिलत कीपर आदींचा अनुषंगी चमू आहे.

बछडवॉरह निवाऱ्यात थॉडून अंगार थंड पाण्याचा फवारा झेलत गाळ्याचा सुखद अनुभव घेणारी वाघीण.

पर्यटकांनी प्राणिसंग्रहालयात आल्यानंतर येथील नियम पाळणे त्यांच्यासाठी बंधनकारक आहे. संग्रहालयात आल्यानंतर कोणत्या गोष्टी कराय्यात आणि कोणत्या करू नयेत, यासंदर्भातील नियमांचे फलक संपूर्ण प्राणिसंग्रहालयात ठिकठिकाणी लावण्यात आले आहेत. त्या नियमांचे पालन करण्यात यावे, असेदेखील प्राणिसंग्रहालय प्रशासनाकडून सूचित करण्यात आले आहे. वन्यजीवांना इजा अथवा त्रास देऊ नये, वन्यजीव संरक्षण कायदा कलम ३८ चे नुसार वन्यजीवांना त्रास देणे गुन्हा असून, त्यानुसार सहा महिने कारावास आणि दोन हजार रुपये दंड अशी तरतूद आहे.

राजीव गांधी प्राणी संग्रहालय में जन्मे बाघों के 4 शावकों का नामकरण

अब सार्थक, आकाश, गुरु व पूर्णिमा के नाम से जाने जाएंगे : तीन माह पहले रिद्धि बाघिन ने शावकों को जन्म दिया

पुणे, 4 फरवरी (आ.प्र.)

पुणे ममपा के भारतन राजीव गांधी प्राणी संग्रहालय में साढ़े तीन महीने पहले कोजागिरि पूर्णिमा के दिन जन्मे बाघों के चार शावकों का सोमवार को नामकरण किया गया. बाघों के शावक अब सार्थक, आकाश, गुरु और पूर्णिमा के नाम से जाने जाएंगे. प्राणी संग्रहालय में बाघों की पहचान के लिए नामकरण जरूरी होता है. महापौर मुक्ता तिलक के हाथों शावकों का नामकरण किया गया. इस वक्त मनसे के ममपा गुटनेता वसंत मोरे, नगरसेवक युवराज बेलदरे, मुख्य उद्यान अधीक्षक अशोक घोरपड़े, प्राणी संग्रहालय के संचालक डॉ. राजकुमार जाधव, उपसंचालक डॉ. नवनाथ निघाट, कार्यकारी अभियंता सुधीर कदम तथा मुंबई पशु चिकित्सा कॉलेज के विद्यार्थी और प्राणी संग्रहालय के सभी कर्मचारी उपस्थित थे.

डॉ. राजकुमार जाधव ने बताया कि प्राणी संग्रहालय में केवल पांच ही बाघ-बाघिन शोष रहने से ब्रीडिंग कार्यक्रम के

लिए बागीराम व रिद्धि बाघ-बाघिन की जोड़ी को चुना गया था. बाद में रिद्धि गर्भवती हो गई व 105 दिनों के बाद 23 अक्टूबर को उसने पांच शावकों को जन्म दिया. पांच शावकों में से एक शावक की मौत हो गई. शेष चार शावक अच्छी स्थिति में हैं. बाघ के शावकों का जन्म होना बड़ी उपलब्धि है. इससे पहले वर्ष 2004 में पेशवे पार्क प्राणी संग्रहालय में

बाघिन ने शावकों को जन्म दिया था.

पीला बाघ देश के सभी प्राणी संग्रहालय में सैलानियों का प्रमुख आकर्षण का केंद्र होता है. प्राणी संग्रहालय में बाघ लाने के लिए जानवरों के आदान-प्रदान कार्यक्रम के जरिए दूसरे मान्यताप्राप्त प्राणी संग्रहालय से लाना पड़ता है, अन्यथा प्राणी संग्रहालय में ही ब्रीडिंग कर बाघों को जन्म देना पड़ता है. प्राणी संग्रहालय में बाघों

की संख्या संतुलित रखने प्राणी संग्रहालय प्रबंधन समिति प्रयासरत थी. अगले कुछ दिनों में इन शावकों को सैलानियों को देखने हेतु खुली खाई में छोड़ा जाएगा. एक वर्ष बाद इनमें से कम से कम दो शावकों को अन्य प्राणी संग्रहालयों को प्राणी आदान-प्रदान कार्यक्रम के तहत देकर उनके बदले सफेद बाघों की जोड़ी यहां लाने का प्रयास किया जाएगा.
